Job Description: General Manager

Executive · Reports to the Chief Executive Officer

Designation	General Manager
Department	Executive
Reporting To	Chief Executive Officer – sole reporting line
Direct Reports	Chief Compliance Officer, Chief Financial Officer, Operations Head, Client Relationship Head, Marketing Head, Head of Liquidity & Settlements, HR Manager, Quality Control Manager
Portfolio	All functions, until the position divides into portfolio General Managers, each holding two functions (for example Finance and Compliance; Operations and HR; Sales and Marketing)
Workforce	50+ across all functions and three shifts
Grade Level	Executive
Working Hours	8.5 hours, with availability across all three shift timings as operational needs require
Employment Type	Full-time
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The General Manager runs the Company's functions day to day so that the Chief Executive Officer can lead the business and the Board can operate on strategy, capital and regulatory relationships rather than execution. Within its portfolio, and subject to the Chief Executive Officer, the role is the final internal authority on operational, commercial, people and administrative matters. **It is not the final authority on compliance.** Decisions of the Chief Compliance Officer on suspicion, onboarding refusal, account exit and statutory filing cannot be overruled by this role; where the General Manager disagrees, the matter goes to the Board.

About the Company

Blynk Virtual Technologies Private Limited operates a virtual digital asset and P2P services business, spanning trading operations, payment operations, KYC and compliance, client relationship management, finance, quality control and technology. The business runs continuously across three shifts and carries obligations as a reporting entity under the money laundering prevention framework. The General Manager is expected to build structure and system rather than administer what exists.

Key Responsibilities

1. Business Leadership

- Lead overall business operations across all shifts and functions, ensuring service delivery targets and quality standards are consistently met.

- Act as the principal point of contact between the Chief Executive Officer and the operating functions, and translate the Chief Executive Officer's plan into executable plans with named owners and dates.
- Own the operating rhythm: departmental reviews, exception escalation and a single consolidated report to the Chief Executive Officer.
- Drive innovation in service delivery, process design and technology adoption to improve efficiency and margin.

2. Policy, Process and Internal Control

- Design, review and implement Company policies, standard operating procedures and internal controls across operations, payment operations, client relations, finance, human resources and administration.
- Ensure that a control removed or amended in one function is assessed for its effect on the controls held by another. Several of the Company's controls exist only because two functions hold opposite sides of them.
- Ensure every process change is documented before it goes live.
- Act on Quality Control findings and ensure corrective actions are closed on evidence rather than on assurance.

3. Commercial and Financial Ownership

- Own the profit and loss against budget and explain every material variance to the Chief Executive Officer in writing.
- Own budgeting, cost control, MIS reporting and the performance dashboards presented to the Chief Executive Officer and the Board.
- Approve the pricing and concession matrices within which Operations and Client Relations work.
- Ensure management reporting reconciles to the books before it reaches the Board.

4. External Representation

- Represent the Company before government departments, labour and corporate authorities, and ensure timely filings, licences, registrations and renewals in those areas.
- Manage relationships with clients, partners, vendors, banking partners and other external stakeholders at the executive level.
- **Banking liens, law enforcement correspondence, cyber cell matters and regulatory queries on transactions are held by the External Compliance Officer under the Compliance Head.** The General Manager is briefed and supports; the General Manager does not correspond separately with the same authority on the same matter.

5. Statutory and Regulatory Compliance

- Ensure full compliance with applicable labour, corporate and industry regulations, including the Madhya Pradesh Shops and Establishments Act, the Code on Wages 2019 and other applicable statutes.
- Ensure the Company's obligations as a reporting entity are resourced and supported, and that the Chief Compliance Officer has the staffing, systems and access required to discharge them.
- Ensure no business function directs, pressures or works around the compliance function, and report any instance to the Board.
- Ensure the Company can survive an audit or inspection on any given day without preparation.

6. People and Organisation

- Lead, mentor and hold accountable a workforce of 50 or more across functions, including heads, managers and team leaders.

- Drive workforce planning, capability building and succession within the management layer, and maintain a named successor for every direct report position.
- Handle escalations, disciplinary matters and grievance resolution at the final internal level, other than compliance determinations and grievances requiring Board involvement.
- Ensure shift equity: the night shift must not become a posting of last resort in any function.

Authority and Limits

- **Approves:** operating expenditure up to ____ per transaction; hiring within approved headcount; policies, SOPs and process changes; pricing and concession matrices; client credit and commercial terms within Board-approved parameters; disciplinary action up to and including a final warning.
- **Requires Chief Executive Officer approval, and Board approval where reserved:** capital expenditure; headcount expansion beyond plan; any banking relationship change; salary revisions and terminations; engagement of external counsel; any settlement; any new product, platform or channel.
- **Holds no authority to overrule** a compliance determination, an onboarding refusal, an account exit, or the content or timing of a statutory filing. Disagreement is raised with the Board.
- **Holds no authority** to instruct any employee to bypass maker-checker on payments, to release an order without a recorded funding confirmation, or to clear a KYC file.
- **Escalates to the Chief Executive Officer:** any regulatory notice or inspection; any suspected internal fraud; any material loss.
- **Escalates to the Board directly:** any matter touching director liability; any attempt within the Company to override a compliance decision, including by the Chief Executive Officer.

Key Performance Indicators

Measure	Standard
Net operating margin against budget	____% of plan
Composite departmental scorecard achievement	Above ____%
Statutory and regulatory filings on time	100%. No exceptions
Reporting to the Chief Executive Officer on schedule and reconciled to the books	100%
Repeat incidents from a closed corrective action	Zero
Voluntary attrition of confirmed employees	Below ____%
Succession cover for every direct report position	100%
Instances of a compliance decision being overridden	Zero

Statutory timeliness and compliance independence act as gates. A late statutory filing, or any confirmed instance of a compliance decision being overridden within the Company, caps the grade for the period regardless of commercial performance. Targets marked ____ are set by the Chief Executive Officer.

Qualifications and Experience

Essential

- Bachelor's degree and a Master's degree; MBA, LLM, M.Com or equivalent preferred.
- Ten years or more of total professional experience, with five or more in a senior management role.

- Proven experience managing a workforce of at least 50 in a supervisory or managerial capacity, through subordinate managers.
- Domain experience in at least one of: legal and statutory compliance, senior-level operations management, or banking and finance.
- Demonstrated profit and loss accountability.
- Excellent written and verbal communication in English and Hindi.

Preferred

- Experience in a regulated financial services, fintech, payments or virtual digital asset business.
- Experience preparing an organisation for external audit or regulatory inspection.
- Experience running a continuous multi-shift operation.

Competencies

- Strong command of statutory and regulatory frameworks, with the confidence to deal directly with government agencies.
- Sound commercial judgement and comfort with budgets, MIS and financial reporting.
- Builds systems and policy from the ground up rather than only administering existing ones.
- Supports a compliance refusal in front of the business rather than seeking a way around it.
- High personal integrity, sound decision-making under pressure, and complete ownership.
- Willingness to be available across shift timings as operational needs require.

Notes for HR and Management

Two changes from the earlier draft of this description, both deliberate. First, grievance and escalation authority at the final internal level now expressly excludes compliance determinations. A General Manager who can be the last word on a compliance matter makes the Chief Compliance Officer's independence unenforceable, and that independence is what every control in the compliance and KYC descriptions rests on. Second, representation before authorities has been split: labour, corporate and statutory matters sit with this role, while banking liens, law enforcement and transaction-related regulatory queries sit with the External Compliance Officer. Without the split, two functions correspond separately with the same authority on the same matter.

This position is expected to divide as the Company scales. Each portfolio General Manager will hold two functions and a description of its own, all reporting to the Chief Executive Officer. Two pairings should be avoided when that happens. Compliance must never sit under the same General Manager as a function it constrains, such as Operations, Payment Operations, Client Relations or Marketing. Quality Control, which reviews several functions, should then report to the Chief Executive Officer rather than to any one General Manager.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities, escalation obligations and authority limits set out in it, including the limits on compliance determinations.
