Date: 03 September 2026

Job Description: KYC Associate

Compliance function · Three-shift rotational

Designation	KYC Associate
Department	Compliance
Reporting To	KYC Executive (shift) – sole reporting line
Function Line	KYC Executive → Internal Compliance Officer → Head Internal Compliance → Compliance Head
Function Head	Head Internal Compliance
Shift	Rotational across three shifts, 8 hours per shift
Location	Blynk Virtual Technologies Pvt. Ltd.

Position of the role. The KYC Associate reports solely to the KYC Executive on duty for the shift. **The Associate does not take instruction from Operations, Payment Operations or the Relationship team**, and no person outside the Compliance function may direct the Associate to clear, expedite or set aside a check. The Associate identifies and records. The KYC Executive routes upward without filtering, the Internal Compliance Officer assesses, and the Chief Compliance Officer determines suspicion. A request from any other function to move faster is itself reported to the KYC Executive.

Objective

The KYC Associate establishes and maintains the Company's knowledge of who its clients are, and watches what those clients actually do. The role verifies identity before a client transacts, conducts video verification on orders, monitors transactions against the Company's monitoring parameters, and keeps the KYC record complete and retrievable for as long as the law requires it.

The Associate is the Company's first detection layer. The value of the role is measured by what it catches, not by how many files it clears.

Key Responsibilities

1. Transaction Monitoring

- Monitor client transactions during the shift against the monitoring parameters, thresholds and scenarios set in the Company's AML and KYC Policy.
- Review every alert generated during the shift and record a written observation on each. An alert is never closed without a recorded reason.
- Watch for the listed typologies: structuring and value splitting, velocity spikes, dormant accounts becoming active, third-party funding, mismatch between stated purpose and observed activity, and repeated counterparties across supposedly unrelated clients.
- Refer every alert that meets or approaches a red flag through the KYC Executive to the Internal Compliance Officer. The Associate does not conclude that an alert is benign.
- Maintain the monitoring log for the shift: alerts raised, observations recorded, referrals made, and items carried forward.

2. Video KYC Execution

- Conduct video KYC sessions on orders as required by the Company's AML and KYC Policy.
- Confirm during the session that the person is live and present: the session must be live, not a recording, and not a session conducted by anyone other than the Associate.
- Require original documents to be shown during the live session and confirm they match the documents already on file.
- Confirm the client's location is within India and record the geotag or equivalent evidence where the process provides it.
- Ask the prescribed questions on identity, purpose of the transaction and source of funds, and record the answers as given, not as summarised.
- Retain the session recording and the completed checklist against the client record.
- Terminate and refer any session where the person is coached, prompted, reading from a script, appears under duress, or where another person is directing them off-camera.

3. KYC Verification and Filing

- Verify identity, address and, for non-individual clients, constitutional documents against the prescribed checklist.
- Check documents for tampering, reuse, mismatch of name or date, and inconsistency between documents.
- Perform sanctions, PEP and adverse media screening and record the result, including a nil result.
- Apply the customer risk categorisation set in the Policy and trigger enhanced due diligence where the criteria are met.
- Record the reason for every decision, including approvals. A cleared file with no recorded reasoning is an incomplete file.
- Complete onboarding decisions within the defined service level, without allowing the service level to compress the checks.

4. KYC Data Management and Records

- Maintain the client KYC record in the client section of the ERP: documents, screening results, risk category, video KYC evidence, decisions and review dates.
- Order and transaction entries in the purchase and sales section are maintained by the Operations Associate. Do not create, edit or overwrite an entry in that section.
- Keep records complete and retrievable for the period prescribed under the PMLA framework, currently five years, and do not delete or overwrite a superseded document. Supersession is recorded; it is not erasure.
- Ensure every record is legible, correctly indexed to the client, and produceable on request without reconstruction.
- Correct data quality gaps identified in review, and report recurring gaps to the KYC Executive so the source of the gap is fixed rather than the symptom.

5. Periodic Review and ReKYC

- Maintain the ReKYC calendar and initiate periodic updation on the schedule set for each risk category in the Policy.
- Initiate out-of-cycle ReKYC where a trigger occurs: a change in the client's declared business, a change of bank account or beneficiary, a jump in transaction pattern, an adverse media hit, or a change in risk category.

- Follow ReKYC through to completion and report clients whose updation is overdue, with ageing, to the KYC Executive.
- Do not allow a client whose ReKYC is overdue beyond the permitted limit to continue transacting without the Internal Compliance Officer's recorded decision.

6. Coordination Between Teams

Coordination is for obtaining and supplying records. It does not place the Associate under the direction of any other function.

- Supply the compliance status of a client to Operations and the Relationship team when asked: cleared, pending, or referred. The Associate states the status and does not negotiate it.
- Obtain the transaction trail and execution facts from Operations, and client records and communication history from the Relationship team, where these are needed for a review.
- Provide the KYC Executive and the Internal Compliance Officer with the file, evidence and observations required for any referral, escalation or reporting decision.
- Support the External Compliance Officer with KYC files, screening results and the recorded compliance position on any account under lien, freeze or external query.

7. Escalation and Red Flags

- **Refer through the KYC Executive to the Internal Compliance Officer immediately:** any suspicion however formed; third-party funding or payout; name or account mismatch; a sanctions, PEP or adverse media hit; a document that appears tampered or reused; a video KYC terminated for any reason; and any client or internal pressure to clear a file.
- **The Associate never clears a suspicion.** Where the Associate is unsure whether something is reportable, that uncertainty is itself the trigger to refer.
- Raising a concern that later proves unfounded is not an error. Failing to raise one is.

8. Confidentiality and Conduct

- Maintain strict confidentiality of client identity, documents, screening results and transaction history.
- Do not disclose to a client, or to any person outside the Compliance function, that a client is under review, has been referred, or has been the subject of a report. This obligation is absolute and continues after the employee leaves the Company.
- Do not store client documents, video recordings or screening results on a personal device or personal account.
- Disclose immediately any personal, family or financial relationship with a client, and take no part in that client's review.
- Do not accept any consideration, gift or benefit from a client or from any person in connection with a client's file.

9. Shift Handover and Reporting

- Submit a shift report: alerts reviewed, referrals made, video KYCs completed and terminated, files cleared and pending, and ReKYC initiated.
- Complete a written handover to the incoming Associate covering open alerts, pending files and referrals awaiting the Internal Compliance Officer's decision.
- Handover is completed at the change of shift and is part of the shift, not additional to it.

Authority and Limits

- **May clear independently:** standard-risk files below the value threshold set in the AML and KYC Policy, where every checklist item is clear, screening is nil, and documents are consistent.
- **Must refer through the KYC Executive to the Internal Compliance Officer for approval:** every file at or above the value threshold, every high-risk categorisation, every enhanced due diligence case, every screening hit, every document discrepancy, and every case where the Associate is not certain.
- **No authority** to waive a check, accept an incomplete file, override a risk categorisation, or extend a ReKYC deadline.
- **No authority** to close an alert as benign, or to decide that something is not reportable.
- **Takes no instruction** on a compliance matter from any person outside the Compliance function, at any level of seniority.

Performance Standards

Measure	Standard
Quality-check accuracy on sampled files	Above ____%
Documentation completeness on audit sample	100%
Alerts reviewed with a recorded observation	100%
Video KYC completed to the full checklist	100%
ReKYC initiated on calendar	____% within schedule
Onboarding decision within service level	____% of cases
Red flags referred	Measured for coverage. Under-reporting is the failure mode; over-reporting is never penalised.
Training and certification currency	100%

Targets marked ____ are set in the departmental KPI scorecard. No performance measure for this role is linked to order volume, transaction value, or the proportion of files cleared.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- Each KYC desk is supervised by the KYC Executive on duty, under the shift Internal Compliance Officer.
- Shifts rotate as published in the monthly roster. Weekly off is scheduled by roster and may fall on any day.

Eligibility and Skills

Essential

- Graduate in any discipline.
- One year or more in KYC, onboarding, document verification or transaction monitoring. Strong fresh graduates may be considered.

- A sharp eye for inconsistency between documents, and the patience to look for it on every file.
- Clear spoken Hindi and English, and the composure to run a video session with an unfamiliar person.
- Disciplined record-keeping and accurate written observation.
- Willingness to work rotational shifts including the night shift.
- Clear background and reference verification.

Preferred

- KYC or AML experience at a bank, NBFC, fintech or exchange.
- Familiarity with sanctions and adverse media screening tools.
- Exposure to video-based customer identification processes.
- Working knowledge of the PMLA framework and reporting obligations.

Attributes

- Willing to be the person who slows something down.
- Escalates rather than assumes, including when the answer is probably fine.
- Not persuadable by urgency, seniority or a client's frustration.
- Discretion. This role sees more about a client than anyone else in the Company.

Notes for HR and Management

This role must carry no throughput incentive. The Performance Standards deliberately exclude any measure linked to order volume, transaction value or clearance rate. The moment a KYC Associate is rewarded for files cleared or orders enabled, the check becomes a formality, and the first evidence of that appears in a regulatory inspection rather than in a scorecard. Weight the scorecard on accuracy and referral coverage.

Video KYC ownership needs resolving. The existing Relationship Manager description assigns video KYC execution to the Relationship Manager. This description assigns it to the KYC Associate under the Compliance function. Both cannot stand. Compliance is the correct owner, because the person conducting the verification should not also be the person holding the client relationship and the commercial outcome. The Relationship Manager description should be amended to remove it.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and conduct standards set out in it, including the obligation of confidentiality regarding client reviews and referrals.
