Job Description: Relationship Manager

Client Relations function · One position per shift

Designation	Relationship Manager
Also referred to as	Client Relationship Manager
Department	Client Relations
Reporting To	Client Relationship Head – sole reporting line
Direct Reports	2 Relationship Executives on the shift, and the Relationship Associates beneath them
Grade Level	Middle management
Working Hours	8.5 hours, aligned to the assigned shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Relationship Manager owns the client relationship on the shift and leads the Relationship Associates who service it. The role carries a retention and growth objective. **For that reason the role holds no authority over compliance decisions**, and may not delay, dilute or decline to pass on a compliance observation raised by an Associate. Where a client is held or refused by Compliance, the Relationship Manager manages the client conversation; the Relationship Manager does not reopen the decision.

Role Purpose

The Relationship Manager is accountable for the quality, continuity and commercial value of the Company's client relationships during the assigned shift. The role converts a completed first order into a retained client, originates and shepherds repeat business, owns client grievances through to resolution, and supervises the Relationship Associates who carry the day-to-day contact.

Scope and Scale

Dimension	Scale
Client portfolio	___ active clients on the assigned shift
Team	2 Relationship Executives and ___ Relationship Associates, purchase side and sales side
Coverage	One of three shifts providing 24x7 client coverage
Commercial	Repeat order volume and retention for the assigned portfolio

Key Accountabilities

1. Client Relationship Ownership

- Own the assigned client portfolio for the shift: know the clients, their transaction patterns, their preferences and their history with the Company.
- Apply the segmentation framework set by the Client Relationship Head, and service each client to the standard defined for their segment.
- Maintain relationship continuity across shifts, so that a client dealing with the Company at any hour receives a consistent position and does not repeat themselves.
- Conduct structured client reviews on the defined cadence for higher-value segments, and record what was discussed and committed.

2. Repeat Order Origination

- Originate repeat business from the existing portfolio: identify clients due to transact, initiate contact and convert.
- Obtain current rates and quantity availability from Operations through the defined channel before quoting anything to a client.
- Route every repeat order through KYC verification before it is passed to Operations for processing. No repeat order bypasses verification on the ground that the client is known.
- Hand the order to Operations cleanly, with the client-side information required to process it.
- Quote only within the rate band and terms confirmed by Operations. Do not commit a rate, a timeline or an exception independently.

3. Team Leadership on Shift

- Allocate clients and workload across the two Relationship Executives and their desks, by capacity and capability.
- Supervise, through the Relationship Executives, the quality of client interaction: response times, accuracy of information given, and adherence to the rule that no Associate commits terms.
- Coach the Relationship Executives, and through them the Associates, on specific errors rather than general standards.
- Hold the shift handover: open grievances, clients awaiting response, orders in progress, and anything referred and awaiting a decision.
- Ensure every Associate completes assigned training and holds current certification.

4. Grievance Ownership

- Own every grievance escalated by an Associate, and every grievance raised directly to the Relationship Manager.
- Investigate with the function that holds the facts, resolve within the defined timeline, and confirm resolution with the client.
- Escalate to the Client Relationship Head any grievance unresolved within the timeline, any grievance involving a Company employee, and any grievance likely to result in a platform complaint or a regulatory contact.
- Maintain the grievance register for the shift, with cause analysis rather than only outcome.

5. Retention and Growth

- Monitor portfolio activity and act on decline before the client stops transacting, not after.

- Identify the reason for every client loss and report it honestly, including where the cause sits inside the Company.
- Identify growth opportunity within the existing portfolio and propose it to the Client Relationship Head with a commercial rationale.
- Report on retention, activity and portfolio value on the defined reporting cycle.

6. Compliance Interface

- Carry to Compliance, without alteration or delay, every compliance-relevant observation reported by a Relationship Executive or a Relationship Associate.
- **Do not assess, filter, weigh or resolve a compliance observation.** The commercial value of the client is never a factor in whether an observation is passed on.
- Do not seek to persuade, hurry or work around a Compliance hold, refusal or referral, and do not ask an Associate to do so.
- Where a client is held or refused, manage the client communication within the position agreed with Compliance, disclosing nothing about the reason for the decision.
- Complete all assigned AML and KYC training and ensure the shift team does the same.

Key Interfaces

Function	Purpose of the interface
Client Relationship Head	Reporting line: targets, segmentation, escalation, approvals
Operations (Operations Executive / Operations Manager)	Rates, quantity availability, order status, execution issues
KYC Associate and Internal Compliance Officer	Client verification status; receiving holds and decisions
Payment Operations	Payment and payout status affecting a client conversation
External Compliance Officer	Client records and history where an account is under external query
HR	Rostering, training, appraisal and team matters

Authority and Limits

- **Approves:** client allocation and workload across Associates on the shift; routine service gestures within the published matrix; the content of routine client communication.
- **Requires Client Relationship Head approval:** any commercial concession or exception; any rate or term outside the published band; any client segment reassignment; any written commitment to a client.
- **Holds no authority over:** KYC clearance, customer risk categorisation, compliance referrals or decisions, payment release, or order release. These sit with Compliance, Payment Operations and Operations respectively.
- **Escalate to the Client Relationship Head:** grievances beyond timeline; any threat of platform complaint, legal action or regulatory contact; loss of a material client; any request from another function to withhold a compliance observation.

Key Performance Indicators

Measure	Standard
Client retention across the assigned portfolio	Above ____%
Repeat order volume from the portfolio	____% of target
Grievances resolved within timeline	Above ____%
Grievance recurrence on the same cause	Below ____%
Client response time on the shift	Within ____ minutes
Compliance observations passed on unaltered	100%
Unauthorised commitments to clients	Zero
Team certification and training currency	100%

Passing on compliance observations operates as a gate. Any confirmed instance of an observation being withheld, delayed or diluted caps the grade for the period regardless of commercial performance. Targets marked ____ are set in the departmental KPI scorecard.

Qualifications and Experience

Essential

- Bachelor's degree in any discipline. A postgraduate qualification in management is an advantage.
- Four years or more in client relationship management, key account management or client servicing, including at least one year supervising a team.
- Demonstrated ownership of a client portfolio with a retention or growth objective.
- Fluent spoken and written Hindi and English.
- Willingness to work rotational shifts, including the night shift.
- Clear background and reference verification.

Preferred

- Fintech, payments, broking, exchange or financial services background.
- Exposure to KYC and AML obligations from a client-facing standpoint.
- Experience managing clients through a compliance refusal or a service failure.
- An additional regional language.

Competencies

Core

- Integrity: passes on what must be passed on, including when it costs a client.
- Accountability: owns the outcome of the shift rather than the effort put into it.
- Client orientation balanced against the Company's risk position.

Functional

- Relationship management and consultative client conversation.
- Commercial judgement within a defined band.
- Grievance investigation and root-cause analysis.

- Data literacy sufficient to read portfolio activity and spot decline.

Leadership

- Coaching and developing Associates on specifics.
- Composure under client pressure, and the ability to hold a position without escalating a conversation.
- Delegating without losing sight of quality.

Development Path

The Relationship Manager position develops toward Client Relationship Head. Progression is assessed on portfolio outcomes, the development of Associates into Relationship Manager readiness, and a clean record on the compliance interface. A named successor is expected to be identified and developed within the shift team.

Notes for HR and Management

Video KYC has been removed from this role. The superseded Relationship Manager description assigned video KYC execution to this position. It now sits with the KYC Associate under Compliance. A person who holds the client relationship and a retention target should not also be the person verifying that client's identity.

The 8.5-hour manager day resolves the handover gap. The three shifts run back to back with no overlap, while every operating description requires a written handover. If the Relationship Manager's additional half hour is rostered at the end of the shift, it covers changeover without anyone working unpaid time. The same applies to the Operations and Payment Operations supervisory layers.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities, escalation obligations and authority limits set out in it, and in particular the obligation to pass on compliance observations unaltered.
