Job Description: Operations Associate

Supersedes the designation 'Computer Operator' · Three-shift rotational

Designation	Operations Associate
Formerly	Computer Operator (title superseded; scope revised)
Department	Operations
Reporting To	Operations Executive (shift) – sole reporting line
Function Line	Operations Executive → Operations Manager (shift) → Operations Head
Shift	Rotational across three shifts, 8 hours per shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Operations Associate runs the live desk: pricing and maintaining advertisements, handling counterparty chat, processing orders and making entries in the ERP. **The single most important limit on this role is release.** The Associate releases a digital asset only after Payment Operations has confirmed receipt of funds in the Company's bank record. The Associate never verifies an incoming payment themselves and never releases against a screenshot, a transaction reference supplied by the counterparty, or a claim that payment has been made.

Objective

The Operations Associate converts the Company's pricing into executed volume: maintaining competitive advertisements on both the buy and sell side, handling counterparties through the order, coordinating the checks that must clear before an order completes, and recording every transaction accurately at the time it happens.

The role sits at the point of maximum exposure. Every control around it exists because this is where the Company's assets and funds actually move.

Key Responsibilities

1. Advertisement Management and Pricing

- Create and maintain buy-side and sell-side advertisements across the platforms assigned for the shift.
- Price accurately: the rate published must be the rate the Company will honour, computed correctly against the reference rate and the applicable spread.
- Price appropriately: within the margin band and limits set by the Operations Executive for that shift. Do not price outside the band to win an order.
- Price competitively within that band, monitoring the market and adjusting to hold position without giving away margin. Aggressive pricing means moving to the edge of the approved band, never through it.
- Adjust advertisements promptly on rate movement, inventory position or a change in limits, and confirm any change of direction with the Operations Executive.

- Take an advertisement down immediately where inventory, funding or a system issue means the Company cannot honour it.

2. Counterparty Chat and Order Intake

- Respond to counterparty chat within the response time set for the shift, professionally and in the Company's voice.
- State only the terms published in the advertisement and confirmed by the Operations Executive. Do not offer a rate, a timeline or an exception that has not been approved.
- **Never move a conversation off the platform.** Do not share or accept a personal number, personal messaging handle, email or any off-platform contact, and report any counterparty who requests it.
- Do not disclose internal pricing, inventory position, banking arrangements, staffing or process detail to a counterparty.
- Record the substance of any material commitment or dispute in the chat itself, so that the platform record supports the Company in an appeal.

3. KYC Collection and Handoff

- Collect the KYC details and documents required for the order and forward them to the KYC Associate through the defined channel, without delay and without alteration.
- **Do not assess, verify or clear KYC.** The Associate collects and forwards. The KYC Associate verifies and the Internal Compliance Officer decides.
- Do not progress an order beyond the permitted stage until the KYC Associate has recorded the client as cleared.
- Where the KYC Associate refers or holds a client, do not seek to persuade, hurry or work around the hold. Report the commercial impact to the Operations Executive and stop.
- Coordinate with the Relationship Associate on any client-side information, document or clarification needed to complete the file.

4. Order Processing and Coordination

- **Buy orders, where the counterparty is purchasing and funds come in:** confirm order terms, direct the counterparty to pay to the designated Company account, and pass the order to Payment Operations for verification of receipt. Do not confirm receipt yourself.
- **Sell orders, where the counterparty is selling and a payout goes out:** confirm receipt of the digital asset in the Company's wallet or platform account, then pass the counterparty's payout details exactly as they appear on the platform record to Payment Operations through the Operations Executive. Payment Operations executes the payout. The Associate does not execute it.
- **Beneficiary and account details are passed unaltered.** Do not retype, edit, substitute or supplement a payout detail taken from the platform, and do not accept a change of beneficiary communicated in chat. A counterparty asking to be paid to a different account is escalated, not actioned.
- Coordinate with Payment Operations through the Operations Executive on funding status, payout status and any failed or delayed transaction.
- Coordinate with the Relationship Associate on client communication so the counterparty receives one consistent position, not two.
- Track every open order to completion and flag any order stuck at a stage beyond the defined time.

5. Release of Orders

This section states the Company's principal operational control. It is not subject to exception, urgency, counterparty pressure or shift staffing.

- Release a digital asset only after Payment Operations has recorded confirmation that the funds are received in the Company's bank account, in the full expected amount, from the counterparty's registered account.
- **Never release against:** a screenshot, a payment reference or UTR supplied by the counterparty, a bank SMS forwarded by the counterparty, a partial credit, a third-party credit, or any verbal confirmation from any person.
- Where a counterparty disputes, threatens, complains to the platform, or escalates over a delay in release, do not release. Refer to the Operations Executive. A dispute is recoverable; a wrongly released asset generally is not.
- Where an instruction to release comes from anyone other than through the recorded funding confirmation, do not act on it and report it to the Operations Executive immediately, regardless of the seniority of the person instructing.
- Record the release in the ERP at the time it is made, with the funding confirmation reference attached.

6. ERP Entry and Record Accuracy

- Record every buy, sell and transfer order in the purchase and sales section of the ERP at the time the event occurs, not at the end of the shift: order reference, rate, quantity, counterparty, funding confirmation and release.
- Client and KYC records are maintained by the KYC Associate in the client section of the ERP. Do not create, edit or overwrite an entry in that section.
- Ensure entries match the platform record exactly. Where the ERP and the platform disagree, report the difference to the Operations Executive the same shift rather than adjusting either.
- Do not alter a completed entry. Where a correction is needed, raise it with the Operations Executive so it is made as a recorded correction.
- Complete the shift's entries before handover. A shift does not close with unrecorded transactions.

7. Data Sharing with Compliance

- Supply the Internal Compliance Officer and the KYC Associate with the transaction trail, chat record, order detail and platform evidence required for a review or an alert.
- Supply the External Compliance Officer with the order records, transaction trail and chat evidence required for a lien, freeze or external query on any account.
- Provide records as they are. Do not summarise, interpret, filter or comment on what a record means.
- Provide requested records within the timeline stated, and report to the Operations Executive immediately if a record cannot be produced.

8. Escalation and Red Flags

All escalation is to the Operations Executive on duty for the shift.

- **Escalate before proceeding:** any third-party payment or payout instruction; any name mismatch between the counterparty, the paying account and the KYC record; any request to split a payment or payout; any request to move off-platform; any unusual urgency or pressure to release; any counterparty whose behaviour fits a listed red flag.
- **Escalate immediately:** any release made in error; any asset sent to a wrong address; any platform dispute or appeal raised against the Company; any system, platform or ERP failure affecting the desk.
- An error reported by the Associate at once is treated as a recoverable operational event. An error concealed, delayed, or found by someone else is treated as a conduct matter.
- Uncertainty is itself a ground to escalate. The Associate is never expected to resolve a doubt alone.

9. Confidentiality and Conduct

- Maintain strict confidentiality of counterparty identity, KYC documents, order history, internal pricing, inventory position and banking arrangements.
- Do not hold order records, counterparty details or screenshots on a personal device or personal account.
- Do not trade on the Company's platforms or accounts for personal benefit, and do not conduct personal digital asset trading with any counterparty known through the Company.
- Do not accept any consideration, gift or benefit from a counterparty in any form.
- Disclose immediately any personal, family or financial relationship with a counterparty, and take no part in that counterparty's orders.

10. Shift Handover and Reporting

- Submit a shift report: orders completed, orders open by stage, disputes raised, releases made, escalations, and advertisement and pricing position at close.
- Complete a written handover to the incoming Associate, with open orders and pending releases acknowledged in writing by the receiving Associate.
- Handover is completed at the change of shift and is part of the shift, not additional to it.

Authority and Limits

- **May do independently:** create, price and adjust advertisements within the approved band and limits; respond to counterparty chat on published terms; process orders through the defined stages; make ERP entries.
- **No authority to release** other than against a recorded funding confirmation from Payment Operations.
- **No authority** to price outside the approved band, to grant an exception, to waive a check, to clear KYC, to execute a payout, or to confirm receipt of funds.
- **No authority** to settle a dispute, refund, or compensate a counterparty. All disputes go to the Operations Executive.
- **Escalate to the Operations Executive:** everything listed in section 8, without exception and without first attempting to resolve it.

Performance Standards

Measure	Standard
Release accuracy	100%. Every incorrect release is a reportable incident
Releases made against a recorded funding confirmation	100%
ERP entries recorded at time of transaction	100%
ERP to platform record match	100%
Counterparty chat first response	Within ____ minutes
Volume executed against shift target	____% of target
Margin achieved within approved band	Above ____%
Order completion rate	Above ____%
Disputes and appeals attributable to the Associate	Below ____ per quarter
Red flags escalated	Measured for coverage. Under-reporting is the failure mode; over-reporting is never penalised.

Release accuracy operates as a gate. A confirmed incorrect release caps the grade for that quarter regardless of volume or margin achievement. No measure in this role rewards speed of release. Targets marked ____ are set in the departmental KPI scorecard.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- Each shift is supervised by a Operations Executive reporting to the Operations Manager for that shift.
- Shifts rotate as published in the monthly roster. Weekly off is scheduled by roster and may fall on any day.
- An Associate may not handle live volume without current desk certification.

Eligibility and Skills

Essential

- Graduate in any discipline.
- Demonstrable numerical accuracy and speed. This role prices and executes under time pressure for a full shift.
- Working computer literacy: web platforms, spreadsheets, ERP or CRM systems and messaging tools.
- Clear written English and Hindi for counterparty chat.
- Willingness to work rotational shifts including the night shift.
- Clear background and reference verification. This is mandatory for this role and is not waived.

Preferred

- Prior experience on a P2P, exchange, broking or trading desk.
- Understanding of digital asset markets, spreads and order books.
- Exposure to KYC and AML red flags in a transaction environment.
- Experience handling customer chat or dispute queues at volume.

Attributes

- Holds the release rule under pressure from an angry counterparty at 3 a.m.
- Records at the time, not at the end of the shift.
- Escalates rather than improvises.
- Reports own errors immediately and without prompting.
- Personal integrity. This role has hands on the Company's assets every day.

Notes for HR and Management

The release rule is the reason this role is written tightly. In a P2P operation, almost every large loss traces back to an asset released before funds were confirmed in the bank account, under pressure from a counterparty who sounded credible. Separating verification (Payment Operations, against the bank record) from release (Operations, against a recorded confirmation) is what prevents that. If the two are ever collapsed into one person to save time on a busy shift, the control is gone for as long as that arrangement lasts.

Pricing authority needs a published band. The role is asked to price aggressively, which is right, but aggressive pricing without a floor is how margin disappears one order at a time and without anyone breaching a rule. The Operations Executive must publish the band and limits for each shift, and the scorecard must measure margin within the band, not volume alone.

The off-platform rule is an AML control, not an etiquette rule. A counterparty who wants to move the conversation to a personal channel is removing the evidence trail that protects the Company in a platform appeal and in a lien response. Train it as a red flag to report, not merely as something to decline.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and authority limits set out in it, and in particular the conditions governing the release of orders.
