Job Description: Payment Operations Associate

Supersedes the designations 'Payment Associate' and 'UPI / IMPS Payment Handler'

Designation	Payment Operations Associate
Formerly	Payment Associate; earlier UPI / IMPS Payment Handler (titles superseded)
Department	Liquidity and Settlements
Reporting To	Payment Operations Executive (shift) – sole reporting line
Function Line	Payment Operations Executive → Settlement Operations Manager → Head of Liquidity & Settlements
Function Head	Head of Liquidity & Settlements
Shift	Rotational across three shifts, 8 hours per shift
Location	Blynk Virtual Technologies Pvt. Ltd.

Position of the role. The Payment Operations Associate sits at the point where the Company's funds actually leave and where client funds are actually confirmed received. The Associate reports solely to the Payment Operations Executive for the shift, and executes only on an approved payment instruction received through that Payment Operations Executive. **The Associate who prepares a payment does not release it, and does not verify it.** Accuracy is the control in this role. Speed matters only within accuracy.

Objective

The Payment Operations Associate executes outward payments and verifies inward receipts for the shift, accurately, within time, and on a documented record. The role exists so that money leaves the Company only against an approved instruction to a verified beneficiary, and so that no order is treated as funded until the funds are actually confirmed in the Company's account.

The Payment Operations Associate does not authorise payments, does not decide amounts, and does not amend an instruction. The role executes and verifies. Every judgement call belongs to the Payment Operations Executive.

Key Responsibilities

1. Outward Payment Execution

- Execute UPI, IMPS, NEFT and RTGS payouts only against an approved payment instruction received through the Payment Operations Executive.
- Before executing, check the beneficiary name, account number, IFSC or UPI handle, and amount against the approved instruction, and against the beneficiary registered in the client's KYC record.
- Where the payout is against a client sale of digital assets, confirm the instruction states the net amount after tax deduction at source under Section 393 of the Income-tax Act, 2025 (formerly Section 194S). Do not compute or adjust the deduction independently.
- Do not execute any instruction received verbally, by personal message, or from any person other than the Payment Operations Executive, however senior.

- Capture the UTR or reference number and the transaction confirmation at the time of execution, and attach it to the instruction record before moving to the next payment.

2. Inward Payment Verification

- Verify receipt of client funds against the bank statement or the account itself. A screenshot, a payment reference shared by the client, or a claim of transfer is not verification.
- Confirm three things on every credit: the amount matches, the remitter matches the client's registered account, and the reference is correct.
- Do not confirm receipt on a partial credit, a third-party credit, a name mismatch, or a credit that cannot be tied to a specific order. Escalate instead.
- Communicate confirmation only through the recorded channel. An order is funded when the record says so, not when the Associate says so verbally.

3. Maker and Checker

- The Associate who prepares a payout does not release it. Release requires a second Associate or the Payment Operations Executive.
- No Associate verifies the inward receipt for an order on which they executed the outward leg.
- The names of both the preparer and the releaser are recorded against every transaction.
- Where staffing on a shift makes a second person unavailable, the payment waits for the Payment Operations Executive. It is not released single-handed. A delayed payment is recoverable; a wrong one frequently is not.

4. Channel Availability and Downtime

- Maintain working familiarity with every approved payment channel, banking app and portal in use.
- Where a channel is down, limits are exhausted, or a transaction fails, report it to the Payment Operations Executive and switch only to an approved alternate channel.
- Never route a Company payment through a personal account, a personal UPI handle, or any channel not on the approved list, under any circumstance or level of urgency.
- Log every downtime with the channel, start time, impact and resolution.

5. Records and Shift Reconciliation

- Maintain the payment log for the shift: timestamp, channel, beneficiary, amount, purpose, UTR, preparer and releaser.
- Reconcile all executed payments against the instruction list before the shift closes. The shift does not close with an unexplained difference.
- Submit the shift payment summary to the Payment Operations Executive: executed, pending, failed, awaiting confirmation, and limits consumed by channel.

6. Escalation and Red Flags

All escalation is to the Payment Operations Executive for the shift.

- Escalate before executing: any beneficiary or remitter name mismatch; any third-party payment or payout instruction; any request to split a payment across accounts; any change of beneficiary requested at short notice; any pressure to release before verification is complete.
- Escalate the moment it is identified: any duplicate payment, wrong beneficiary, wrong amount, or failed payment where funds have left the account.
- A payment error reported immediately by the Associate is treated as a recoverable operational event. An error concealed, delayed or discovered by someone else is treated as a conduct matter.

7. Credentials, Confidentiality and Conduct

- Payment credentials, devices, tokens and access are issued to the Associate personally. They are not to be shared, transferred, or operated by any other person.
- Do not hand over a credential, OTP, PIN or device to anyone, including a supervisor or a member of senior management. Where someone else needs a payment made, they raise it with the Payment Operations Executive.
- Do not hold client bank details, payment screenshots or transaction records on a personal device or personal account.
- Do not accept any consideration, gift or benefit from a client, counterparty or beneficiary.
- Disclose immediately any personal, family or financial relationship with a beneficiary.

8. Shift Handover

- Complete a written handover to the incoming Associate covering payments pending, failed, awaiting confirmation, channel status and limits consumed.
- Do not leave the desk until the incoming Associate has acknowledged the open items in writing.

Authority and Limits

The Payment Operations Associate executes. The Associate does not authorise.

- **No payment is made without an approved instruction** routed through the Payment Operations Executive. There is no exception for urgency, seniority of the requester, or a waiting client.
- **Zero authority to amend** the beneficiary, amount, narration or channel stated on an approved instruction. A change requires a fresh instruction.
- **Payout limit:** up to ____ per transaction may be released by a second Associate as checker. Above that, release requires the Payment Operations Executive.
- **No authority to confirm an order as funded** on anything other than the bank record.

Performance Standards

Measure	Standard
Payment accuracy: beneficiary, amount, reference	100%
Duplicate or wrong-beneficiary payments	Zero
Execution within time of approved instruction	Within ____ minutes
UTR or confirmation captured at time of execution	100%
Maker-checker compliance	100%
Inward receipts verified against bank record only	100%
Shift reconciliation closed before handover	100%
Errors self-reported before detection by others	Measured for coverage. Concealment is a conduct matter, not a performance one.

Targets marked ____ are to be set in the departmental KPI scorecard and reviewed each quarter.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- Each shift is led by a Payment Operations Executive. The Associate reports to the Payment Operations Executive on duty for that shift.
- Shifts rotate as published in the monthly roster. Weekly off is scheduled by roster and may fall on any day.
- Handover is completed at the change of shift and is part of the shift, not additional to it.

Eligibility and Skills

Essential

- Graduate in any discipline.
- One year or more in payment processing, banking operations, accounts payable or cash handling. Strong fresh graduates with demonstrated numerical accuracy may be considered.
- Working knowledge of UPI, IMPS, NEFT and RTGS, including cut-off timings and failure behaviour.
- Comfortable operating mobile banking applications and net banking portals accurately at speed.
- Numerical accuracy under time pressure, sustained across a full shift including nights.
- Willingness to work rotational shifts including the night shift.
- Clear background and reference verification. This is mandatory and not waived for any candidate in this role.

Preferred

- Payment gateway, exchange, NBFC or bank back-office payments background.
- Bank reconciliation experience.
- Exposure to AML red flags in payment flows.

Attributes

- Checks before acting, every time, including on the hundredth payment of the shift.
- Reports own errors immediately and without prompting.
- Does not improvise under pressure from a waiting client, counterparty or colleague.
- Personal integrity. This role has direct operational access to Company funds.

Notes for HR and Management

Maker-checker is the reason this role exists in a team rather than as an individual. The superseded description made the same person responsible for executing a payment and for verifying it. That removes the only control that reliably catches a wrong beneficiary before the money is gone. This description separates the two. If a shift is staffed with a single Associate, the Payment Operations Executive is the checker; the role is not run unchecked.

Credential handling is deliberately absolute. The instruction never to hand over a credential or OTP, including to a supervisor, is what protects the Associate as much as the Company. Without it, an Associate has no defensible ground to refuse, and every misuse becomes traceable to their credential and therefore to

them.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and conduct standards set out in it.
