Job Description: Compliance Head

Compliance function · Department head · Reports to the Chief Compliance Officer

Designation	Compliance Head
Department	Compliance
Reporting To	Chief Compliance Officer – sole reporting line
Direct Reports	Head Internal Compliance and Head External Compliance, and through them the Internal and External Compliance Officers
Grade Level	Senior management, department head
Working Hours	8.5 hours, with availability across all three shift timings
Compensation Structure	Fixed only. This role carries no volume-linked or revenue-linked incentive, by design
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Compliance Head runs the Company's compliance function day to day, applying the framework set by the Chief Compliance Officer across three shifts of internal compliance and the external compliance function. **Decisions of this role on approval, onboarding refusal and holds cannot be overruled by the General Manager or by any business function.** Determination of suspicion and statutory filing rest with the Chief Compliance Officer as Principal Officer; this role refers, it does not determine. The compensation of this role carries no variable component tied to volume or revenue.

Role Purpose

The Compliance Head runs the Company's compliance function: applying the policy, the customer risk model and the monitoring parameters set by the Chief Compliance Officer, holding decision quality consistent across shifts, and leading a continuous three-shift internal compliance function and an external compliance function handling banking, law enforcement and regulatory matters.

The role is expected to make the framework work in practice and to tell the Chief Compliance Officer where it does not: where a threshold produces noise, where a procedure is being worked around, or where a shift is under-referring.

Scope and Scale

Dimension	Scale
Team	Head Internal Compliance, Head External Compliance, 3 Internal Compliance Officers, 3 External Compliance Officers, and the KYC Executives and Associates beneath the officers
Coverage	24x7 compliance coverage across three shifts
Statutory	Referral and statutory support to the Chief Compliance Officer as Principal Officer
External	Banks, law enforcement, cyber cells, regulators and retained counsel

Key Accountabilities

1. Referral and Statutory Support

- Ensure every matter that may amount to suspicion reaches the Chief Compliance Officer without delay, whether referred directly by the Head Internal Compliance or through this role, with the file, the evidence and the officers' observations complete.
- **Do not determine suspicion and do not decide against referral.** Both determinations belong to the Chief Compliance Officer as Principal Officer.
- Maintain record retention across the function in the prescribed form and for the prescribed period.
- Ensure no person inside the Company is informed that a matter has been referred or may be reported, other than as the framework permits.
- Prepare the information required for statutory filings and regulatory correspondence, for the Chief Compliance Officer's review and submission.

2. Application of the Framework

- Apply the AML and CFT policy, the KYC policy and the customer risk categorisation framework approved by the Chief Compliance Officer, consistently across all three shifts.
- Apply the monitoring parameters, thresholds and scenarios set by the Chief Compliance Officer, and propose tuning on evidence rather than on complaint volume.
- Apply the value threshold below which a KYC Associate may clear a standard-risk file independently, and report where loss or alert experience suggests it should move.
- Run the enhanced due diligence procedure and the periodic review and ReKYC calendar for each risk category.
- Run the sanctions, politically exposed person and adverse media screening process, including periodic rescreening of the existing client base.

3. Internal Compliance Oversight

- Lead the Head Internal Compliance, and through that role ensure continuous, consistent compliance coverage across all three shifts.
- Ensure decisions on the same facts do not differ between shifts, and hold the Head Internal Compliance to calibrating the officers and correcting variance.
- Decide every matter referred by the Head Internal Compliance that falls within this role's authority, and record the basis for each decision.
- Monitor alert volumes, referral rates and clearance patterns for signs that the function is under commercial pressure or is under-reporting.

4. External Compliance Oversight

- Lead the Head External Compliance, and through that role the External Compliance Officers, on liens, account restrictions, fund recovery, law enforcement correspondence and regulatory queries.
- Approve any submission or response that takes a new position with an external authority, and any admission, undertaking or proposed settlement. Submissions within an established position are approved by the Head External Compliance.
- Track the Company's external exposure: value under restriction, open notices, matters with counsel, and the ageing of each.
- Identify the internal practice behind recurring external exposure and drive its correction, rather than defending the same pattern repeatedly.

5. Independence and Escalation

- Refuse onboarding or hold an account where the framework requires it, without seeking business approval, and refer any freeze or exit to the Chief Compliance Officer.
- Report to the Chief Compliance Officer any instance of a business function seeking to override, delay or work around a compliance decision, or to withhold an observation.
- Advise the business on the compliance implications of any new product, platform, counterparty or channel before launch, not after.
- Ensure every employee has a route to report a suspicion that cannot be closed by their line manager.

6. Training, Testing and Assurance

- Train all client-facing and operations staff on AML obligations and red flags, and maintain training records as a compliance artefact.
- Run the internal compliance testing programme approved by the Chief Compliance Officer, report findings to that role with a remediation plan and dates, and close each finding on evidence.
- Ensure no Associate handles client accounts or live volume without current compliance certification.
- Support statutory audit and any external review with records and reconciliations.

7. Function Leadership and Reporting

- Plan capacity and rostering with HR so that every shift carries compliance cover to minimum viable strength.
- Set the KPI framework for the function, ensuring no measure rewards throughput or clearance rate.
- Own retention and succession within the function, and maintain a named successor for both Heads and for each officer position.
- Deliver the compliance reporting pack to the Chief Compliance Officer on a fixed schedule: alerts, referrals, decisions, external exposure, testing findings and training coverage.

Authority and Limits

- **Decides, and cannot be overruled by the General Manager or any business function:** approval or rejection of files referred by the Head Internal Compliance; holds on onboarding and accounts pending review; risk categorisation within the framework.
- **Refers to the Chief Compliance Officer:** any matter that may amount to suspicion; any account freeze or client exit; any proposed change to policy, thresholds or monitoring parameters; any submission taking a new position with an authority.
- **Holds no authority** to determine suspicion, to make or decide against a statutory filing, or to amend the policy, thresholds or monitoring parameters.
- **Escalates to the Chief Compliance Officer immediately:** any regulatory notice or inspection; any pressure within the Company to override a compliance decision; any matter touching the personal liability of a director or officer.

Key Performance Indicators

Measure	Standard
Suspicion referrals to the Chief Compliance Officer within the set time	100%
Referrals determined within internal service level	Above ____%
Client risk categorisation and periodic review currency	100% of the active base
Staff AML training coverage	100%, refreshed annually
Internal testing findings closed by agreed date	Above ____%
Decision consistency across shifts on comparable facts	Variance below ____%
External exposure: value under restriction	Reducing quarter on quarter
Instances of a compliance decision being overridden	Zero

This role is assessed on compliance outcomes only. No measure is linked to business volume, revenue, onboarding throughput or clearance rate, and none may be introduced. Targets marked ____ are set by the Chief Compliance Officer.

Qualifications and Experience

Essential

- Bachelor's degree; a law, finance or management postgraduate qualification preferred.
- Seven years or more in AML and KYC compliance at a bank, non-banking financial company, payment institution or regulated exchange, including at least three leading a compliance function.
- Working command of the money laundering prevention framework, reporting obligations, and KYC master direction principles.
- Demonstrated independence: has declined business on compliance grounds and can describe the circumstances and the outcome.
- Precise written English suitable for regulatory correspondence and filings.
- Experience leading a continuous shift-based function.

Preferred

- Virtual digital asset or reporting-entity experience.
- CAMS or equivalent certification.
- Experience of a regulatory inspection or audit from the compliance side.
- Experience designing a transaction monitoring rule set and tuning it on outcomes.

Competencies

Core

- Independence of judgement under commercial pressure.
- Documents the reasoning at the time of the decision, not afterwards.
- Personal integrity of a standard that survives external scrutiny.

Functional

- Policy and framework design.
- Referral preparation and regulatory drafting.

- Monitoring rule design and tuning.
- Regulatory relationship management.

Leadership

- Calibrating a decision function so outcomes do not vary by shift or by officer.
- Building a team willing to raise concerns rather than clear files.
- Holding a position with the business without escalation becoming personal.

Notes for HR and Management

The Principal Officer designation sits with the Chief Compliance Officer. This role carried it until a Chief Compliance Officer was appointed. The designation belongs with the person who determines suspicion; this role runs the function that surfaces suspicion and refers it upward. That separation should be visible in the Company's filed particulars.

The fixed-only compensation structure is deliberate and should not be varied. A variable component on this role, however small and however it is framed, gives the person who can stop a transaction a financial interest in not stopping it. Recognition for this role should be through fixed compensation review, not through an incentive.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and statutory obligations set out in it, including the obligation to escalate directly to the Board where the framework requires it.
