Job Description: Client Relationship Head

Client Relations function · Department head

Designation	Client Relationship Head
Department	Client Relations
Reporting To	General Manager – sole reporting line
Direct Reports	3 Relationship Managers, one per shift, with 2 Relationship Executives and their Relationship Associates beneath each
Grade Level	Senior management, department head
Working Hours	8.5 hours, with presence across all three shift timings as required
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Client Relationship Head owns the Company's client base: how it is segmented, serviced, retained and grown across all three shifts. The role carries the commercial objective for the client portfolio and therefore **holds no authority over compliance decisions and no ability to overturn a client refusal or hold**. Where the Head disagrees with a compliance outcome, the route is to the General Manager, never to the officer who made it.

Role Purpose

The Client Relationship Head builds and holds the Company's client franchise. The role designs the segmentation and service model, sets the standards the client experiences at any hour of the day, owns retention and growth of the portfolio, and leads a three-shift client-facing function through its Relationship Managers.

The role is expected to build. The segmentation framework, the service standards, the grievance governance and the client MIS are designed by this role, not inherited by it.

Scope and Scale

Dimension	Scale
Team	3 Relationship Managers, 6 Relationship Executives and ____ Relationship Associates
Coverage	24x7 client coverage across three shifts
Portfolio	____ active clients across all segments
Commercial	Retention, repeat volume and portfolio value for the Company's client base

Key Accountabilities

1. Client Strategy and Segmentation

- Design and maintain the client segmentation framework: how clients are classified, what service standard each segment receives, and which segments the Company actively pursues.
- Define the service model for each segment: contact cadence, response standards, review frequency and the level at which the relationship is held.
- Review segmentation each quarter against actual client behaviour and value, and reallocate where the classification no longer fits.
- Propose client acquisition and development strategy to the General Manager with a commercial case and the risk position it creates.

2. Retention and Portfolio Growth

- Own retention across the whole client base, and repeat order volume and value from it.
- Track portfolio health by segment and shift, and act on decline early rather than reporting it late.
- Own the client loss analysis. Report the causes honestly, including where the cause sits inside the Company, and drive the fix with the function that owns it.
- Set and cascade retention and repeat-volume targets to each Relationship Manager with a stated basis.

3. Client Experience Standards

- Define and publish the service standards the client experiences: response times, communication standards, escalation routes and what may and may not be committed at each level.
- Monitor delivery against those standards across all three shifts, and correct variation between shifts. A client's experience must not depend on the hour they make contact.
- Own the client-facing content of communications, including what is said when a client is held or refused by Compliance.
- Reconcile the client-facing view with the operational view supplied by the Operations Head, so that the two pictures agree before either reaches the General Manager.

4. Grievance Governance

- Own the grievance framework: classification, timelines, ownership and closure standards.
- Act as the final internal authority on client grievances within the function, and escalate to the General Manager anything involving legal exposure, regulatory contact or a Company employee.
- Review grievance causes each month and drive corrective action into the function that caused them.
- Ensure no grievance is closed without the client being told the outcome.

5. Function Leadership

- Lead three Relationship Managers and their teams across a continuous shift operation.
- Set the KPI framework for the function, ensure every measure is drawn from a system record, and supply verified data to HR for the appraisal and incentive cycle.
- Plan capacity and rostering with the Relationship Managers and HR so that every shift is staffed to its minimum viable strength.
- Own retention within the team, and ensure the night shift is not treated as a posting of last resort.
- Build the bench: maintain a named successor for every Relationship Manager position.

6. Client MIS and Reporting

- Own the client MIS: portfolio composition, activity, retention, repeat volume, grievance trends and service level performance by segment and shift.
- Deliver the reporting pack to the General Manager on a fixed schedule and in a fixed format, whether or not the numbers are favourable.
- Maintain the definition behind every metric so that a measure means the same thing in every period.

7. Compliance Posture of the Function

- Ensure every Relationship Manager, Relationship Executive and Associate passes compliance observations to Compliance unaltered and without delay, and that this is measured rather than assumed.
- Ensure no member of the function seeks to persuade, hurry or work around a compliance hold, refusal or referral.
- Ensure client-facing staff disclose nothing to a client about the reason for a compliance decision.
- Ensure the function's training and certification obligations are met in full and refreshed on schedule.

Key Interfaces

Function	Purpose of the interface
General Manager	Reporting line: strategy, targets, approvals, escalation
Operations Head	Rates and availability, execution performance, client experience causes
Compliance Head	Client holds and refusals, function compliance posture, training
Head of Liquidity & Settlements	Payment and payout service levels affecting clients
Finance Manager	Client-level value, receivables and commercial reporting
HR Manager	Rostering, capacity, appraisal, training and retention

Authority and Limits

- **Approves:** segmentation and reallocation within the framework; service standards for the function; commercial concessions within the matrix approved by the General Manager; work allocation and rosters within approved headcount.
- **Requires General Manager approval:** the pricing or concession matrix itself; headcount changes; any new client segment or acquisition channel; any written commitment to a client outside standard terms.
- **Holds no authority over** compliance decisions, KYC clearance, customer risk categorisation, order release or payment release. A disagreement with a compliance outcome is raised with the General Manager, not with the officer who made the decision.
- **Escalate to the General Manager:** loss of a material client; any threatened legal action, platform escalation or regulatory contact; any pattern of compliance refusals materially affecting the client base; any instance of a compliance observation being withheld within the function.

Key Performance Indicators

Measure	Standard
Client retention across the base	Above ____%
Repeat order volume and value	____% of target
Portfolio growth by target segment	____% of plan
Service standard adherence, consistent across shifts	Above ____%, variance between shifts below ____%
Grievances resolved within timeline	Above ____%
Grievance recurrence on the same cause	Below ____%
Client MIS delivered on schedule	100%
Compliance observations passed on unaltered	100%
Voluntary attrition within the function	Below ____%

The compliance measure operates as a gate. Any confirmed instance of an observation being withheld, delayed or diluted within the function caps the grade for the period regardless of commercial performance. Targets marked ____ are set in the departmental KPI scorecard.

Qualifications and Experience

Essential

- Bachelor's degree; a Master's degree in management, marketing or a related field preferred.
- Seven years or more in client relationship management, key account management or client servicing, including at least three leading a team through subordinate managers.
- Demonstrated ownership of a client portfolio with retention and growth accountability.
- Experience designing a segmentation or service model rather than administering one.
- Experience leading a continuous shift-based client-facing function.
- Excellent written and spoken English and Hindi.

Preferred

- Fintech, payments, broking, exchange or financial services background.
- Exposure to AML and KYC obligations as they constrain a client-facing function.
- Experience building client MIS and reporting frameworks.

Competencies

Core

- Integrity: does not trade a control for a client.
- Ownership: reports the number that is true, on schedule.
- Judgement in balancing commercial value against risk exposure.

Functional

- Segmentation and service model design.
- Commercial and pricing judgement within a governed matrix.
- Grievance governance and root-cause driven correction.

- MIS design and data literacy.

Leadership

- Leading through managers rather than around them.
- Building structure that does not depend on personal availability.
- Developing successors and holding a bench.
- Accepting a compliance refusal without relitigating it through the people who issued it.

Development Path

The Client Relationship Head position develops toward General Manager. Progression is assessed on portfolio outcomes, the strength of the management bench built beneath the role, and a clean record on the compliance interface.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities, escalation obligations and authority limits set out in it, including the limits on compliance decisions.
