Job Description: Relationship Associate

Purchase Side | Sales Side · Three-shift rotational

Designation	Relationship Associate (RA)
Department	Client Relations & Compliance
Reporting To	Relationship Executive (shift) – sole reporting line
Function Line	Relationship Executive → Relationship Manager → Client Relationship Head
Positions	Relationship Associate (Purchase Side) and Relationship Associate (Sales Side)
Shift	Rotational across three shifts, 8 hours per shift, providing 24x7 desk coverage
Location	Blynk Virtual Technologies Pvt. Ltd.

Reporting Line. The Relationship Associate reports solely to the Relationship Executive. All work allocation, instructions, queries, escalations and reporting pass through the Relationship Executive. The Associate does not report to, and does not take direct instruction from, any other manager or department. Where a matter concerns Operations or Compliance, the Associate raises it with the Relationship Executive, who carries it to the relevant function.

Objective

The Relationship Associate is the Company's first and most frequent point of contact with the client. The role exists to hold the client relationship, compile and maintain accurate client records, receive and route client grievances, and act as the working link between the Operations desk and the Compliance function.

The Relationship Associate does not execute trades and does not clear compliance decisions. The responsibility of the role is to ensure that the information each of those functions requires reaches the Relationship Executive accurately, completely and without delay, so that it can be acted upon by the correct function.

Key Responsibilities

1. Client Engagement and Communication

- Serve as the day-to-day point of contact for assigned clients across calls, chat and approved messaging channels.
- Respond to client queries within the defined response time for the assigned shift.
- Communicate professionally and in line with Company policy at all times. Do not commit rates, timelines or exceptions that have not been confirmed by the Relationship Executive.
- Maintain relationship continuity across shifts through documented handover, so that a client is not required to repeat information already provided.

2. Client Data Compilation and Record Maintenance

- Collect, check for completeness and record client profile data, contact details, registered bank and wallet details, and transaction preferences in the ERP.

- Update any change in bank account, contact details or business profile on the same day it is reported by the client.
- Keep every assigned client file complete and audit-ready at all times.
- Capture all client information within the ERP. Client details must not be held in personal notes, personal devices or informal channels.

3. Grievance Handling

- Receive, log and acknowledge every client grievance at the point of receipt, including grievances raised verbally.
- Classify each grievance by type and severity and route it to the responsible function within the defined timeline.
- Follow the grievance through to closure and confirm the resolution with the client.
- Escalate any grievance that is unresolved or ageing beyond the defined limit to the Relationship Executive.
- Maintain the grievance register in a form suitable for internal review and audit.

4. Liaison Between Operations and Compliance

- Provide the Relationship Executive with the client-side information required for order execution: confirmations, payment details, timing and client instructions. The Relationship Executive carries this to the Operations desk.
- Report to the Relationship Executive every compliance-relevant observation arising from the client interaction: name mismatches, third-party involvement, reluctance to provide documentation, inconsistent stated purpose, or any listed red flag. The Relationship Executive carries the matter to the Compliance function.
- Confirm that a client's compliance status is complete before the client is progressed for transaction.
- Report compliance observations exactly as observed. The Relationship Associate must not assess, filter, resolve or dismiss a compliance concern, and must not attempt to settle it directly with Operations or Compliance.

5. Order Support and Coordination

- Track assigned client orders from initiation to completion and update the client at each defined stage.
- Follow up with the client for confirmations, documents or details that are holding an order.
- Request real-time execution support through the Relationship Executive. The Associate does not task Operations Associates directly.
- Flag delayed, stuck or disputed orders immediately rather than at the end of the shift.

6. Compliance Support

- Confirm KYC and documentation status before a client is progressed for any transaction.
- Assist the Compliance function by obtaining documents, clarifications and declarations from the client.
- Support video KYC scheduling, client preparation and follow-up in coordination with the Relationship Executive.
- Complete all assigned KYC and AML training and maintain certification currency. An uncertified Associate may not handle client accounts.

7. Confidentiality and Conduct

- Maintain strict confidentiality of client identity, documents, transaction history and internal pricing.
- Do not store, transfer or transmit client data on personal devices, personal accounts or any unauthorised channel.

- Disclose immediately any personal, family or financial relationship with a client or prospective client.
- Do not accept any consideration, gift or benefit from a client in any form.

8. Reporting and Shift Handover

- Submit a shift report covering client interactions, grievances logged, escalations raised and orders pending.
- Complete a written handover to the incoming Relationship Associate, with all open items acknowledged by the receiving Associate.
- Maintain documentation to a standard that supports internal review, statutory audit and regulatory inspection.

Role Split: Purchase Side and Sales Side

The Relationship Associate function is staffed in two legs. Both legs share the responsibilities set out above. The responsibilities below are specific to each leg and reflect the different risk profile of each transaction direction.

Convention used in this document: **Purchase Side** covers clients purchasing digital assets from the Company, where funds flow inward. **Sales Side** covers clients selling digital assets to the Company, where payouts flow outward.

Relationship Associate – Purchase Side

- Guide the client through the purchase flow: quote confirmation, payment instruction, funds transfer and delivery confirmation.
- Confirm that the client is paying from their own verified and registered account. Escalate any third-party payment, name mismatch or split payment to the Relationship Executive before the order is progressed, and do not proceed until instructed.
- Obtain source-of-funds information where the client's risk category requires it.
- Watch for purchase-side red flags: a sudden change in transaction size, funding from a newly added account, unexplained urgency, or reluctance to state the purpose of the transaction.
- Communicate a delivery timeline to the client only after receipt and verification of funds has been confirmed.

Relationship Associate – Sales Side

- Guide the client through the sale flow: quote confirmation, asset transfer and payout.
- Verify that the beneficiary bank account is registered to the client and matches KYC records. Do not accept or forward a payout instruction to a third-party account under any circumstance.
- Explain the applicable tax deduction at source under Section 393 of the Income-tax Act, 2025 (formerly Section 194S), and confirm that the client's PAN is on record before payout is processed.
- Watch for sales-side red flags: newly added beneficiary accounts, requests to split a payout across accounts, payout instructions in another name, or inbound assets from an unexplained source.
- Obtain payout status and timing from the Relationship Executive. Do not commit a payout time that has not been confirmed through the Relationship Executive.

Escalation and Authority

The Relationship Associate holds no independent approval authority. No transaction, exception, waiver or release may be approved by this role.

Every escalation is raised with the Relationship Executive. The Associate reports the matter; the Relationship Executive decides where it goes and carries it there. The Associate does not approach

Operations or Compliance directly.

- **Raise immediately, within the same interaction:** any third-party payment or payout instruction, name mismatch, listed red flag, client pressure to bypass a required step, or any suspicion however formed.
- **Raise within the shift:** order delays, payment or payout failures, rate queries and platform issues.
- **Raise as they arise:** grievances unresolved within the defined timeline, client dissatisfaction, and workload or capacity constraints.

Uncertainty is itself a ground for escalation. A Relationship Associate is never expected to resolve a doubt alone, and raising a concern that later proves unfounded is not treated as an error.

Single statutory exception

Where the Associate forms a suspicion relating to money laundering or terrorist financing and is unable to raise it with the Relationship Executive, or believes the matter has been obstructed, the Associate may report it directly to the Chief Compliance Officer as Principal Officer. No person may prevent, delay or penalise such a report. This is an obligation under the Company's AML and KYC Policy. It is not a route for routine escalation and does not create a second reporting line.

Performance Standards

Measure	Standard
First response to client within shift	Within ____ minutes
Grievances logged on the day of receipt	100%
Client record completeness on audit sample	100%
Compliance observations escalated	Measured for coverage. Under-reporting is the failure mode; over-reporting is not penalised.
Shift handover completeness	100%
Client retention across assigned portfolio	Above ____%
Training and certification currency	100%

Targets marked ____ are to be set in the departmental KPI scorecard and reviewed each quarter.

Shift Structure

Shift	Timing	Duration	Coverage
Morning	09:00 to 17:00	8 hours	Purchase and Sales Side
Evening	17:00 to 01:00	8 hours	Purchase and Sales Side
Night	01:00 to 09:00	8 hours	Purchase and Sales Side

- Each desk is led by the Relationship Executive on duty, under the shift Relationship Manager. Shifts rotate as published in the monthly roster.
- Handover is completed at the change of shift and is part of the shift, not additional to it. An Associate may not leave the desk until the incoming Associate has acknowledged the open items in writing.
- Weekly off is scheduled by roster and may fall on any day of the week.

Eligibility and Skills

Essential

- Graduate in any discipline.
- One year or more in client servicing, relationship management, customer support or back-office operations. Strong fresh graduates may be considered for the Purchase Side.
- Fluent spoken and written Hindi and English.
- Working computer literacy: ERP or CRM systems, spreadsheets and messaging platforms.
- Willingness to work rotational shifts, including night shifts and weekends.
- Clear background and reference verification.

Preferred

- Experience in fintech, payments, banking, broking or exchange operations.
- Prior exposure to KYC or AML processes.
- An additional regional language.

Attributes

- Composure with a dissatisfied or pressuring client.
- Accuracy in recording detail, and the discipline to record it at the time it is received.
- Willingness to escalate rather than improvise.
- Personal integrity. This role sits between the client and the Company's funds, and is trusted accordingly.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and conduct standards set out in it.
