

Job Description Compendium

Blynk Virtual Technologies Private Limited

Forty-one role descriptions across the Board, Executive, Operations, Compliance,
Client Relations, Marketing, Liquidity and Settlements, Finance and Accounts,
Human Resources, Quality Control and Support Staff

Document reference	BVT/HR/JD/2026/COMP-01
Version	4.2 (Draft for approval)
Date of issue	03 September 2026
Classification	Private and Confidential — internal use
Document owner	Human Resources
Approving authority	General Manager and the Board
Review cycle	Half-yearly, or on any change to the reporting structure
Total pages	182

This compendium contains role descriptions only. It does not form part of any contract of employment. Each description is issued individually and signed by the employee and the approving manager.

How to Use This Compendium

Two versions of every description

Each description is written once and serves two purposes. Used complete, it is the internal role charter: the document the employee signs and against which performance and conduct are assessed. For an external job posting, remove the Authority and Limits section, the Key Performance Indicators table and the Notes for HR and Management, then add compensation and joining terms.

Placeholders

Every occurrence of ____ marks a value the Company must set: a performance target, a value threshold, an approval limit or a service level. These have deliberately not been invented. Each should be set in the relevant departmental KPI scorecard rather than fixed in the description, so that targets can be retuned each quarter without reissuing and re-signing documents.

Gates

Several descriptions carry a gate: a measure that caps the performance grade for a period regardless of achievement on every other measure. Gates exist where a single failure costs more than a quarter of good performance earns. They are marked beneath each Key Performance Indicators table and should be reflected in the incentive structure.

Before issuing

- Reconcile each Key Performance Indicators table against the departmental scorecard. A measure in a description that the scorecard ignores trains people to ignore it.
- Align the position titles in the HR system to the designations used here. Where the system and the description disagree, the appointment letter, the job description and the personnel record will each say something different.
- Have each department head sign their own description and those of their team. An unsigned description is unenforceable in a performance or disciplinary conversation.
- Set a review date. Descriptions drift within two quarters in a business changing at this rate.

Date: 03 September 2026

Organisation Structure

Reporting lines as at the date of issue

Every description in this compendium states a single reporting line. Where a role coordinates with another function, that coordination is stated separately and expressly does not create a reporting relationship in either direction. The General Manager position is expected to divide into portfolio General Managers as the Company scales.

Ref: BVT/HR/JD/2026/COMP-01

Date: 03 September 2026

Grade Structure

A common three-tier ladder across the operating functions

Every operating function uses the same three grades beneath its manager or officer. An Associate does the work. An Executive supervises the desk, checks the work and routes escalations upward without filtering them. The manager or officer decides. The same title carries the same weight in every function.

Function	Associate	Executive	Manager / Officer
Operations	Operations Associate	Operations Executive	Operations Manager
Compliance (KYC)	KYC Associate	KYC Executive	Internal Compliance Officer
Client Relations	Relationship Associate	Relationship Executive	Relationship Manager
Liquidity and Settlements	Payment Operations Associate	Payment Operations Executive	Settlement Operations Manager
Accounts	Accounts Associate	Accounts Executive	Accounts Manager
Human Resources	HR Associate	HR Executive	HR Manager

Above this ladder sit the heads of function, the General Manager, the Chief Executive Officer and the Managing Director. Support staff report to the HR Manager.

Control Principles Applied Across These Descriptions

The descriptions are not independent documents. They interlock, and several controls only work because two or more roles are written to hold opposite sides of them. Changing one description in isolation can remove a control that appears in another.

1. Verification and release are held by different functions

Payment Operations verifies funds against the bank record and issues a recorded funding confirmation. Operations releases the asset against that record. Neither does both. In a P2P business almost every large loss traces to an asset released before funds were confirmed, under pressure from a credible-sounding counterparty. The same separation applies to the Company's own positions: Liquidity and Settlements moves money, and Operations moves digital assets.

2. Paying and reconciling are held by different functions

Payment Operations moves money. Accounts reconciles it. No one in Finance or Accounts holds a payment credential. A reconciliation performed by the person who made the payment detects nothing.

3. Compliance cannot be directed by the functions it constrains

The KYC Associate, KYC Executive, Internal Compliance Officer, Compliance Head and Chief Compliance Officer take no instruction on a compliance matter from Operations, Payment Operations, Client Relations or Marketing. Determinations cannot be overruled by the General Manager; disagreement routes to the Board. The Chief Compliance Officer carries no volume-linked or revenue-linked incentive.

4. No control role is scored on throughput

No performance measure for the KYC, compliance or Quality Control roles is linked to order volume, transaction value, clearance rate or findings raised. A gate rewarded for opening stops being a gate.

5. Escalation is treated as correct behaviour

Across the associate-level descriptions, uncertainty is stated as a ground to escalate, red-flag reporting is measured for coverage rather than penalised, and an error reported immediately is treated as a recoverable operational event while one concealed is a conduct matter. Supervisory descriptions carry the corresponding duty to support anyone who held a release or raised a concern under pressure.

6. Intermediate layers route, they do not filter

The Executive grade in Operations, KYC, Client Relations and Payment Operations sits between the person who spots something and the person who decides. Each description states expressly that referrals and observations pass upward unaltered, and each carries that obligation as a gate on its scorecard. Where the compliance chain runs deepest, the Head Internal Compliance refers suspicion to the Chief Compliance Officer directly, so an added layer never adds a step to suspicion referral.

7. Quality Control reports outside every function it reviews

Quality Control reviews Operations, Payment Operations, KYC and Client Relations and reports to the General Manager. It owns the Error Evaluation Report process, and because that process gates pay, the reviewed employee has a right to respond before a finding is confirmed and a route to contest a confirmed one.

8. Public claims require clearance before publication

Marketing obtains compliance clearance for any claim about services, pricing, regulatory standing or performance, publishes no representation about returns or investment outcome, and holds the approval and substantiation for every published item.

9. Analysis and record are held by different people

The Finance Manager analyses the books; the Accounts Manager keeps them. Both report to the Chief Financial Officer. A management figure is therefore always tested against books its author did not keep.

10. The system enforces what the descriptions say

The Chief Technology Officer mirrors every authority limit in role-based access, records the funding confirmation as a system event that release depends on, and makes posted entries immutable. Privileged access to production data is logged and reviewed outside Technology, because whoever can change production data can rewrite the record every other control depends on.

11. Board authority is collective

No individual director, including the Managing Director, may direct a compliance determination or instruct an employee to bypass a control. The Designated Director discharges that responsibility by resourcing and protecting the compliance function, never by directing it. Net-banking administration is authorised by two signatories and never combined with a payment right.

Contents

A. Board of Directors

Designation	Reference	Reports to	Page
Managing Director	BVT/HR/JD/2026/033	Board of Directors	12

Office Assistant	BVT/HR/JD/2026/027	HR Manager	175
Office Help	BVT/HR/JD/2026/039	HR Manager	178
Security Guard	BVT/HR/JD/2026/028	HR Manager	180

Open Items for Management Decision

Recorded here so that they are visible rather than assumed.

Changes in this version

- Payment Operations restructured as Liquidity and Settlements: the Manager, Payment Operations becomes the Head of Liquidity & Settlements with fiat liquidity added; a Settlement Operations Manager is added; the Payment Executive and Payment Associate become the Payment Operations Executive and Associate.
- Head Internal Compliance and Head External Compliance added beneath the Compliance Head, each leading multiple officers. The Head Internal Compliance refers suspicion to the Chief Compliance Officer directly.
- Board role charters added for the Managing Director, Deputy Managing Director and Director.
- Chief Executive Officer added above the General Manager. Chief Technology Officer added beneath the Chief Executive Officer.
- Banking Officer added beneath the Finance Manager. Bank relationships moved from the External Compliance Officer, who keeps liens, freezes and law-enforcement matters.
- Office Help added as a housekeeping role, separate from the Office Assistant.
- Version 3.0 introduced the Associate, Executive and Manager grade ladder, the Accounts ladder, the division of Finance under the Chief Financial Officer, and the Chief Compliance Officer.

Board resolutions required

- **Designated Director and Principal Officer.** Record by resolution that the Managing Director, or a whole-time director, is the Designated Director and that the Chief Compliance Officer is the Principal Officer, and communicate both to the Financial Intelligence Unit. A non-executive director cannot hold the Designated Director position.
- **Deputy Managing Director delegation.** Record what the Deputy Managing Director may do in the Managing Director's absence, and for how long.
- **Director portfolios.** Record each non-executive director's oversight portfolio, and that it confers no executive authority.

Design constraints for when the General Manager divides

- **Compliance must not be paired with a function it constrains.** A General Manager holding Finance and Compliance is sound; one holding Operations, Liquidity and Settlements, Client Relations or Marketing together with Compliance would place the gate and the volume under the same person.
- **Quality Control should move to the Chief Executive Officer.** It reviews several functions and must sit outside all of them, which no single portfolio General Manager can provide.

Roles not yet documented

- **Technology team.** The Chief Technology Officer is described; the developer, support and infrastructure roles beneath it are not.
- **Operations desk roles.** Purchase Executive and Sales Executive exist in the HR system without descriptions. If they handle live orders they require the pricing band and release rules that apply to the Operations Associate.

- **Compliance support roles.** Compliance Filing Executive and Field Compliance Officer overlap the External Compliance Officer. Scope the boundary or fold them into that role.

HR system alignment

- **Rename:** Operator to Operations Associate; Team Lead to Operations Executive; Payment Head to Head of Liquidity & Settlements; Office Boy to Office Assistant; Gaurd to Security Guard. Split Relationship / Marketing Head into Client Relationship Head and Marketing Head.
- **Likely equivalents to confirm and retire:** Junior Accountant, Data Entry and Operator / Data Entry to Accounts Associate; Finance Head – Operations and Finance Head – Taxation and Banking to Finance Manager and Accounts Manager; Assistant Manager, Operations to Operations Executive.
- **Deactivate:** Payment Handler, System Operator and System operator (merged). Payment Processor appears to duplicate Payment Operations Associate.

Values still to be set

- The value threshold for delegated KYC clearance, and the checker thresholds for release and payout. None are set.
- The pricing band each Operations Associate must price within, and the mechanism for publishing it each shift.
- HR access for evening and night staff, since Human Resources works the general shift.
- Handover time: rostering the supervisory half hour at the end of each shift covers the written handover without unpaid time.

Role Charter: Managing Director

Board of Directors · Executive director · Key Managerial Personnel

Designation	Managing Director (MD)
Board Position	Executive director entrusted with substantial powers of management
Accountable To	Board of Directors , and through the Board to the members of the Company
Direct Reports	Chief Executive Officer; Deputy Managing Director
Statutory Designations	Key Managerial Personnel under the Companies Act, 2013. Designated Director under the Prevention of Money Laundering framework, where so designated by the Board
Appointment	By Board resolution, in accordance with the Articles of Association and the Companies Act, 2013
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Managing Director is the Board's executive: accountable for the direction and conduct of the Company as a whole. As Designated Director, the role carries personal responsibility for ensuring the Company meets its obligations as a reporting entity. **That responsibility is discharged by resourcing, protecting and overseeing the compliance function, never by directing its determinations.** No individual director, including the Managing Director, may instruct the Chief Compliance Officer on a suspicion determination or a statutory filing. Disagreement is taken to the Board acting collectively.

Role Purpose

The Managing Director sets the Company's direction with the Board, appoints and holds to account the executive that delivers it, represents the Company at the highest level, and ensures the Company is governed, compliant and solvent. The role owns what the Company is trying to become; the Chief Executive Officer owns how the business gets there.

Division of Responsibility at the Top

Area	Managing Director	Chief Executive Officer	General Manager
Strategy	Sets direction with the Board	Turns it into plans and targets	Delivers it operationally
Performance	Holds the CEO to account	Holds heads and CXOs to account	Holds managers to account
Compliance	Designated Director: resources and oversees	Supports; cannot direct determinations	Supports; cannot override
External	Board, members, regulators, bankers, investors	Clients, partners, the market	Labour and statutory authorities
Capital	Recommends to the Board	Proposes and justifies	Manages within budget

Key Accountabilities

1. Direction and Strategy

- Set the Company's strategic direction with the Board, including the lines of business it pursues and those it declines.
- Approve the annual plan and budget proposed by the Chief Executive Officer for recommendation to the Board.
- Decide, with the Board, on capital, funding, restructuring and any material new product, platform or market.
- Ensure the Company's risk appetite is stated, understood by the executive, and reflected in how it operates.

2. Leadership of the Executive

- Appoint, direct and evaluate the Chief Executive Officer, and approve the appointment of the heads reporting to that role.
- Hold the executive to account through a fixed reporting cycle: performance, risk, compliance posture, people and capital.
- Approve the Performance Linked Incentive outcomes recommended by the Management, as the approving authority.
- Ensure succession exists for the Chief Executive Officer and for every executive position.

3. Designated Director Obligations

- Ensure overall compliance with the Company's obligations as a reporting entity under the money laundering prevention framework.
- Ensure the Chief Compliance Officer has the independence, staffing, systems, access and budget required, and review that sufficiency at least annually.
- Receive the compliance position from the Chief Compliance Officer on a fixed schedule and take any matter of concern to the Board.
- Ensure the particulars of the Designated Director and the Principal Officer are communicated to the Financial Intelligence Unit and kept current.
- Never seek to influence, delay or reverse a suspicion determination or a statutory filing, and never inform any person that a report has been or may be made.

4. Governance

- Ensure the Board meets as required, receives complete and timely papers, and records its decisions in minutes that reflect the discussion.
- Ensure matters reserved to the Board are brought to it and are not decided elsewhere.
- Ensure statutory filings, registers and returns under the Companies Act, 2013 are maintained and made on time.
- Sign documents on the Company's behalf only within the authority recorded by the Board.

5. External Representation

- Represent the Company before regulators, bankers, investors and counsel at the highest level.
- Hold the relationships that underpin the Company's standing: banking partners, key platforms and principal advisors.
- Speak for the Company publicly only on matters approved by the Board, and never on a matter under compliance review.

6. Statutory Duties as a Director

- Act in accordance with the Articles of Association, and in good faith to promote the objects of the Company for the benefit of its members as a whole, its employees and the community, as Section 166 of the Companies Act, 2013 requires.
- Exercise duties with due and reasonable care, skill and diligence, and with independent judgement.
- Avoid any situation in which a direct or indirect interest conflicts, or may conflict, with the interest of the Company.
- Disclose any concern or interest in other entities at the first Board meeting of each financial year and whenever it changes, as Section 184 requires, and take no part in any matter in which that interest arises.
- Achieve and attempt to achieve no undue gain or advantage for oneself, relatives, partners or associates.
- Maintain the Director Identification Number and director KYC in current standing, and inform the Company at once of any event that could give rise to disqualification under Section 164.
- Keep confidential all Board papers, deliberations and information received as a director, including after leaving office.

Authority and Limits

- **Exercises:** the powers of management entrusted by the Articles and by Board resolution, within the limits the Board has recorded.
- **Requires Board approval:** matters reserved to the Board, including capital, borrowing, investment, restructuring, related-party transactions, appointment of key managerial personnel and any change to the Company's registration status.
- **Holds no authority** to direct a compliance determination, override a KYC decision, release an order, execute a payment, or instruct any employee to bypass a control. The controls in the Company's descriptions bind this role equally.
- **Escalates to the Board:** any regulatory notice or inspection; any material loss; any suspected internal fraud; any matter touching the personal liability of a director.

Board Evaluation Criteria

Criterion	Standard
Delivery of the Board-approved plan	Assessed annually by the Board
Statutory and regulatory filings made on time	100%
Compliance function resourced as assessed by the Chief Compliance Officer	No unresolved shortfall
Instances of a compliance determination being overridden	Zero
Succession cover for every executive position	100%
Board papers and minutes complete and on time	100%

Eligibility

- Holds a Director Identification Number and current director KYC.
- Not disqualified under Section 164 of the Companies Act, 2013.
- Meets any conditions of appointment for a managing director applicable to the Company.

- Demonstrated leadership of a business with regulatory obligations, and the standing to represent it before regulators and bankers.

Notes for the Board

The Designated Director carries personal exposure. Under the money laundering prevention framework, the authority may act against a reporting entity's designated director for failure to comply. The designation is therefore not ceremonial. It must be held by the Managing Director or a whole-time director authorised by the Board, and it cannot be held by a non-executive director who only attends meetings. The Board should record which director holds it.

Managing Director and Chief Executive Officer overlap unless the split is kept. Where both positions exist, the Managing Director owns direction, governance and the Board relationship, and the Chief Executive Officer owns the running of the business. If one person holds both, this description and the Chief Executive Officer description should be read together as a single role.

This description defines the scope of a Board position. It does not replace the Articles of Association, the Companies Act, 2013, or the Board resolution by which the appointment is made, each of which prevails over this document where they differ.

Acknowledgement

I have read and understood this role charter and accept the accountabilities and statutory duties set out in it, including those attaching to the Designated Director designation.

Name	_____	Designation	_____
Signature	_____	Date	_____
Approved by (Board resolution dated)	_____	Date	_____
Recorded by (HR)	_____	Date	_____

Ref: BVT/HR/JD/2026/034

Date: 03 September 2026

Role Charter: Deputy Managing Director

Board of Directors · Whole-time director

Designation	Deputy Managing Director (DMD)
Board Position	Whole-time director
Reporting To	Managing Director ; accountable to the Board of Directors
Portfolio	As assigned by Board resolution: ____
Statutory Designations	Designated Director under the Prevention of Money Laundering framework, only where the Board designates this role instead of the Managing Director
Appointment	By Board resolution, in accordance with the Articles of Association and the Companies Act, 2013
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Deputy Managing Director holds the portfolios the Board assigns and deputises for the Managing Director when the Managing Director is unavailable. **Authority to act for the Managing Director exists only within a delegation recorded by the Board**, and only while it is in force. The two roles never exercise the Managing Director's authority at the same time on the same matter.

Role Purpose

The Deputy Managing Director gives the Company continuity at the top and depth across the portfolios assigned to it. The role leads those portfolios at director level, prepares to step into the Managing Director's position if required, and carries the same compliance and governance obligations as every other director.

Key Accountabilities

1. Deputising for the Managing Director

- Act for the Managing Director during absence or unavailability, within the scope and period of the recorded delegation.
- Record every decision taken while deputising and brief the Managing Director on return.
- Refer to the Board, rather than decide, any matter outside the delegation or any matter the Managing Director has reserved.
- Ensure third parties, including banks, are shown the recorded delegation before relying on the role's authority.

2. Portfolio Leadership

- Lead the assigned portfolios at director level: direction, oversight of the responsible heads, and reporting to the Board.
- Review portfolio performance, risk and compliance posture on a fixed cycle and raise concerns in the Board forum.

- Work through the Chief Executive Officer and the responsible head. Do not bypass the executive line to instruct employees below it.

3. Designated Director, Where Designated

- Where the Board designates this role as Designated Director, discharge the obligations set out in the Managing Director role charter in full.
- Where not so designated, support the Designated Director and the Chief Compliance Officer, and never seek to influence a compliance determination.

4. Statutory Duties as a Director

- Act in accordance with the Articles of Association, and in good faith to promote the objects of the Company for the benefit of its members as a whole, its employees and the community, as Section 166 of the Companies Act, 2013 requires.
- Exercise duties with due and reasonable care, skill and diligence, and with independent judgement.
- Avoid any situation in which a direct or indirect interest conflicts, or may conflict, with the interest of the Company.
- Disclose any concern or interest in other entities at the first Board meeting of each financial year and whenever it changes, as Section 184 requires, and take no part in any matter in which that interest arises.
- Achieve and attempt to achieve no undue gain or advantage for oneself, relatives, partners or associates.
- Maintain the Director Identification Number and director KYC in current standing, and inform the Company at once of any event that could give rise to disqualification under Section 164.
- Keep confidential all Board papers, deliberations and information received as a director, including after leaving office.

Authority and Limits

- **Exercises:** the powers of management assigned by Board resolution for the portfolio, and the Managing Director's powers only within a recorded delegation.
- **Requires Board approval:** matters reserved to the Board, and any matter outside the portfolio or the delegation.
- **Holds no authority** to direct a compliance determination, release an order, execute a payment, or instruct any employee to bypass a control.
- **Escalates to the Managing Director and the Board:** any regulatory notice, material loss or suspected internal fraud arising in the portfolio.

Board Evaluation Criteria

Criterion	Standard
Portfolio delivery against the Board-approved plan	Assessed annually by the Board
Decisions while deputising recorded and briefed	100%
Actions taken outside the recorded delegation	Zero
Instances of a compliance determination being overridden	Zero
Disclosures of interest made on time	100%

Eligibility

- Holds a Director Identification Number and current director KYC.
- Not disqualified under Section 164 of the Companies Act, 2013.
- Senior leadership experience relevant to the assigned portfolio.

Note for the Board

Record the delegation, or it does not exist. A deputy whose authority is informal creates two risks: a bank or counterparty refuses to act on it at the moment it is needed, or two directors act on the same matter with different instructions. A standing Board resolution stating what the Deputy Managing Director may do in the Managing Director's absence, and for how long, prevents both.

This description defines the scope of a Board position. It does not replace the Articles of Association, the Companies Act, 2013, or the Board resolution by which the appointment is made, each of which prevails over this document where they differ.

Acknowledgement

I have read and understood this role charter and accept the accountabilities and statutory duties set out in it, including the limits of the recorded delegation.

Name	_____	Designation	_____
Signature	_____	Date	_____

Ref: BVT/HR/JD/2026/035

Date: 03 September 2026

Role Charter: Director

Board of Directors · Non-executive, with portfolio oversight

Designation	Director – ____ (for example Director – Finance, Director – Sales)
Board Position	Non-executive director
Accountable To	Board of Directors , acting collectively. No reporting line into management
Portfolio	As assigned by Board resolution, for oversight at Board level only
Time Commitment	Board meetings as convened, preparation, and portfolio reviews
Appointment	By the members or the Board, in accordance with the Articles of Association and the Companies Act, 2013
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Director participates in the governance of the Company through the Board. **The role holds no executive authority.** The portfolio title describes what the Director oversees at Board level; it does not confer the power to manage that area, instruct its employees, sign for the Company, or commit it to a third party. Requests for information or action go through the Managing Director or the Chief Executive Officer.

Role Purpose

The Director brings judgement and challenge to the Board's decisions, and gives the assigned portfolio the attention of a Board member who has read its reports closely and asks the questions the executive may not ask itself.

Key Accountabilities

1. Board Participation

- Attend Board meetings, having read the papers in advance, and contribute to discussion and decision.
- Ask the question that has not been asked, particularly where a proposal carries regulatory, financial or reputational risk.
- Ensure that dissent, where held, is recorded in the minutes rather than withdrawn to reach consensus.
- Review the minutes before approval and confirm they reflect what was decided and why.

2. Portfolio Oversight

- Review the reporting for the assigned portfolio on the Board's cycle: performance, risk, controls and open issues.
- Raise concerns about the portfolio in the Board forum, through the Managing Director or the Chief Executive Officer, and record them.
- Do not direct, instruct or task employees in the portfolio, and do not approve operational matters within it.
- Meet the head of the portfolio only with the knowledge of the Chief Executive Officer, and give no instructions in that meeting.

3. Compliance Culture

- Support the independence of the compliance function in Board discussion.
- Never seek to influence a compliance determination, and never inform any person that a report has been or may be made.
- Report to the Board any concern about the Company's conduct that comes to the Director's attention by any route.

4. Statutory Duties as a Director

- Act in accordance with the Articles of Association, and in good faith to promote the objects of the Company for the benefit of its members as a whole, its employees and the community, as Section 166 of the Companies Act, 2013 requires.
- Exercise duties with due and reasonable care, skill and diligence, and with independent judgement.
- Avoid any situation in which a direct or indirect interest conflicts, or may conflict, with the interest of the Company.
- Disclose any concern or interest in other entities at the first Board meeting of each financial year and whenever it changes, as Section 184 requires, and take no part in any matter in which that interest arises.
- Achieve and attempt to achieve no undue gain or advantage for oneself, relatives, partners or associates.
- Maintain the Director Identification Number and director KYC in current standing, and inform the Company at once of any event that could give rise to disqualification under Section 164.
- Keep confidential all Board papers, deliberations and information received as a director, including after leaving office.

Authority and Limits

- **Decides:** only as a member of the Board, acting collectively. An individual director has no power to bind the Company.
- **Holds no authority** to instruct any employee, approve any transaction, sign any document or make any commitment on the Company's behalf, unless specifically authorised by Board resolution for that act.
- **Holds no authority** to direct or influence a compliance determination, release an order, or execute a payment.
- **Presents the portfolio title** externally only as a Board oversight role, never as a delegation of executive authority.

Board Evaluation Criteria

Criterion	Standard
Attendance at Board meetings	Above ____%
Board papers read before the meeting	Every meeting
Disclosures of interest made on time	100%
Instructions given directly to employees	Zero
Portfolio concerns raised and recorded through the Board	Every concern held

Eligibility

- Holds a Director Identification Number and current director KYC.

- Not disqualified under Section 164 of the Companies Act, 2013.
- Relevant experience for the assigned portfolio, and the independence of mind to challenge the executive.

Notes for the Board

Attending meetings only does not limit liability for a promoter director. The Companies Act, 2013 limits the liability of a non-executive director to matters that occurred with their knowledge through Board processes, with their consent or connivance, or where they did not act diligently. That limitation applies only to non-executive directors who are not promoters or key managerial personnel. A promoter who holds this position carries the full exposure of a director, however limited their involvement, and should read the papers accordingly.

A portfolio title can be mistaken for authority. A bank, platform or counterparty shown a card reading Director – Finance may assume the holder can sign or commit in finance matters. Where no such authority exists, the title should be used internally, or externally only alongside a clear statement of the role.

This role cannot be the Designated Director. That designation must be held by the Managing Director or a whole-time director.

This description defines the scope of a Board position. It does not replace the Articles of Association, the Companies Act, 2013, or the Board resolution by which the appointment is made, each of which prevails over this document where they differ.

Acknowledgement

I have read and understood this role charter and accept the duties and limits set out in it, including that I hold no executive authority and give no instructions to employees.

Job Description: Chief Executive Officer

Executive · Key Managerial Personnel

Designation	Chief Executive Officer (CEO)
Department	Executive
Reporting To	Managing Director – sole reporting line; attends the Board as required
Direct Reports	General Manager (portfolio General Managers as the position divides); Chief Technology Officer
Statutory Designation	Key Managerial Personnel under the Companies Act, 2013, where so designated
Grade Level	Executive
Working Hours	8.5 hours, with availability across all three shift timings
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Chief Executive Officer runs the business: turning the direction set by the Managing Director and the Board into plans, targets and results. **The role carries the Company's commercial performance and therefore holds no authority over compliance determinations.** Where the Chief Executive Officer disagrees with a compliance outcome, the route is to the Board, never to the officer who made it.

Role Purpose

The Chief Executive Officer is accountable for the Company's performance: revenue, margin, growth, client franchise and the operating capability that delivers them. The role leads the executive team, allocates resources across functions, and is the point at which commercial ambition is reconciled with the Company's risk appetite.

Key Accountabilities

1. Business Performance

- Own the Company's revenue, margin and growth against the plan approved by the Board.
- Propose the annual plan and budget to the Managing Director, with the assumptions and the downside case stated.
- Allocate capital, headcount and technology investment across functions against the plan.
- Report performance to the Managing Director and the Board on a fixed cycle, including the numbers that are unfavourable.

2. Strategy Execution

- Turn the Board's direction into executable plans with named owners, dates and measures.
- Decide on new products, platforms, channels and markets within the authority delegated, and bring the rest to the Board.

- Require every proposal to state the compliance, operational and technology implications before it is approved, not after.

3. Leadership of the Executive

- Lead the General Manager and the Chief Technology Officer, and through them the operating functions and the technology function.
- Hold the executive to account on a fixed cycle, and approve the scorecards on which their performance is judged.
- Build succession for every executive position and a management bench that does not depend on individuals.

4. Control Environment

- Ensure the controls written into the Company's role descriptions operate in practice, not only on paper: verification separate from release, paying separate from reconciling, compliance independent of the business.
- Ensure no target set by this role or beneath it rewards throughput at the expense of those controls.
- Act on Quality Control findings and require corrective action to close on evidence.
- Support a compliance refusal in front of the business, including when it costs a client or a target.

5. External Relationships

- Hold the Company's commercial relationships at executive level: key clients, platforms, partners and vendors.
- Represent the Company in the market within the positions approved by the Board.
- Leave regulatory correspondence to the Chief Compliance Officer and banking relationships to the Chief Financial Officer and their teams.

Authority and Limits

- **Approves:** operating plans, targets and scorecards within the Board-approved budget; executive hiring within approved headcount; commercial terms and partnerships within delegated limits; expenditure up to ____.
- **Requires Managing Director or Board approval:** the annual plan and budget; capital expenditure; headcount beyond plan; any new line of business; any matter reserved to the Board.
- **Holds no authority** to direct or overrule a compliance determination, a KYC decision, a statutory filing, an order release or a payment, or to instruct any employee to bypass a control.
- **Escalates to the Managing Director and the Board:** any material loss; any suspected internal fraud; any regulatory notice; any pattern of compliance refusals materially affecting the business.

Key Performance Indicators

Measure	Standard
Revenue and margin against the Board-approved plan	____% of plan
Client franchise: retention and growth	Above ____%
Operating loss and error as a share of volume	Below ____%
Statutory and regulatory filings made on time	100%
Quality Control corrective actions closed by agreed date	Above ____%

Instances of a compliance determination being overridden	Zero
Succession cover for every executive position	100%

Compliance independence acts as a gate. Any confirmed instance of a compliance determination being overridden within the Company caps the assessment regardless of commercial performance. Targets marked ____ are set by the Board.

Qualifications and Experience

- Bachelor's degree; an MBA or equivalent preferred.
- Twelve years or more of professional experience, including at least five leading a business or a substantial division with profit and loss accountability.
- Experience in a regulated financial services, payments, fintech or virtual digital asset business.
- Demonstrated record of building an organisation, not only running one.

Note for HR and Management

The General Manager layer will scale beneath this role. The General Manager currently holds every operating function, including Finance and Compliance. As the Company grows, the position is expected to divide into portfolio General Managers, each holding two functions and reporting here. When that happens, Quality Control should report to this role rather than to any one General Manager, so that it stays outside every function it reviews, and Compliance must not be paired with a function it constrains.

This description defines the scope of the role and does not constitute the whole of the terms of appointment or employment. It is to be read with the Articles of Association, the relevant Board resolution or appointment letter, the Code of Conduct and the AML and KYC Policy of the Company.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and authority limits set out in it, including the limits on compliance determinations.

Job Description: General Manager

Executive · Reports to the Chief Executive Officer

Designation	General Manager
Department	Executive
Reporting To	Chief Executive Officer – sole reporting line
Direct Reports	Chief Compliance Officer, Chief Financial Officer, Operations Head, Client Relationship Head, Marketing Head, Head of Liquidity & Settlements, HR Manager, Quality Control Manager
Portfolio	All functions, until the position divides into portfolio General Managers, each holding two functions (for example Finance and Compliance; Operations and HR; Sales and Marketing)
Workforce	50+ across all functions and three shifts
Grade Level	Executive
Working Hours	8.5 hours, with availability across all three shift timings as operational needs require
Employment Type	Full-time
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The General Manager runs the Company's functions day to day so that the Chief Executive Officer can lead the business and the Board can operate on strategy, capital and regulatory relationships rather than execution. Within its portfolio, and subject to the Chief Executive Officer, the role is the final internal authority on operational, commercial, people and administrative matters. **It is not the final authority on compliance.** Decisions of the Chief Compliance Officer on suspicion, onboarding refusal, account exit and statutory filing cannot be overruled by this role; where the General Manager disagrees, the matter goes to the Board.

About the Company

Blynk Virtual Technologies Private Limited operates a virtual digital asset and P2P services business, spanning trading operations, payment operations, KYC and compliance, client relationship management, finance, quality control and technology. The business runs continuously across three shifts and carries obligations as a reporting entity under the money laundering prevention framework. The General Manager is expected to build structure and system rather than administer what exists.

Key Responsibilities

1. Business Leadership

- Lead overall business operations across all shifts and functions, ensuring service delivery targets and quality standards are consistently met.

- Act as the principal point of contact between the Chief Executive Officer and the operating functions, and translate the Chief Executive Officer's plan into executable plans with named owners and dates.
- Own the operating rhythm: departmental reviews, exception escalation and a single consolidated report to the Chief Executive Officer.
- Drive innovation in service delivery, process design and technology adoption to improve efficiency and margin.

2. Policy, Process and Internal Control

- Design, review and implement Company policies, standard operating procedures and internal controls across operations, payment operations, client relations, finance, human resources and administration.
- Ensure that a control removed or amended in one function is assessed for its effect on the controls held by another. Several of the Company's controls exist only because two functions hold opposite sides of them.
- Ensure every process change is documented before it goes live.
- Act on Quality Control findings and ensure corrective actions are closed on evidence rather than on assurance.

3. Commercial and Financial Ownership

- Own the profit and loss against budget and explain every material variance to the Chief Executive Officer in writing.
- Own budgeting, cost control, MIS reporting and the performance dashboards presented to the Chief Executive Officer and the Board.
- Approve the pricing and concession matrices within which Operations and Client Relations work.
- Ensure management reporting reconciles to the books before it reaches the Board.

4. External Representation

- Represent the Company before government departments, labour and corporate authorities, and ensure timely filings, licences, registrations and renewals in those areas.
- Manage relationships with clients, partners, vendors, banking partners and other external stakeholders at the executive level.
- **Banking liens, law enforcement correspondence, cyber cell matters and regulatory queries on transactions are held by the External Compliance Officer under the Compliance Head.** The General Manager is briefed and supports; the General Manager does not correspond separately with the same authority on the same matter.

5. Statutory and Regulatory Compliance

- Ensure full compliance with applicable labour, corporate and industry regulations, including the Madhya Pradesh Shops and Establishments Act, the Code on Wages 2019 and other applicable statutes.
- Ensure the Company's obligations as a reporting entity are resourced and supported, and that the Chief Compliance Officer has the staffing, systems and access required to discharge them.
- Ensure no business function directs, pressures or works around the compliance function, and report any instance to the Board.
- Ensure the Company can survive an audit or inspection on any given day without preparation.

6. People and Organisation

- Lead, mentor and hold accountable a workforce of 50 or more across functions, including heads, managers and team leaders.

- Drive workforce planning, capability building and succession within the management layer, and maintain a named successor for every direct report position.
- Handle escalations, disciplinary matters and grievance resolution at the final internal level, other than compliance determinations and grievances requiring Board involvement.
- Ensure shift equity: the night shift must not become a posting of last resort in any function.

Authority and Limits

- **Approves:** operating expenditure up to ____ per transaction; hiring within approved headcount; policies, SOPs and process changes; pricing and concession matrices; client credit and commercial terms within Board-approved parameters; disciplinary action up to and including a final warning.
- **Requires Chief Executive Officer approval, and Board approval where reserved:** capital expenditure; headcount expansion beyond plan; any banking relationship change; salary revisions and terminations; engagement of external counsel; any settlement; any new product, platform or channel.
- **Holds no authority to overrule** a compliance determination, an onboarding refusal, an account exit, or the content or timing of a statutory filing. Disagreement is raised with the Board.
- **Holds no authority** to instruct any employee to bypass maker-checker on payments, to release an order without a recorded funding confirmation, or to clear a KYC file.
- **Escalates to the Chief Executive Officer:** any regulatory notice or inspection; any suspected internal fraud; any material loss.
- **Escalates to the Board directly:** any matter touching director liability; any attempt within the Company to override a compliance decision, including by the Chief Executive Officer.

Key Performance Indicators

Measure	Standard
Net operating margin against budget	____% of plan
Composite departmental scorecard achievement	Above ____%
Statutory and regulatory filings on time	100%. No exceptions
Reporting to the Chief Executive Officer on schedule and reconciled to the books	100%
Repeat incidents from a closed corrective action	Zero
Voluntary attrition of confirmed employees	Below ____%
Succession cover for every direct report position	100%
Instances of a compliance decision being overridden	Zero

Statutory timeliness and compliance independence act as gates. A late statutory filing, or any confirmed instance of a compliance decision being overridden within the Company, caps the grade for the period regardless of commercial performance. Targets marked ____ are set by the Chief Executive Officer.

Qualifications and Experience

Essential

- Bachelor's degree and a Master's degree; MBA, LLM, M.Com or equivalent preferred.
- Ten years or more of total professional experience, with five or more in a senior management role.

- Proven experience managing a workforce of at least 50 in a supervisory or managerial capacity, through subordinate managers.
- Domain experience in at least one of: legal and statutory compliance, senior-level operations management, or banking and finance.
- Demonstrated profit and loss accountability.
- Excellent written and verbal communication in English and Hindi.

Preferred

- Experience in a regulated financial services, fintech, payments or virtual digital asset business.
- Experience preparing an organisation for external audit or regulatory inspection.
- Experience running a continuous multi-shift operation.

Competencies

- Strong command of statutory and regulatory frameworks, with the confidence to deal directly with government agencies.
- Sound commercial judgement and comfort with budgets, MIS and financial reporting.
- Builds systems and policy from the ground up rather than only administering existing ones.
- Supports a compliance refusal in front of the business rather than seeking a way around it.
- High personal integrity, sound decision-making under pressure, and complete ownership.
- Willingness to be available across shift timings as operational needs require.

Notes for HR and Management

Two changes from the earlier draft of this description, both deliberate. First, grievance and escalation authority at the final internal level now expressly excludes compliance determinations. A General Manager who can be the last word on a compliance matter makes the Chief Compliance Officer's independence unenforceable, and that independence is what every control in the compliance and KYC descriptions rests on. Second, representation before authorities has been split: labour, corporate and statutory matters sit with this role, while banking liens, law enforcement and transaction-related regulatory queries sit with the External Compliance Officer. Without the split, two functions correspond separately with the same authority on the same matter.

This position is expected to divide as the Company scales. Each portfolio General Manager will hold two functions and a description of its own, all reporting to the Chief Executive Officer. Two pairings should be avoided when that happens. Compliance must never sit under the same General Manager as a function it constrains, such as Operations, Payment Operations, Client Relations or Marketing. Quality Control, which reviews several functions, should then report to the Chief Executive Officer rather than to any one General Manager.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities, escalation obligations and authority limits set out in it, including the limits on compliance determinations.

Employee Name	_____	Designation	_____

Job Description: Chief Technology Officer

Technology function · Executive

Designation	Chief Technology Officer (CTO)
Department	Technology
Reporting To	Chief Executive Officer – sole reporting line
Direct Reports	Technology team (___ positions)
Grade Level	Executive
Working Hours	8.5 hours, with availability for incidents across all three shifts
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Chief Technology Officer owns the systems every control in the Company runs on. The Company's role descriptions define who may do what; **this role makes the systems enforce it.** The role holds no payment credential, and every privileged access to production data is logged and reviewed by someone outside the technology function, because whoever can change production data can rewrite the record every other control depends on.

Role Purpose

The Chief Technology Officer is accountable for the Company's platform and ERP, its security, its data, its availability and its integrations. The role turns written controls into system behaviour, so that an action a description prohibits is one the system does not permit.

Key Accountabilities

1. Platform and ERP Ownership

- Own the architecture, roadmap and reliability of the ERP and the Company's internal systems.
- Prioritise the roadmap with the business owners, and state for every change what control it strengthens, weakens or leaves unchanged.
- Own integrations with trading platforms, banking channels and third-party services, including failure handling and data reconciliation.

2. Controls Enforced in the System

- Mirror the authority limits in the role descriptions in role-based access: no user holds a permission their description denies.
- Enforce maker and checker in the payment and release workflows, so that the same user cannot prepare and approve the same transaction.
- Record the funding confirmation as a system event that release depends on, so an order cannot be released without it.
- Make posted accounting and transaction entries immutable. Corrections are reversals with a recorded reason, never edits.

- Keep an audit trail of every create, change and deletion on financial, client and compliance records, with user and time.

3. Security and Access

- Apply least privilege across every system, with multi-factor authentication for all privileged and remote access.
- Grant access on joining and remove it on leaving or moving within one working day, on HR notice.
- Review user access quarterly with each function head, and remove anything not justified.
- Protect client and KYC data with row-level access control, encryption and restricted export.
- **Grant no access to oneself or to the technology team beyond what the work requires**, and route every privileged grant through a second approver.

4. Change Management

- Ensure every production change is reviewed, tested, reversible and recorded, with business sign-off for changes affecting a workflow.
- Obtain the Chief Compliance Officer's agreement before changing any compliance-relevant function: KYC workflow, monitoring rules, thresholds or record retention.
- Change production data only through a logged, approved procedure. Direct edits to production records are not a support tool.

5. Data, Availability and Continuity

- Retain KYC and transaction records for the period the money laundering prevention framework requires, and make them producible on request.
- Back up critical systems on a defined schedule and test restoration, not only backup, at least quarterly.
- Monitor availability and alert on every failed job or integration, so that a silent failure is not possible.
- Report every incident in writing within 24 hours: what happened, what it affected, what stopped it and what changes.

6. Vendors and Office Technology

- Assess every technology vendor for security, data location and continuity before adoption, and review annually.
- Own office technology: devices, network, endpoint security and the secure disposal of equipment.
- Ensure no Company data is held on personal devices or unapproved services.

7. Team Leadership

- Lead, develop and plan capacity for the technology team, and document every role within it.
- Separate the ability to write code from the ability to deploy it to production wherever the team size allows, and compensate with review and logging where it does not.

Authority and Limits

- **Approves:** technical design and architecture; changes that pass review and test; vendor engagement within budget; access grants within the role-based model with a second approver.
- **Requires Chief Executive Officer approval:** new systems or vendors with cost, data-location or continuity implications; the technology budget; any change to the role-based access model.
- **Requires Chief Compliance Officer agreement:** any change to a compliance-relevant workflow, rule, threshold or retention period.

- **Holds no authority** to execute a payment, hold a payment credential, alter a financial or client record outside the approved procedure, or grant access to oneself.

Key Performance Indicators

Measure	Standard
Availability of critical systems	Above ____%
Production changes reviewed, tested and recorded	100%
Privileged access logged and reviewed outside Technology	100%
Access removed within one working day of leaving	100%
Quarterly access reviews completed	100%
Restoration tests passed	100% of scheduled tests
Incidents reported with root cause within 24 hours	100%
Controls in role descriptions enforced in the system	Tracked; gaps reported quarterly

Privileged access review acts as a gate. Any period in which privileged access to production data was not logged and reviewed caps the grade regardless of every other measure.

Qualifications and Experience

- Bachelor's degree in computer science, engineering or equivalent demonstrated capability.
- Eight years or more building and running production systems, including at least three leading a technology function.
- Hands-on command of the Company's stack: web application frameworks, PostgreSQL, and managed backend platforms including row-level security.
- Experience implementing access control, audit trail and change control in a regulated or financial environment.

Notes for HR and Management

Whoever administers production data can rewrite the record every other control relies on. The funding confirmation that permits a release, the KYC decision that permits a transaction, and the ledger entry that reconciliation checks all live in the database. That is why privileged access is written as a gate and reviewed outside Technology, by Quality Control or the Chief Compliance Officer.

Where the holder of this role is also an authorised signatory of the Company, that signing authority should not extend to approving payments whose records this role's function administers, or every such approval should require a second signatory. Otherwise one person could authorise a payment and administer the system that records it.

The technology function beneath this role has no descriptions yet. Developer, support and infrastructure roles should be documented before the team grows.

This description defines the scope of the role and does not constitute the whole of the terms of appointment or employment. It is to be read with the Articles of Association, the relevant Board resolution or appointment letter, the Code of Conduct and the AML and KYC Policy of the Company.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and authority limits set out in it, including the limits on privileged access.

Name	_____	Designation	_____
Signature	_____	Date	_____

Ref: BVT/HR/JD/2026/007

Date: 03 September 2026

Job Description: Operations Head

Supersedes the designation 'Chief Operations Officer'

Designation	Operations Head
Formerly	Chief Operations Officer (title superseded; scope revised)
Department	Operations
Reporting To	General Manager – sole reporting line
Direct Reports	3 Operations Managers, one per shift, each with 2 Operations Executives
Working Hours	8.5 hours, with presence across all three shift timings as operational needs require
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Operations Head owns execution: what the desk trades, how fast, at what margin, and with what error rate, across all three shifts. **The role does not own KYC clearance and does not own payment release.** KYC and compliance decisions sit with the Compliance Head; payment release sits with Payment Operations. That separation is deliberate. The Operations Head carries the volume and margin target, and for that reason cannot also control the gate that stops a transaction or the hand that releases the money.

Objective

The Operations Head is accountable for the operational output of the business every day: orders executed correctly and within service level, assets managed accurately, targets met, and errors caught and corrected at their cause rather than repeatedly absorbed. The role runs a continuous three-shift operation through three Operations Managers and their Operations Executives.

The role is also expected to build. Rosters, KPIs, targets, MIS and standard operating procedures are designed by this role, not merely administered by it.

Key Responsibilities

1. Operations Management and Execution

- Own daily trading and order execution across purchase and sale flows on all three shifts.
- Ensure continuity of coverage and disciplined shift handover between Operations Managers.
- Maintain and enforce operational standard operating procedures, and update them within 48 hours of any process change.
- Investigate every operational error to root cause and close it with a documented corrective action. A recurrence of a closed issue is a reportable failure.
- Own the operational risk register: known failure modes, the control for each, and the person who owns that control.
- Ensure no Operations Associate or Operations Executive handles live volume without current certification.

2. Asset Management

- Own the lifecycle of trading assets across platforms and wallets: position, movement, internal transfers and reconciliation to the Company's records.
- Ensure asset movements are recorded at the time they occur and reconcile daily against platform and wallet balances.
- Monitor exposure and position limits, and report any breach to the General Manager the same day.
- Coordinate with Finance on valuation, inventory method and period-end position, without assuming ownership of the accounting treatment.

3. Target Planning

- Build the monthly and quarterly volume and margin plan, and defend the assumptions behind it to the General Manager.
- Cascade targets to each shift and Operations Manager with a stated basis, so that a target is understood rather than only received.
- Track achievement daily and report shortfall with the cause and the corrective action, not only the number.
- Design and propose strategies to improve execution efficiency and margin, for the General Manager's approval.

4. KPI Planning and Scorecard Ownership

- Design the operations KPI framework: what is measured at Operations Manager, Operations Executive and Operations Associate level, how it is weighted, and what constitutes each performance grade.
- Set and review targets each quarter so that the scorecard reflects current volumes, staffing and process, rather than last year's assumptions.
- Ensure every KPI is measurable from a system record, not from self-reporting.
- Ensure no operational KPI rewards throughput at the expense of accuracy, and that error and loss measures act as gates on the grade.
- Supply verified KPI data to HR for the appraisal and incentive cycle within the stated timeline.

5. Shift Planning and Capacity

- Design the monthly roster across the morning, evening and night shifts, with a defined minimum viable strength for each shift and function.
- Plan for leave, absence, attrition and peak volume so that coverage does not depend on individuals working beyond their shift.
- Ensure the roster provides for shift handover as part of the shift, and that no shift is left without a Operations Executive on duty.
- Rotate shifts equitably and publish the roster with sufficient notice for employees to plan around it.
- Raise capacity gaps with HR and the General Manager in advance of the shortfall, not after it.

6. Strategy Building and Process Improvement

- Evaluate the operating model continuously: platform mix, counterparty mix, process design, tooling and automation opportunities.
- Propose changes with a stated expected benefit, the risk introduced, and how the risk will be controlled.
- Work with Technology on ERP requirements arising from operations, and own user acceptance testing for any release affecting the desk.
- Reduce manual steps where automation removes an error source, and document any process before automating it.

7. Retention Management

- Own voluntary attrition within the operations function, by shift, and report the drivers rather than only the rate.
- Identify flight risk among Operations Managers, Operations Executives and experienced Operations Associates, and act before the resignation rather than after it.
- Ensure the night shift is not treated as a posting of last resort: rotation, recognition and progression must apply equally across shifts.
- Build the supervisory bench so that no shift depends on a single individual, and maintain a named successor for every Operations Manager and Operations Executive position.
- Work with HR on onboarding quality, certification and career progression within the operations track.

8. Customer Experience Reporting

- Report on the operational drivers of client experience: execution time, order completion rate, failure and cancellation rate, dispute and appeal volume, and repeat-issue clients.
- Identify where a client experience problem originates in an operational cause, and fix the cause rather than escalating the symptom to the Client Relations function.
- Share the operational view with the Customer Relationship Head on a fixed cadence, so that the client-facing and desk-facing pictures reconcile.
- Do not use client experience reporting to reopen a compliance decision. Where a client's experience was affected by a compliance hold, the report records the fact and stops there.

9. MIS Preparation and Reporting

- Prepare and own the operations MIS: volume, margin, execution service level, error and loss, shift performance, staffing and utilisation.
- Deliver the daily, weekly and monthly reporting pack to the General Manager on a fixed schedule, in a fixed format, whether or not the numbers are good.
- Ensure MIS is drawn from system data and reconciles to Finance's records. A management report that does not tie to the books is not a management report.
- Maintain the definitions behind every metric so that the same measure means the same thing in every period.

10. Platform Appeals and Dispute Handling

- Own all appeals and disputes raised on trading platforms, from filing through to outcome.
- Ensure each appeal is filed with the complete evidence set within the platform's stated window.
- Track appeal outcomes and identify the operational practice behind any recurring loss.
- Coordinate with Compliance and Finance on the evidence required, and escalate any platform account restriction or penalty to the General Manager on the day it is applied.

11. Crisis Management and Escalation

- Lead the operational response to high-volume delays, platform or system outage, settlement failure and fraud-related escalations.
- Maintain and test the emergency action protocol, including who has authority when the General Manager is unreachable.
- Report every incident with a written account within 24 hours: what happened, what it cost, what stopped it, and what changes.

- Escalate immediately any suspected internal fraud, to the General Manager and the Compliance Head simultaneously, without prior notice to anyone in the operational reporting line.

Authority and Limits

- Approves:** shift rosters and work allocation; standard operating procedure amendments within an existing process; operational write-offs up to ____; suspension of an Operations Associate or Operations Executive from the live desk pending investigation.
- Requires General Manager approval:** headcount changes; rate or pricing policy; onboarding of a new platform or counterparty; any process change affecting a compliance or payment control; any disciplinary action beyond a first written warning.
- Holds no authority over:** KYC clearance, customer risk categorisation, compliance referrals, or payment release. The Operations Head may not instruct a KYC Associate, an Internal Compliance Officer, a Payment Operations Associate or a Payment Operations Executive to clear, expedite, waive or release. Where speed is needed, the request goes to the Compliance Head or the Head of Liquidity & Settlements.
- Escalate to the General Manager:** any loss above ____; any platform restriction or penalty; any exposure or position limit breach; any incident affecting settlement.

Performance Standards

Measure	Standard
Volume and margin against plan	____% of target
Execution within service level	Above ____%
Operational error rate per 1,000 transactions	Below ____
Operational losses and write-offs as a share of volume	Below ____%
Appeal and dispute outcomes in the Company's favour	Above ____%
Shift coverage against minimum viable strength	100% of shifts
Voluntary attrition within operations	Below ____%
MIS delivered on schedule and reconciled to Finance	100%
Repeat incidents from a closed corrective action	Zero
Instances of directing a compliance or payment function	Zero

Error rate and operational loss act as gates. A quarter with a material loss or a repeat incident caps the grade regardless of volume achievement. Targets marked ____ are set in the departmental KPI scorecard.

Eligibility and Skills

Essential

- Bachelor's degree; a Master's degree in management or a related field is an advantage.
- Seven years or more in operations, including at least three years leading a multi-layer team through subordinate managers.
- Proven ownership of a transaction-processing or trading operation with hard service levels and measurable error and loss exposure.

- Demonstrated experience running a continuous shift-based operation, including night coverage.
- Ability to design a KPI framework and an MIS pack, not only to report against one supplied to them.
- Strong command of Excel and comfort working directly inside an ERP or operations dashboard.
- Clear written and spoken English and Hindi.

Preferred

- P2P, exchange, payment gateway, broking or NBFC operations background.
- Experience with trading platform dispute and appeal processes.
- Exposure to AML and KYC controls from an operational standpoint, sufficient to respect them without owning them.
- Experience introducing automation into a manual operational process.

Attributes

- Sound judgement under pressure, including at 3 a.m. on a shift they are not physically present for.
- Builds structure rather than relying on personal availability to hold the operation together.
- Accepts a compliance or payment refusal without relitigating it through the people who issued it.
- Reports a bad number on schedule rather than late with an explanation.
- High personal integrity and complete ownership of outcomes.

Notes for HR and Management

KYC oversight has been removed from this role, deliberately. The superseded description gave the Chief Operations Officer supervision of customer onboarding and KYC verification while also holding the sales target. That places the volume target and the gate that blocks volume in the same pair of hands, and it is the first structural weakness an AML inspection looks for. KYC and compliance now sit under the Compliance Head, and the Authority section records that the Operations Head cannot direct those functions. If this is restored, every compliance control written into the Internal Compliance Officer and KYC Associate descriptions loses its effect.

The Relationship Manager no longer reports to this role. The superseded description listed the Relationship Manager among the direct reports. Relationship Managers sit under the Customer Relationship Head. Direct reports are the three Operations Managers, one per shift.

The reporting line names a role, not a person. The superseded description named the individual General Manager. A description outlives the person holding the post above it, and naming an individual in it creates an amendment every time either seat changes.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and authority limits set out in it, including the limits on directing the compliance and payment functions.

Job Description: Operations Manager

Operations function · One position per shift

Designation	Operations Manager
Department	Operations
Reporting To	Operations Head – sole reporting line
Direct Reports	2 Operations Executives on the assigned shift, and the Operations Associates beneath them
Grade Level	Middle management
Working Hours	8.5 hours, aligned to the assigned shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Operations Manager runs the desk for the shift and is answerable for everything that happens on it, including what a junior Associate got wrong at 4 a.m. The role carries volume and margin accountability and therefore **holds no authority over KYC clearance or payment release**, and may not instruct a KYC Associate, an Internal Compliance Officer or a Payment Operations Associate to clear, expedite, waive or release.

Role Purpose

The Operations Manager delivers the shift: orders executed accurately and within service level, advertisements priced within the approved band, errors caught before they become losses, and a desk handed over clean to the next shift. The role leads through two Operations Executives.

Key Accountabilities

1. Shift Execution

- Own the shift's volume, margin, execution service level and error rate against the plan cascaded by the Operations Head.
- Administer the pricing band published for the shift: ensure Associates price within it, and refer any case for pricing outside it to the Operations Head rather than approving it.
- Maintain advertisement coverage against bank balance on the buy side and stock availability on the sell side, and take advertisements down where the Company cannot honour them.
- Track open orders and resolve anything stuck beyond the defined time, before the counterparty escalates.

2. Release Control Assurance

- Assure, by sample every shift, that every release was made against a recorded funding confirmation from Payment Operations.
- Treat any release made without one as a reportable incident, regardless of whether funds were in fact received.

- Ensure Operations Executives act as checker on releases above the threshold, and that the threshold is never waived for volume or urgency.
- Support any Associate who has refused to release under pressure. An Associate penalised for holding a release destroys the control for the whole shift.

3. Team Leadership

- Lead two Operations Executives and, through them, the Operations Associates on the shift.
- Allocate desks, platforms and workload by capacity and certification, not availability.
- Review error patterns by Associate weekly, and act on a trend before it costs money.
- Ensure no Associate handles live volume without current desk certification.
- Hold the shift handover discipline: closing position, open orders, pending releases, disputes and system issues documented and acknowledged by the incoming Manager.

4. Error Investigation and Correction

- Investigate every operational error on the shift to root cause and close it with a documented corrective action.
- Distinguish an individual error from a process, system or training failure, and route the fix accordingly.
- Report every incident to the Operations Head with a written account within 24 hours: what happened, what it cost, what stopped it and what changes.
- Ensure a corrective action that has failed once is escalated rather than reapplied.

5. Platform Appeals and Disputes

- File platform appeals and disputes arising on the shift with the complete evidence set, within the platform's stated window.
- Escalate to the Operations Head any platform account restriction, penalty or adverse outcome on the day it is applied.
- Identify the operational practice behind any recurring appeal loss.

6. Coordination and Reporting

- Coordinate with the Internal Compliance Officer, Relationship Manager and Payment Operations Executive on the shift as peers, not as subordinates or superiors.
- Supply Compliance and Quality Control with transaction records, chat evidence and platform data on request, as they are and without comment.
- Report shift performance to the Operations Head on the defined schedule: volume, margin, service level, error, incidents, staffing and open items.

Authority and Limits

- **Approves:** work allocation and desk assignment; operational write-offs up to ____; suspension of an Associate from the live desk pending investigation; pricing within the band published by the Operations Head.
- **Requires Operations Head approval:** pricing outside the band; any process or SOP change; any disciplinary action beyond a first written warning; any commitment to a counterparty outside standard terms.
- **Holds no authority over:** KYC clearance, compliance decisions, payment verification or payment release. A request for speed goes to the Internal Compliance Officer or the Payment Operations Executive as a request, never as an instruction.

- **Escalates to the Operations Head:** any release made without a funding confirmation; any loss above ____; any platform restriction; any suspected internal fraud, simultaneously to the Compliance Head.

Key Performance Indicators

Measure	Standard
Shift volume and margin against plan	____% of target
Releases made against a recorded funding confirmation	100%
Operational error rate per 1,000 transactions	Below ____
Operational losses on the shift	Below ____
Execution within service level	Above ____%
Appeals filed within the platform window with full evidence	100%
Handover completeness	100%
Repeat incidents from a closed corrective action	Zero
Instances of directing a compliance or payment function	Zero

Release control and operational loss act as gates. A release without a funding confirmation, or a material loss on the shift, caps the grade regardless of volume achievement.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- One Operations Manager covers each shift. The additional half hour in the Manager's day is rostered to cover handover to the incoming Manager.

Qualifications and Experience

Essential

- Bachelor's degree in any discipline.
- Four years or more in operations, including at least two supervising a team on a transaction desk.
- Demonstrated ownership of a process with hard service levels and measurable error exposure.
- Strong Excel and comfort working inside an ERP or operations dashboard.
- Willingness to work rotational shifts including the night shift.
- Clear background verification.

Preferred

- P2P, exchange, payment gateway or broking desk background.
- Experience with platform dispute and appeal processes.
- Exposure to AML and KYC controls from an operational standpoint.

Competencies

- Backs an Associate who held a release, even when the order was lost.
- Investigates to cause rather than to blame.
- Accepts a compliance or payment refusal without relitigating it through the people who issued it.
- Reports a bad shift on schedule rather than late with an explanation.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and authority limits set out in it, including the limits on directing the compliance and payment functions.

Employee Name	_____	Designation	_____

Job Description: Operations Executive

Supersedes the designation 'Team Leader, Operations' · Two positions per shift

Designation	Operations Executive
Formerly	Team Leader – Operations (title superseded)
Department	Operations
Reporting To	Operations Manager (shift) – sole reporting line
Direct Reports	Operations Associates on the assigned desk
Grade Level	Executive (supervisory tier)
Working Hours	8.5 hours, aligned to the assigned shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Operations Executive is the second pair of eyes on the desk and the first responder when something goes wrong. **The role acts as checker on every release above the approved threshold.** Everything the Associates get right on the shift is theirs; everything they get wrong is the Operations Executive's.

Role Purpose

The Operations Executive supervises the live desk during the shift: allocating work, checking releases, responding to escalations at the moment they arise, coaching Associates on their specific errors, and handing the desk over complete and documented.

Key Responsibilities

1. Release Checking

- Act as checker on every release above the approved threshold: independently confirm that Payment Operations has recorded a funding confirmation, that the amount matches, and that the remitter matches the counterparty's registered account.
- Check the record, not the Associate's word. A verbal assurance that funds have arrived is not a check.
- Refuse any release where the funding confirmation is absent, partial or inconsistent, and escalate to the Operations Manager rather than releasing under pressure.
- Record the check against the transaction so that both maker and checker are identifiable afterwards.

2. Desk Supervision

- Allocate work across Associates by capacity and certification level, not by who is free.
- Supervise advertisement pricing on the desk: within the band published for the shift, adjusted promptly on rate movement, and taken down where the Company cannot honour them.
- Monitor counterparty chat quality: response times, no unauthorised commitments, and no off-platform contact.

- Monitor ERP entry: recorded at the time of the event, matching the platform record, and complete before the shift ends.

3. First Response and Escalation

- Be first responder on payment failures, disputed transactions, counterparty escalations, stuck orders and system issues.
- Receive every escalation raised by an Associate and act on it or pass it up. Do not send an Associate back to resolve something they have escalated.
- Escalate to the Operations Manager without delay: any release made in error; any third-party payment or payout; any name mismatch; any counterparty pressure to release; any suspected fraud; any platform dispute raised against the Company.
- Route compliance observations to the Internal Compliance Officer through the defined channel, unaltered. Do not assess whether an observation is worth passing on.

4. Coaching and Team Quality

- Coach Associates on the specific errors they make, at the time they make them, rather than on general standards at review time.
- Identify any Associate whose error rate is trending the wrong way and raise it with the Operations Manager before it costs money.
- Support Associates who hold a release or escalate under pressure. An Associate who is criticised for being careful will stop being careful.
- Ensure assigned training is completed and desk certification stays current across the team.

5. Handover and Reporting

- Complete a written handover to the incoming Operations Executive: closing position, open orders, pending releases, unresolved disputes and system issues, acknowledged in writing.
- Report the desk's shift performance to the Operations Manager: volume, margin, errors, escalations, downtime and open items.
- Ensure no Associate leaves the desk with unrecorded transactions.

Authority and Limits

- **Approves:** release as checker up to ____; intra-shift work reallocation; first-level counterparty resolution within the published matrix.
- **Requires Operations Manager approval:** release above the checker threshold; any pricing outside the published band; any exception, refund or concession; any deviation from procedure.
- **Holds no authority** to clear KYC, to verify an incoming payment, to execute a payout, or to instruct a KYC Associate, KYC Executive or Payment Operations Associate.
- **Escalates to the Operations Manager:** everything listed in section 3, immediately and without first attempting to resolve it.

Key Performance Indicators

Measure	Standard
Releases checked against a recorded funding confirmation	100%
Releases above threshold never made single-handed	100%

Desk error rate per 1,000 transactions	Below ____
Losses attributable to the desk on the shift	Below ____
Escalations raised within defined time	Above ____%
Handover completeness and acknowledgement	100%
Team certification currency	100%
ERP entries complete at shift close	100%

Checker discipline acts as a gate. Any release above threshold made without an independent check caps the grade for the period regardless of desk volume. No measure rewards speed of release.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- Two Operations Executives cover each shift under the shift Operations Manager. The additional half hour in the day is rostered to cover handover.

Qualifications and Skills

Essential

- Graduate in any discipline.
- Two years or more on a transaction, trading or payment desk, including at least six months supervising or acting as senior on a desk.
- Strong numerical accuracy sustained under time pressure.
- Clear written English and Hindi, sufficient to write a handover and an incident note.
- Willingness to work rotational shifts including the night shift.
- Clear background verification.

Attributes

- Checks the record even when the Associate is trusted and the counterparty is waiting.
- Takes an escalation off an Associate rather than sending it back.
- Coaches on the specific mistake, not on attitude.
- Holds the release rule at the hour when nobody senior is present.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and authority limits set out in it, and in particular my obligation as checker on releases above the approved threshold.

Job Description: Operations Associate

Supersedes the designation 'Computer Operator' · Three-shift rotational

Designation	Operations Associate
Formerly	Computer Operator (title superseded; scope revised)
Department	Operations
Reporting To	Operations Executive (shift) – sole reporting line
Function Line	Operations Executive → Operations Manager (shift) → Operations Head
Shift	Rotational across three shifts, 8 hours per shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Operations Associate runs the live desk: pricing and maintaining advertisements, handling counterparty chat, processing orders and making entries in the ERP. **The single most important limit on this role is release.** The Associate releases a digital asset only after Payment Operations has confirmed receipt of funds in the Company's bank record. The Associate never verifies an incoming payment themselves and never releases against a screenshot, a transaction reference supplied by the counterparty, or a claim that payment has been made.

Objective

The Operations Associate converts the Company's pricing into executed volume: maintaining competitive advertisements on both the buy and sell side, handling counterparties through the order, coordinating the checks that must clear before an order completes, and recording every transaction accurately at the time it happens.

The role sits at the point of maximum exposure. Every control around it exists because this is where the Company's assets and funds actually move.

Key Responsibilities

1. Advertisement Management and Pricing

- Create and maintain buy-side and sell-side advertisements across the platforms assigned for the shift.
- Price accurately: the rate published must be the rate the Company will honour, computed correctly against the reference rate and the applicable spread.
- Price appropriately: within the margin band and limits set by the Operations Executive for that shift. Do not price outside the band to win an order.
- Price competitively within that band, monitoring the market and adjusting to hold position without giving away margin. Aggressive pricing means moving to the edge of the approved band, never through it.
- Adjust advertisements promptly on rate movement, inventory position or a change in limits, and confirm any change of direction with the Operations Executive.

- Take an advertisement down immediately where inventory, funding or a system issue means the Company cannot honour it.

2. Counterparty Chat and Order Intake

- Respond to counterparty chat within the response time set for the shift, professionally and in the Company's voice.
- State only the terms published in the advertisement and confirmed by the Operations Executive. Do not offer a rate, a timeline or an exception that has not been approved.
- **Never move a conversation off the platform.** Do not share or accept a personal number, personal messaging handle, email or any off-platform contact, and report any counterparty who requests it.
- Do not disclose internal pricing, inventory position, banking arrangements, staffing or process detail to a counterparty.
- Record the substance of any material commitment or dispute in the chat itself, so that the platform record supports the Company in an appeal.

3. KYC Collection and Handoff

- Collect the KYC details and documents required for the order and forward them to the KYC Associate through the defined channel, without delay and without alteration.
- **Do not assess, verify or clear KYC.** The Associate collects and forwards. The KYC Associate verifies and the Internal Compliance Officer decides.
- Do not progress an order beyond the permitted stage until the KYC Associate has recorded the client as cleared.
- Where the KYC Associate refers or holds a client, do not seek to persuade, hurry or work around the hold. Report the commercial impact to the Operations Executive and stop.
- Coordinate with the Relationship Associate on any client-side information, document or clarification needed to complete the file.

4. Order Processing and Coordination

- **Buy orders, where the counterparty is purchasing and funds come in:** confirm order terms, direct the counterparty to pay to the designated Company account, and pass the order to Payment Operations for verification of receipt. Do not confirm receipt yourself.
- **Sell orders, where the counterparty is selling and a payout goes out:** confirm receipt of the digital asset in the Company's wallet or platform account, then pass the counterparty's payout details exactly as they appear on the platform record to Payment Operations through the Operations Executive. Payment Operations executes the payout. The Associate does not execute it.
- **Beneficiary and account details are passed unaltered.** Do not retype, edit, substitute or supplement a payout detail taken from the platform, and do not accept a change of beneficiary communicated in chat. A counterparty asking to be paid to a different account is escalated, not actioned.
- Coordinate with Payment Operations through the Operations Executive on funding status, payout status and any failed or delayed transaction.
- Coordinate with the Relationship Associate on client communication so the counterparty receives one consistent position, not two.
- Track every open order to completion and flag any order stuck at a stage beyond the defined time.

5. Release of Orders

This section states the Company's principal operational control. It is not subject to exception, urgency, counterparty pressure or shift staffing.

- Release a digital asset only after Payment Operations has recorded confirmation that the funds are received in the Company's bank account, in the full expected amount, from the counterparty's registered account.
- **Never release against:** a screenshot, a payment reference or UTR supplied by the counterparty, a bank SMS forwarded by the counterparty, a partial credit, a third-party credit, or any verbal confirmation from any person.
- Where a counterparty disputes, threatens, complains to the platform, or escalates over a delay in release, do not release. Refer to the Operations Executive. A dispute is recoverable; a wrongly released asset generally is not.
- Where an instruction to release comes from anyone other than through the recorded funding confirmation, do not act on it and report it to the Operations Executive immediately, regardless of the seniority of the person instructing.
- Record the release in the ERP at the time it is made, with the funding confirmation reference attached.

6. ERP Entry and Record Accuracy

- Record every buy, sell and transfer order in the purchase and sales section of the ERP at the time the event occurs, not at the end of the shift: order reference, rate, quantity, counterparty, funding confirmation and release.
- Client and KYC records are maintained by the KYC Associate in the client section of the ERP. Do not create, edit or overwrite an entry in that section.
- Ensure entries match the platform record exactly. Where the ERP and the platform disagree, report the difference to the Operations Executive the same shift rather than adjusting either.
- Do not alter a completed entry. Where a correction is needed, raise it with the Operations Executive so it is made as a recorded correction.
- Complete the shift's entries before handover. A shift does not close with unrecorded transactions.

7. Data Sharing with Compliance

- Supply the Internal Compliance Officer and the KYC Associate with the transaction trail, chat record, order detail and platform evidence required for a review or an alert.
- Supply the External Compliance Officer with the order records, transaction trail and chat evidence required for a lien, freeze or external query on any account.
- Provide records as they are. Do not summarise, interpret, filter or comment on what a record means.
- Provide requested records within the timeline stated, and report to the Operations Executive immediately if a record cannot be produced.

8. Escalation and Red Flags

All escalation is to the Operations Executive on duty for the shift.

- **Escalate before proceeding:** any third-party payment or payout instruction; any name mismatch between the counterparty, the paying account and the KYC record; any request to split a payment or payout; any request to move off-platform; any unusual urgency or pressure to release; any counterparty whose behaviour fits a listed red flag.
- **Escalate immediately:** any release made in error; any asset sent to a wrong address; any platform dispute or appeal raised against the Company; any system, platform or ERP failure affecting the desk.
- An error reported by the Associate at once is treated as a recoverable operational event. An error concealed, delayed, or found by someone else is treated as a conduct matter.
- Uncertainty is itself a ground to escalate. The Associate is never expected to resolve a doubt alone.

9. Confidentiality and Conduct

- Maintain strict confidentiality of counterparty identity, KYC documents, order history, internal pricing, inventory position and banking arrangements.
- Do not hold order records, counterparty details or screenshots on a personal device or personal account.
- Do not trade on the Company's platforms or accounts for personal benefit, and do not conduct personal digital asset trading with any counterparty known through the Company.
- Do not accept any consideration, gift or benefit from a counterparty in any form.
- Disclose immediately any personal, family or financial relationship with a counterparty, and take no part in that counterparty's orders.

10. Shift Handover and Reporting

- Submit a shift report: orders completed, orders open by stage, disputes raised, releases made, escalations, and advertisement and pricing position at close.
- Complete a written handover to the incoming Associate, with open orders and pending releases acknowledged in writing by the receiving Associate.
- Handover is completed at the change of shift and is part of the shift, not additional to it.

Authority and Limits

- **May do independently:** create, price and adjust advertisements within the approved band and limits; respond to counterparty chat on published terms; process orders through the defined stages; make ERP entries.
- **No authority to release** other than against a recorded funding confirmation from Payment Operations.
- **No authority** to price outside the approved band, to grant an exception, to waive a check, to clear KYC, to execute a payout, or to confirm receipt of funds.
- **No authority** to settle a dispute, refund, or compensate a counterparty. All disputes go to the Operations Executive.
- **Escalate to the Operations Executive:** everything listed in section 8, without exception and without first attempting to resolve it.

Performance Standards

Measure	Standard
Release accuracy	100%. Every incorrect release is a reportable incident
Releases made against a recorded funding confirmation	100%
ERP entries recorded at time of transaction	100%
ERP to platform record match	100%
Counterparty chat first response	Within ____ minutes
Volume executed against shift target	____% of target
Margin achieved within approved band	Above ____%
Order completion rate	Above ____%
Disputes and appeals attributable to the Associate	Below ____ per quarter
Red flags escalated	Measured for coverage. Under-reporting is the failure mode; over-reporting is never penalised.

Release accuracy operates as a gate. A confirmed incorrect release caps the grade for that quarter regardless of volume or margin achievement. No measure in this role rewards speed of release. Targets marked ____ are set in the departmental KPI scorecard.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- Each shift is supervised by a Operations Executive reporting to the Operations Manager for that shift.
- Shifts rotate as published in the monthly roster. Weekly off is scheduled by roster and may fall on any day.
- An Associate may not handle live volume without current desk certification.

Eligibility and Skills

Essential

- Graduate in any discipline.
- Demonstrable numerical accuracy and speed. This role prices and executes under time pressure for a full shift.
- Working computer literacy: web platforms, spreadsheets, ERP or CRM systems and messaging tools.
- Clear written English and Hindi for counterparty chat.
- Willingness to work rotational shifts including the night shift.
- Clear background and reference verification. This is mandatory for this role and is not waived.

Preferred

- Prior experience on a P2P, exchange, broking or trading desk.
- Understanding of digital asset markets, spreads and order books.
- Exposure to KYC and AML red flags in a transaction environment.
- Experience handling customer chat or dispute queues at volume.

Attributes

- Holds the release rule under pressure from an angry counterparty at 3 a.m.
- Records at the time, not at the end of the shift.
- Escalates rather than improvises.
- Reports own errors immediately and without prompting.
- Personal integrity. This role has hands on the Company's assets every day.

Notes for HR and Management

The release rule is the reason this role is written tightly. In a P2P operation, almost every large loss traces back to an asset released before funds were confirmed in the bank account, under pressure from a counterparty who sounded credible. Separating verification (Payment Operations, against the bank record) from release (Operations, against a recorded confirmation) is what prevents that. If the two are ever collapsed into one person to save time on a busy shift, the control is gone for as long as that arrangement lasts.

Pricing authority needs a published band. The role is asked to price aggressively, which is right, but aggressive pricing without a floor is how margin disappears one order at a time and without anyone breaching a rule. The Operations Executive must publish the band and limits for each shift, and the scorecard must measure margin within the band, not volume alone.

The off-platform rule is an AML control, not an etiquette rule. A counterparty who wants to move the conversation to a personal channel is removing the evidence trail that protects the Company in a platform appeal and in a lien response. Train it as a red flag to report, not merely as something to decline.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and authority limits set out in it, and in particular the conditions governing the release of orders.

Job Description: Chief Compliance Officer

Compliance function · Executive · Principal Officer

Designation	Chief Compliance Officer (CCO)
Department	Compliance
Reporting To	General Manager (administrative) Direct and unrestricted access to the Board on any regulatory or suspicion matter
Direct Reports	Compliance Head, and through that role the Heads of Internal and External Compliance and their officers
Statutory Role	Principal Officer under the Prevention of Money Laundering framework
Grade Level	Executive
Working Hours	8.5 hours
Compensation Structure	Fixed only. This role carries no volume-linked or revenue-linked incentive, by design
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Chief Compliance Officer sets and holds the Company's compliance framework; the Compliance Head runs it. **Determinations of this role on suspicion, statutory reporting, onboarding refusal and account exit are final within the Company and cannot be overruled by the General Manager or by any business function.** Where the business disagrees, the route is to the Board. The compensation of this role carries no variable component tied to volume or revenue.

Role Purpose

The Chief Compliance Officer is the Company's senior compliance authority and its Principal Officer. The role owns the policy framework, the risk model, the statutory reporting obligations and the Company's standing with its regulators, and is the person who can stop business when the law requires it.

Division of Responsibility with the Compliance Head

Chief Compliance Officer	Compliance Head
Sets policy, thresholds, monitoring parameters and the risk framework	Applies them and runs the function day to day
Determines suspicion and makes statutory filings as Principal Officer	Refers matters upward that may amount to suspicion
Owens regulatory registration, correspondence and inspections	Executes internal and external compliance delivery across three shifts
Approves the training and internal testing programme	Delivers training, testing and remediation

Reports to the Board on the compliance position

Reports to the Chief Compliance Officer on function
performance

Key Accountabilities

1. Principal Officer Obligations

- Evaluate matters referred by the Compliance Head, determine suspicion, and file the prescribed reports with the Financial Intelligence Unit within statutory timelines.
- Record every determination, including determinations not to report, with the reasoning recorded at the time.
- Maintain record retention in the prescribed form and for the prescribed period.
- Ensure no person inside the Company is informed that a report has been or may be made, other than as the framework permits.
- Maintain the Company's registration and standing with the relevant authority, and manage regulatory correspondence, inspections and information requests.

2. Framework Ownership

- Own and approve the AML and CFT policy, the KYC policy, the customer risk categorisation framework and the enhanced due diligence procedure.
- Set the monitoring parameters, thresholds and scenarios, and the value threshold below which a KYC Associate may clear a standard-risk file independently.
- Approve the periodic review and ReKYC calendar and the sanctions and adverse media screening process.
- Review the framework at least annually and on any material change in the business, product, platform or counterparty base.

3. Independence and Board Reporting

- Refuse onboarding, freeze an account or exit a client where the framework requires it, without seeking business approval.
- Report to the Board any instance of a business function seeking to override, delay or work around a compliance decision, or to withhold an observation.
- Advise the Board and the General Manager on the compliance implications of any new product, platform, counterparty or channel before launch.
- Deliver the compliance position to the Board on a fixed schedule: determinations, filings, external exposure, testing findings and training coverage.
- Ensure every employee has a route to report a suspicion that cannot be closed by their line manager.

4. Assurance and Oversight of the Function

- Hold the Compliance Head accountable for consistent decisions across shifts and for the quality of the function's work.
- Approve the internal compliance testing programme and require findings to be closed on evidence with dated corrective action.
- Monitor alert volumes, referral rates and clearance patterns for signs that the function is under commercial pressure or under-reporting.
- Instruct external counsel on regulatory matters and record the advice against the position it supports.

Authority and Limits

- **Decides finally within the Company:** suspicion determinations; statutory filings and their content and timing; onboarding refusal, account freeze and exit on compliance grounds; policy, thresholds and monitoring parameters.
- **Requires Board approval:** engagement of external counsel; any settlement or payment to resolve a regulatory matter; any admission of liability; any change to the Company's registration status.
- **Escalates to the Board directly:** any determination of suspicion; any regulatory notice or inspection; any pressure within the Company to override a compliance decision; any matter touching the personal liability of a director or officer.
- **Holds no authority** over commercial pricing, order release or payment release, and takes no operational target.

Key Performance Indicators

Measure	Standard
Statutory reports filed within prescribed timelines	100%
Determinations recorded with reasoning at the time	100%
Framework reviewed on schedule and on material change	100%
Internal testing findings closed by agreed date	Above ____%
Regulatory correspondence answered within stated timeline	100%
Instances of a compliance decision being overridden	Zero

This role is assessed on compliance outcomes only. No measure is linked to business volume, revenue, onboarding throughput or clearance rate, and none may be introduced.

Qualifications and Experience

Essential

- Bachelor's degree; a law, finance or management postgraduate qualification preferred.
- Ten years or more in AML and KYC compliance at a bank, non-banking financial company, payment institution or regulated exchange, including at least five leading a compliance function.
- Command of the money laundering prevention framework, reporting obligations and KYC master direction principles.
- Demonstrated independence: has declined business on compliance grounds and can describe the circumstances and the outcome.
- Precise written English suitable for regulatory correspondence, filings and Board papers.

Preferred

- Virtual digital asset or reporting-entity experience.
- CAMS or equivalent certification.
- Experience of a regulatory inspection or enforcement matter from the compliance side.
- Experience appearing before or corresponding with a regulator on the Company's behalf.

Notes for HR and Management

The Principal Officer designation has moved to this role. It previously sat with the Compliance Head. With a Chief Compliance Officer in place, the Principal Officer should be the senior compliance authority, because the designation carries personal statutory responsibility and must sit with the person who determines suspicion rather than with the person who runs the function. Confirm the change against the Company's filed particulars, and confirm a Designated Director is recorded. The latter is a Board appointment and cannot be held by this role.

The internal compliance chain is now six layers deep: Chief Compliance Officer, Compliance Head, Head Internal Compliance, Internal Compliance Officer, KYC Executive, KYC Associate. Each layer is a place a referral can slow down. Two features limit that: every intermediate description carries an express obligation to route upward without filtering, and the Head Internal Compliance refers suspicion to this role directly, informing the Compliance Head at the same time. Measure both rather than assuming them.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the policies of the Company in force from time to time. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and statutory obligations set out in it, including those attaching to the Principal Officer designation.

Job Description: Compliance Head

Compliance function · Department head · Reports to the Chief Compliance Officer

Designation	Compliance Head
Department	Compliance
Reporting To	Chief Compliance Officer – sole reporting line
Direct Reports	Head Internal Compliance and Head External Compliance, and through them the Internal and External Compliance Officers
Grade Level	Senior management, department head
Working Hours	8.5 hours, with availability across all three shift timings
Compensation Structure	Fixed only. This role carries no volume-linked or revenue-linked incentive, by design
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Compliance Head runs the Company's compliance function day to day, applying the framework set by the Chief Compliance Officer across three shifts of internal compliance and the external compliance function. **Decisions of this role on approval, onboarding refusal and holds cannot be overruled by the General Manager or by any business function.** Determination of suspicion and statutory filing rest with the Chief Compliance Officer as Principal Officer; this role refers, it does not determine. The compensation of this role carries no variable component tied to volume or revenue.

Role Purpose

The Compliance Head runs the Company's compliance function: applying the policy, the customer risk model and the monitoring parameters set by the Chief Compliance Officer, holding decision quality consistent across shifts, and leading a continuous three-shift internal compliance function and an external compliance function handling banking, law enforcement and regulatory matters.

The role is expected to make the framework work in practice and to tell the Chief Compliance Officer where it does not: where a threshold produces noise, where a procedure is being worked around, or where a shift is under-referring.

Scope and Scale

Dimension	Scale
Team	Head Internal Compliance, Head External Compliance, 3 Internal Compliance Officers, 3 External Compliance Officers, and the KYC Executives and Associates beneath the officers
Coverage	24x7 compliance coverage across three shifts
Statutory	Referral and statutory support to the Chief Compliance Officer as Principal Officer
External	Banks, law enforcement, cyber cells, regulators and retained counsel

Private and Confidential

BVT/HR/JD/2026/012 | Page 1 of 5

Key Accountabilities

1. Referral and Statutory Support

- Ensure every matter that may amount to suspicion reaches the Chief Compliance Officer without delay, whether referred directly by the Head Internal Compliance or through this role, with the file, the evidence and the officers' observations complete.
- **Do not determine suspicion and do not decide against referral.** Both determinations belong to the Chief Compliance Officer as Principal Officer.
- Maintain record retention across the function in the prescribed form and for the prescribed period.
- Ensure no person inside the Company is informed that a matter has been referred or may be reported, other than as the framework permits.
- Prepare the information required for statutory filings and regulatory correspondence, for the Chief Compliance Officer's review and submission.

2. Application of the Framework

- Apply the AML and CFT policy, the KYC policy and the customer risk categorisation framework approved by the Chief Compliance Officer, consistently across all three shifts.
- Apply the monitoring parameters, thresholds and scenarios set by the Chief Compliance Officer, and propose tuning on evidence rather than on complaint volume.
- Apply the value threshold below which a KYC Associate may clear a standard-risk file independently, and report where loss or alert experience suggests it should move.
- Run the enhanced due diligence procedure and the periodic review and ReKYC calendar for each risk category.
- Run the sanctions, politically exposed person and adverse media screening process, including periodic rescreening of the existing client base.

3. Internal Compliance Oversight

- Lead the Head Internal Compliance, and through that role ensure continuous, consistent compliance coverage across all three shifts.
- Ensure decisions on the same facts do not differ between shifts, and hold the Head Internal Compliance to calibrating the officers and correcting variance.
- Decide every matter referred by the Head Internal Compliance that falls within this role's authority, and record the basis for each decision.
- Monitor alert volumes, referral rates and clearance patterns for signs that the function is under commercial pressure or is under-reporting.

4. External Compliance Oversight

- Lead the Head External Compliance, and through that role the External Compliance Officers, on liens, account restrictions, fund recovery, law enforcement correspondence and regulatory queries.
- Approve any submission or response that takes a new position with an external authority, and any admission, undertaking or proposed settlement. Submissions within an established position are approved by the Head External Compliance.
- Track the Company's external exposure: value under restriction, open notices, matters with counsel, and the ageing of each.
- Identify the internal practice behind recurring external exposure and drive its correction, rather than defending the same pattern repeatedly.

5. Independence and Escalation

- Refuse onboarding or hold an account where the framework requires it, without seeking business approval, and refer any freeze or exit to the Chief Compliance Officer.
- Report to the Chief Compliance Officer any instance of a business function seeking to override, delay or work around a compliance decision, or to withhold an observation.
- Advise the business on the compliance implications of any new product, platform, counterparty or channel before launch, not after.
- Ensure every employee has a route to report a suspicion that cannot be closed by their line manager.

6. Training, Testing and Assurance

- Train all client-facing and operations staff on AML obligations and red flags, and maintain training records as a compliance artefact.
- Run the internal compliance testing programme approved by the Chief Compliance Officer, report findings to that role with a remediation plan and dates, and close each finding on evidence.
- Ensure no Associate handles client accounts or live volume without current compliance certification.
- Support statutory audit and any external review with records and reconciliations.

7. Function Leadership and Reporting

- Plan capacity and rostering with HR so that every shift carries compliance cover to minimum viable strength.
- Set the KPI framework for the function, ensuring no measure rewards throughput or clearance rate.
- Own retention and succession within the function, and maintain a named successor for both Heads and for each officer position.
- Deliver the compliance reporting pack to the Chief Compliance Officer on a fixed schedule: alerts, referrals, decisions, external exposure, testing findings and training coverage.

Authority and Limits

- **Decides, and cannot be overruled by the General Manager or any business function:** approval or rejection of files referred by the Head Internal Compliance; holds on onboarding and accounts pending review; risk categorisation within the framework.
- **Refers to the Chief Compliance Officer:** any matter that may amount to suspicion; any account freeze or client exit; any proposed change to policy, thresholds or monitoring parameters; any submission taking a new position with an authority.
- **Holds no authority** to determine suspicion, to make or decide against a statutory filing, or to amend the policy, thresholds or monitoring parameters.
- **Escalates to the Chief Compliance Officer immediately:** any regulatory notice or inspection; any pressure within the Company to override a compliance decision; any matter touching the personal liability of a director or officer.

Key Performance Indicators

Measure	Standard
Suspicion referrals to the Chief Compliance Officer within the set time	100%
Referrals determined within internal service level	Above ____%
Client risk categorisation and periodic review currency	100% of the active base
Staff AML training coverage	100%, refreshed annually
Internal testing findings closed by agreed date	Above ____%
Decision consistency across shifts on comparable facts	Variance below ____%
External exposure: value under restriction	Reducing quarter on quarter
Instances of a compliance decision being overridden	Zero

This role is assessed on compliance outcomes only. No measure is linked to business volume, revenue, onboarding throughput or clearance rate, and none may be introduced. Targets marked ____ are set by the Chief Compliance Officer.

Qualifications and Experience

Essential

- Bachelor's degree; a law, finance or management postgraduate qualification preferred.
- Seven years or more in AML and KYC compliance at a bank, non-banking financial company, payment institution or regulated exchange, including at least three leading a compliance function.
- Working command of the money laundering prevention framework, reporting obligations, and KYC master direction principles.
- Demonstrated independence: has declined business on compliance grounds and can describe the circumstances and the outcome.
- Precise written English suitable for regulatory correspondence and filings.
- Experience leading a continuous shift-based function.

Preferred

- Virtual digital asset or reporting-entity experience.
- CAMS or equivalent certification.
- Experience of a regulatory inspection or audit from the compliance side.
- Experience designing a transaction monitoring rule set and tuning it on outcomes.

Competencies

Core

- Independence of judgement under commercial pressure.
- Documents the reasoning at the time of the decision, not afterwards.
- Personal integrity of a standard that survives external scrutiny.

Functional

- Policy and framework design.
- Referral preparation and regulatory drafting.

- Monitoring rule design and tuning.
- Regulatory relationship management.

Leadership

- Calibrating a decision function so outcomes do not vary by shift or by officer.
- Building a team willing to raise concerns rather than clear files.
- Holding a position with the business without escalation becoming personal.

Notes for HR and Management

The Principal Officer designation sits with the Chief Compliance Officer. This role carried it until a Chief Compliance Officer was appointed. The designation belongs with the person who determines suspicion; this role runs the function that surfaces suspicion and refers it upward. That separation should be visible in the Company's filed particulars.

The fixed-only compensation structure is deliberate and should not be varied. A variable component on this role, however small and however it is framed, gives the person who can stop a transaction a financial interest in not stopping it. Recognition for this role should be through fixed compensation review, not through an incentive.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and statutory obligations set out in it, including the obligation to escalate directly to the Board where the framework requires it.

Job Description: Head Internal Compliance

Compliance function · Internal compliance across all shifts

Designation	Head Internal Compliance
Department	Compliance
Reporting To	Compliance Head – sole reporting line The Chief Compliance Officer, where no Compliance Head is in post
Direct Reports	Internal Compliance Officers (one per shift), and the KYC Executives and KYC Associates beneath them
Function Line	Head Internal Compliance → Compliance Head → Chief Compliance Officer
Grade Level	Senior management
Working Hours	8.5 hours, with presence across all three shift timings
Compensation Structure	No incentive linked to order volume, transaction value, onboarding throughput or approval rate
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Head Internal Compliance owns the internal compliance function across all three shifts: onboarding decisions, transaction monitoring, KYC quality and ReKYC. Decisions of this role on approval, rejection and holds cannot be overruled by any business function or by the General Manager. **The role does not determine suspicion.** Every matter that may amount to suspicion goes to the Chief Compliance Officer as Principal Officer, directly and without delay, with the Compliance Head informed at the same time.

Role Purpose

The Head Internal Compliance makes the Company's internal compliance function behave as one function rather than three shifts. The role leads the Internal Compliance Officers, holds their decisions to a single standard, decides the matters beyond their authority, and makes sure that anything which may amount to suspicion reaches the Principal Officer quickly and complete.

Key Accountabilities

1. Leadership of the Internal Compliance Officers

- Lead the Internal Compliance Officers across all three shifts: allocation, coverage, development and certification.
- Calibrate decisions so the same facts produce the same outcome on every shift and under every officer. Run calibration reviews on sampled files and correct variance at its cause.
- Hold every officer, and through them every KYC Executive, to the routing standard: referrals pass upward unaltered and within time.
- Protect the desk from commercial pressure. Any request from another function to clear, expedite or set aside a check is handled at this level, not left to an officer or an associate.

- Maintain a named successor for each Internal Compliance Officer position.

2. Decisions Beyond Officer Authority

- Decide files referred by an Internal Compliance Officer that fall outside that officer's authority, within the limits set by the Chief Compliance Officer, and record the basis for each decision.
- Approve or reject enhanced due diligence outcomes within this role's authority, and refer the remainder to the Compliance Head.
- Decide, on record, whether a client whose ReKYC is overdue beyond the permitted limit may continue transacting.
- Refer to the Compliance Head any account freeze or client exit, and any file that sits outside this role's authority.

3. Suspicion Referral

- Refer to the Chief Compliance Officer every matter that may amount to suspicion, directly and with the Compliance Head informed at the same time, with the file, the evidence and the officers' observations complete.
- **Do not determine suspicion, and do not decide against referral.** Where this role believes a concern is unfounded, that view travels with the referral; it does not replace it.
- Ensure no person inside the Company is informed that a matter has been referred or may be reported, other than as the framework permits.

4. Monitoring and Quality

- Oversee alert review across all shifts: volumes, backlog, referral rates and clearance patterns. Treat a falling referral rate as a question to investigate, not as an improvement to report.
- Review Quality Control findings on KYC files and video KYC sessions, and drive corrective action to closure on evidence.
- Propose tuning of monitoring parameters and thresholds to the Compliance Head on evidence, never on complaint volume.
- Oversee the post-completion review and the completeness of the client section of the ERP across all shifts.

5. Coordination with External Compliance

- Supply the Head External Compliance with KYC files, screening results and the recorded internal position on any account under lien, freeze or external query.
- Receive the patterns the Head External Compliance identifies in liens and freezes, and feed them into onboarding checks and monitoring so the cause is corrected where it enters.

6. Reporting

- Report to the Compliance Head on a fixed cycle, by shift: decisions, referrals, alert backlog, quality-check accuracy, ReKYC currency and certification coverage.
- Report the numbers that indicate under-referral as prominently as those that indicate delay.

Authority and Limits

- **Decides, and cannot be overruled by any business function or by the General Manager:** files referred beyond officer authority, within the limits set by the Chief Compliance Officer; enhanced due diligence outcomes within this role's authority; continued transacting by overdue-ReKYC clients.

- **Refers to the Chief Compliance Officer directly:** every matter that may amount to suspicion, with the Compliance Head informed.
- **Refers to the Compliance Head:** account freezes and client exits; files outside this role's authority; proposed changes to thresholds or monitoring parameters.
- **Holds no authority** to determine suspicion, to make or decide against a statutory filing, or to amend policy, thresholds or monitoring parameters.
- **Escalates immediately:** any attempt by any person to influence a decision; any client progressed despite a hold.

Key Performance Indicators

Measure	Standard
Suspicion referrals reaching the Chief Compliance Officer within set time	100%
Referrals altered, delayed or withheld anywhere in the function	Zero
Decision consistency across shifts on calibrated samples	Variance below ____%
Decisions recorded with reasoning	100%
Alert backlog beyond service level	Below ____
KYC quality-check accuracy on independent review	Above ____%
ReKYC currency across the active base	____% within schedule
Certification coverage across the internal compliance team	100%

Referral integrity acts as a gate. No measure in this role is linked to order volume, transaction value, onboarding throughput or approval rate, and none may be introduced. Targets marked ____ are set by the Compliance Head.

Qualifications and Experience

- Bachelor's degree; a law, commerce or finance qualification is an advantage.
- Six years or more in KYC, AML or transaction monitoring, including at least two leading onboarding or monitoring decision-makers.
- Working command of the money laundering prevention framework and KYC obligations, and of how referrals are prepared for a Principal Officer.
- Experience calibrating a decision team so that outcomes do not vary by officer.
- CAMS or equivalent certification preferred.

Note for HR and Management

Adding this layer does not add a step to suspicion referral. The internal compliance chain now runs six layers from the KYC Associate to the Chief Compliance Officer. Every layer is a place a referral can slow down, and suspicion is the one matter where delay has a statutory cost. This role therefore refers suspicion directly to the Chief Compliance Officer, informing the Compliance Head at the same moment rather than waiting for them to pass it on. Operational decisions still travel the full line.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and authority limits set out in it, including the obligation to refer every matter that may amount to suspicion to the Chief Compliance Officer directly and unaltered.

Employee Name	_____	Designation	_____
Signature	_____	Date	_____
Approved by (Compliance Head)	_____	Date	_____
Recorded by (HR)	_____	Date	_____

Ref: BVT/HR/JD/2026/015

Date: 03 September 2026

Job Description: Internal Compliance Officer

Compliance function · One position per shift

Designation	Internal Compliance Officer (ICO)
Department	Compliance
Reporting To	Head Internal Compliance – sole reporting line
Function Line	Internal Compliance Officer → Head Internal Compliance → Compliance Head → Chief Compliance Officer
Direct Reports	KYC Executive on the assigned shift, and the KYC Associates beneath
Grade Level	Middle management
Working Hours	8.5 hours, aligned to the assigned shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Internal Compliance Officer is the approval gate on the shift. No order proceeds to payment without this role's approval where the file requires it. **The decision to approve or reject cannot be overruled by Operations, Client Relations or Payment Operations, and cannot be overruled by the General Manager.** Where a business function disagrees, the route is to the Head Internal Compliance. The Officer determines approval; the Chief Compliance Officer, as Principal Officer, determines suspicion and makes any statutory filing.

Role Purpose

The Internal Compliance Officer holds the Company's compliance position during the assigned shift: approving or rejecting client files and orders on the evidence, reviewing what the KYC Associates surface, supervising the quality of verification work, and referring anything that may amount to suspicion to the Head Internal Compliance.

Key Accountabilities

1. Approval and Rejection

- Approve or reject every file referred by a KYC Associate, and every file at or above the value threshold set in the AML and KYC Policy, on the evidence in the file.
- Record the basis for every decision at the time it is made, including approvals. A decision without recorded reasoning is an incomplete decision.
- Reject or hold where the file does not meet the standard, regardless of the value of the order, the seniority of the person asking, or the client's importance.
- Communicate the decision as a decision. Do not negotiate it with Operations or Client Relations, and disclose nothing to them about the reason beyond the status.
- Ensure a rejected or held client is not progressed by any function, and report immediately to the Head Internal Compliance any attempt to proceed.

2. Alert Review and Referral of Suspicion

- Review the alerts and observations raised by KYC Associates during the shift, and record a determination on each.
- Conduct the second-level review on transaction monitoring: pattern across orders, counterparty repetition, structuring, velocity change, and inconsistency between stated purpose and observed activity.
- **Refer to the Head Internal Compliance every matter that may amount to suspicion.** The Officer does not conclude that a matter is not reportable; that determination belongs to the Principal Officer.
- Maintain the shift record of alerts, determinations, referrals and items carried forward.

3. Due Diligence and Risk Categorisation

- Apply and confirm customer risk categorisation, and trigger enhanced due diligence where the criteria are met.
- Review sanctions, politically exposed person and adverse media screening outcomes, including nil results, on files referred.
- Approve or reject enhanced due diligence outcomes within the Officer's authority, and refer the remainder to the Head Internal Compliance.
- Oversee the ReKYC calendar for the shift and decide, on record, whether a client whose updation is overdue may continue transacting.

4. Supervision of the KYC Desk

- Supervise the KYC desk through the KYC Executive: allocation, quality and certification currency.
- Hold the KYC Executive to the routing standard: every referral raised by an Associate must reach the Officer unaltered and within time.
- Quality-check a sample of files cleared under delegated authority each shift, and correct any Associate whose accuracy is trending down before it becomes a finding.
- Review video KYC sessions against the checklist, including every session terminated or referred.
- Protect the desk from pressure. Any request from another function to clear, expedite or set aside a check is handled by the Officer, not left to the KYC Executive or the Associate.
- Ensure no Associate handles client files without current compliance certification.

5. Post-Completion Review

- Oversee the post-completion review of every completed order: that the file is complete, the verification evidence is attached, and the client record in the ERP client section reflects what actually happened.
- Identify, from completed orders, any pattern that should have been caught earlier, and feed it into the monitoring parameters through the Head Internal Compliance.
- Ensure the client record is closed to an audit-ready standard before the shift ends.

6. Coordination and Data Sharing

- Provide Operations and Client Relations with the compliance status of a client: cleared, pending, referred or rejected. State the status; do not explain the reasoning.
- Supply the External Compliance Officer with KYC files, screening results and the recorded compliance position on any account under lien, freeze or external query.
- Obtain transaction records from Operations and client records from Client Relations where needed for a review, and report to the Head Internal Compliance any function that fails to supply them.
- Complete a written handover to the incoming Officer covering open referrals, held clients and pending decisions.

Authority and Limits

- **Decides, and cannot be overruled by any business function or by the General Manager:** approval or rejection of a client file or order on compliance grounds; a hold pending further information; risk categorisation within the framework.
- **Refers to the Head Internal Compliance:** any matter that may amount to suspicion; any account freeze or exit; any file outside the Officer's approval authority; any pressure to override a decision.
- **Holds no authority** to determine suspicion, to make or decide against a statutory filing, to amend the policy, thresholds or monitoring parameters, or to release an order or a payment.
- **Escalates immediately to the Head Internal Compliance:** any attempt by any person to influence a decision; any client progressed despite a hold; any Associate reporting pressure from another function.

Key Performance Indicators

Measure	Standard
Decisions recorded with reasoning	100%
Referred files decided within service level	Above ____%
Quality-check sample of delegated clearances	____ files per shift, 100% completed
Suspicion referrals to the Head Internal Compliance	Measured for coverage. Under-referral is the failure mode
Decision consistency with other shifts on comparable facts	Variance below ____%
ReKYC decisions recorded on overdue clients	100%
Handover completeness	100%

No performance measure for this role is linked to order volume, transaction value, onboarding throughput, approval rate or turnaround alone, and none may be introduced. Targets marked ____ are set by the Head Internal Compliance.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- One Internal Compliance Officer covers each shift. The additional half hour in the Officer's day is rostered to cover handover to the incoming Officer.

Qualifications and Experience

Essential

- Bachelor's degree in any discipline; a law, commerce or finance qualification is an advantage.
- Three years or more in KYC, AML or transaction monitoring at a bank, non-banking financial company, fintech or exchange, including at least one year making or supporting onboarding decisions.
- Working knowledge of the money laundering prevention framework and KYC obligations.

- Ability to write a decision that another person can follow and defend months later.
- Willingness to work rotational shifts including the night shift.
- Clear background verification.

Preferred

- Virtual digital asset or payments sector experience.
- CAMS or equivalent certification, or progress toward it.
- Experience supervising verification or review staff.

Competencies

- Holds a decision under commercial pressure, at any hour, without escalation becoming personal.
- Refers upward on uncertainty rather than resolving it to keep an order moving.
- Consistent: the same facts produce the same decision on Tuesday as on Saturday.
- Protects the team beneath from pressure rather than passing it down.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities, escalation obligations and authority limits set out in it, including the obligation to refer rather than conclude on suspicion.

Employee Name	_____	Designation	_____
Signature	_____	Date	_____

Ref: BVT/HR/JD/2026/019

Date: 03 September 2026

Job Description: KYC Executive

Supersedes the designation 'Team Leader, Compliance' · One position per shift

Designation	KYC Executive
Formerly	Team Leader – Compliance (title superseded)
Department	Compliance
Reporting To	Internal Compliance Officer (shift) – sole reporting line
Direct Reports	KYC Associates on the assigned shift
Function Line	KYC Executive → Internal Compliance Officer → Head Internal Compliance → Compliance Head → Chief Compliance Officer
Grade Level	Executive (supervisory tier)
Working Hours	8.5 hours, aligned to the assigned shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The KYC Executive is the point of contact between the Internal Compliance Officer and the KYC Associates. **The role is a channel, not a filter.** Every referral, alert, red flag and question raised by an Associate reaches the Internal Compliance Officer. The Executive may add context, return an incomplete file for completion, or check quality; the Executive may not decide that a referral is not worth passing on, and may not approve a file that the Associate could not approve.

Role Purpose

The KYC Executive runs the KYC desk during the shift: allocating work across the Associates, checking the quality of what they produce before it reaches the Internal Compliance Officer, routing referrals upward promptly, and holding the Associates to the verification standard. The role exists so that the Internal Compliance Officer spends the shift deciding rather than chasing.

Key Responsibilities

1. Referral Routing and Escalation

- Route every referral, alert and red flag raised by a KYC Associate to the Internal Compliance Officer, complete and unaltered, within the time set for that category.
- **Do not assess whether a referral is justified before passing it on.** Where the Executive believes the concern is unfounded, that view is recorded alongside the referral, not substituted for it.
- Prioritise referrals by urgency so that a suspicion does not sit behind a queue of routine files.
- Report to the Internal Compliance Officer immediately any request from Operations, Client Relations or Payment Operations to clear, expedite or set aside a check, and shield the Associate from that request.

2. Work Allocation and Desk Supervision

- Allocate onboarding files, video KYC sessions, alert reviews and ReKYC work across the Associates by capacity and certification.
- Monitor the shift queue: files pending decision, video KYC sessions scheduled, alerts unreviewed, ReKYC overdue.
- Ensure no file sits beyond the service level without either a decision or an escalation, and report a backlog rather than compressing the depth of review to clear it.
- Ensure no Associate handles client files without current compliance certification.

3. First-Level Quality Check

- Check a sample of files cleared by Associates under delegated authority each shift, against the checklist and the recorded reasoning.
- Return an incomplete or inconsistent file to the Associate for completion, recording what was missing.
- **Do not convert a return into an approval.** A file the Associate could not clear goes to the Internal Compliance Officer, whatever the Executive's own view of it.
- Review video KYC sessions against the checklist, including every session terminated or referred, and pass the terminated sessions upward.
- Report recurring quality gaps with the cause, so the training or the checklist is fixed rather than the file.

4. Coaching and Team Quality

- Coach Associates on the specific errors they make, at the time they make them.
- Identify any Associate whose quality-check accuracy is trending down and raise it before it becomes a finding.
- Support any Associate who has held or referred a file under pressure. An Associate criticised for referring will stop referring.
- Ensure Associates understand that raising a concern that proves unfounded is never treated as an error.

5. Coordination and Records

- Provide Operations and Client Relations with the compliance status of a client: cleared, pending, referred or rejected. State the status; do not explain the reasoning and do not negotiate it.
- Ensure the client section of the ERP is complete and current for files handled on the shift.
- Supply the External Compliance Officer and Quality Control with files, screening results and evidence on request, as they are and without comment.
- Complete a written handover to the incoming KYC Executive: files pending decision, referrals awaiting the Officer, video KYC sessions scheduled and ReKYC overdue.

Authority and Limits

- **May do independently:** allocate work; check quality; return an incomplete file to the Associate; prioritise the queue; record a view alongside a referral.
- **No authority** to approve a file outside the Associate's delegated threshold, to clear a referred file, to close an alert, or to decide that a matter is not reportable.
- **No authority** to withhold, delay or dilute a referral, or to instruct an Associate not to raise one.
- **Escalate to the Internal Compliance Officer:** every referral; every terminated video KYC; every backlog beyond service level; every attempt by any function to influence a decision.

Key Performance Indicators

Measure	Standard
Referrals routed upward within the set time	100%
Referrals altered, delayed or withheld	Zero
Quality-check sample completed each shift	___ files, 100% of shifts
Files decided or escalated within service level	Above ___%
Team quality-check accuracy on independent review	Above ___%
Team certification currency	100%
Handover completeness	100%

Routing integrity acts as a gate. Any confirmed instance of a referral being altered, delayed or withheld caps the grade for the period. No measure in this role is linked to order volume, clearance rate or turnaround alone.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- One KYC Executive covers each shift. The additional half hour in the day is rostered to cover handover.

Qualifications and Skills

Essential

- Graduate in any discipline.
- Two years or more in KYC, onboarding, document verification or transaction monitoring, including at least six months as a senior or supervising reviewer.
- Working knowledge of KYC obligations and AML red flags.
- Ability to check another person's work carefully and describe what is missing without ambiguity.
- Clear written English and Hindi.
- Willingness to work rotational shifts including the night shift.
- Clear background verification.

Attributes

- Passes a concern upward even when it seems unlikely to matter.
- Takes pressure off the Associates rather than passing it down.
- Coaches on the specific mistake, not on attitude.
- Comfortable telling a waiting function that a file is not ready.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and limits set out in it, and in particular that every referral raised by an Associate reaches the Internal Compliance Officer unaltered.

Job Description: KYC Associate

Compliance function · Three-shift rotational

Designation	KYC Associate
Department	Compliance
Reporting To	KYC Executive (shift) – sole reporting line
Function Line	KYC Executive → Internal Compliance Officer → Head Internal Compliance → Compliance Head
Function Head	Head Internal Compliance
Shift	Rotational across three shifts, 8 hours per shift
Location	Blynk Virtual Technologies Pvt. Ltd.

Position of the role. The KYC Associate reports solely to the KYC Executive on duty for the shift. **The Associate does not take instruction from Operations, Payment Operations or the Relationship team**, and no person outside the Compliance function may direct the Associate to clear, expedite or set aside a check. The Associate identifies and records. The KYC Executive routes upward without filtering, the Internal Compliance Officer assesses, and the Chief Compliance Officer determines suspicion. A request from any other function to move faster is itself reported to the KYC Executive.

Objective

The KYC Associate establishes and maintains the Company's knowledge of who its clients are, and watches what those clients actually do. The role verifies identity before a client transacts, conducts video verification on orders, monitors transactions against the Company's monitoring parameters, and keeps the KYC record complete and retrievable for as long as the law requires it.

The Associate is the Company's first detection layer. The value of the role is measured by what it catches, not by how many files it clears.

Key Responsibilities

1. Transaction Monitoring

- Monitor client transactions during the shift against the monitoring parameters, thresholds and scenarios set in the Company's AML and KYC Policy.
- Review every alert generated during the shift and record a written observation on each. An alert is never closed without a recorded reason.
- Watch for the listed typologies: structuring and value splitting, velocity spikes, dormant accounts becoming active, third-party funding, mismatch between stated purpose and observed activity, and repeated counterparties across supposedly unrelated clients.
- Refer every alert that meets or approaches a red flag through the KYC Executive to the Internal Compliance Officer. The Associate does not conclude that an alert is benign.
- Maintain the monitoring log for the shift: alerts raised, observations recorded, referrals made, and items carried forward.

2. Video KYC Execution

- Conduct video KYC sessions on orders as required by the Company's AML and KYC Policy.
- Confirm during the session that the person is live and present: the session must be live, not a recording, and not a session conducted by anyone other than the Associate.
- Require original documents to be shown during the live session and confirm they match the documents already on file.
- Confirm the client's location is within India and record the geotag or equivalent evidence where the process provides it.
- Ask the prescribed questions on identity, purpose of the transaction and source of funds, and record the answers as given, not as summarised.
- Retain the session recording and the completed checklist against the client record.
- Terminate and refer any session where the person is coached, prompted, reading from a script, appears under duress, or where another person is directing them off-camera.

3. KYC Verification and Filing

- Verify identity, address and, for non-individual clients, constitutional documents against the prescribed checklist.
- Check documents for tampering, reuse, mismatch of name or date, and inconsistency between documents.
- Perform sanctions, PEP and adverse media screening and record the result, including a nil result.
- Apply the customer risk categorisation set in the Policy and trigger enhanced due diligence where the criteria are met.
- Record the reason for every decision, including approvals. A cleared file with no recorded reasoning is an incomplete file.
- Complete onboarding decisions within the defined service level, without allowing the service level to compress the checks.

4. KYC Data Management and Records

- Maintain the client KYC record in the client section of the ERP: documents, screening results, risk category, video KYC evidence, decisions and review dates.
- Order and transaction entries in the purchase and sales section are maintained by the Operations Associate. Do not create, edit or overwrite an entry in that section.
- Keep records complete and retrievable for the period prescribed under the PMLA framework, currently five years, and do not delete or overwrite a superseded document. Supersession is recorded; it is not erasure.
- Ensure every record is legible, correctly indexed to the client, and produceable on request without reconstruction.
- Correct data quality gaps identified in review, and report recurring gaps to the KYC Executive so the source of the gap is fixed rather than the symptom.

5. Periodic Review and ReKYC

- Maintain the ReKYC calendar and initiate periodic updation on the schedule set for each risk category in the Policy.
- Initiate out-of-cycle ReKYC where a trigger occurs: a change in the client's declared business, a change of bank account or beneficiary, a jump in transaction pattern, an adverse media hit, or a change in risk category.

- Follow ReKYC through to completion and report clients whose updation is overdue, with ageing, to the KYC Executive.
- Do not allow a client whose ReKYC is overdue beyond the permitted limit to continue transacting without the Internal Compliance Officer's recorded decision.

6. Coordination Between Teams

Coordination is for obtaining and supplying records. It does not place the Associate under the direction of any other function.

- Supply the compliance status of a client to Operations and the Relationship team when asked: cleared, pending, or referred. The Associate states the status and does not negotiate it.
- Obtain the transaction trail and execution facts from Operations, and client records and communication history from the Relationship team, where these are needed for a review.
- Provide the KYC Executive and the Internal Compliance Officer with the file, evidence and observations required for any referral, escalation or reporting decision.
- Support the External Compliance Officer with KYC files, screening results and the recorded compliance position on any account under lien, freeze or external query.

7. Escalation and Red Flags

- **Refer through the KYC Executive to the Internal Compliance Officer immediately:** any suspicion however formed; third-party funding or payout; name or account mismatch; a sanctions, PEP or adverse media hit; a document that appears tampered or reused; a video KYC terminated for any reason; and any client or internal pressure to clear a file.
- **The Associate never clears a suspicion.** Where the Associate is unsure whether something is reportable, that uncertainty is itself the trigger to refer.
- Raising a concern that later proves unfounded is not an error. Failing to raise one is.

8. Confidentiality and Conduct

- Maintain strict confidentiality of client identity, documents, screening results and transaction history.
- Do not disclose to a client, or to any person outside the Compliance function, that a client is under review, has been referred, or has been the subject of a report. This obligation is absolute and continues after the employee leaves the Company.
- Do not store client documents, video recordings or screening results on a personal device or personal account.
- Disclose immediately any personal, family or financial relationship with a client, and take no part in that client's review.
- Do not accept any consideration, gift or benefit from a client or from any person in connection with a client's file.

9. Shift Handover and Reporting

- Submit a shift report: alerts reviewed, referrals made, video KYCs completed and terminated, files cleared and pending, and ReKYC initiated.
- Complete a written handover to the incoming Associate covering open alerts, pending files and referrals awaiting the Internal Compliance Officer's decision.
- Handover is completed at the change of shift and is part of the shift, not additional to it.

Authority and Limits

- **May clear independently:** standard-risk files below the value threshold set in the AML and KYC Policy, where every checklist item is clear, screening is nil, and documents are consistent.
- **Must refer through the KYC Executive to the Internal Compliance Officer for approval:** every file at or above the value threshold, every high-risk categorisation, every enhanced due diligence case, every screening hit, every document discrepancy, and every case where the Associate is not certain.
- **No authority** to waive a check, accept an incomplete file, override a risk categorisation, or extend a ReKYC deadline.
- **No authority** to close an alert as benign, or to decide that something is not reportable.
- **Takes no instruction** on a compliance matter from any person outside the Compliance function, at any level of seniority.

Performance Standards

Measure	Standard
Quality-check accuracy on sampled files	Above ____%
Documentation completeness on audit sample	100%
Alerts reviewed with a recorded observation	100%
Video KYC completed to the full checklist	100%
ReKYC initiated on calendar	____% within schedule
Onboarding decision within service level	____% of cases
Red flags referred	Measured for coverage. Under-reporting is the failure mode; over-reporting is never penalised.
Training and certification currency	100%

Targets marked ____ are set in the departmental KPI scorecard. No performance measure for this role is linked to order volume, transaction value, or the proportion of files cleared.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- Each KYC desk is supervised by the KYC Executive on duty, under the shift Internal Compliance Officer.
- Shifts rotate as published in the monthly roster. Weekly off is scheduled by roster and may fall on any day.

Eligibility and Skills

Essential

- Graduate in any discipline.
- One year or more in KYC, onboarding, document verification or transaction monitoring. Strong fresh graduates may be considered.

- A sharp eye for inconsistency between documents, and the patience to look for it on every file.
- Clear spoken Hindi and English, and the composure to run a video session with an unfamiliar person.
- Disciplined record-keeping and accurate written observation.
- Willingness to work rotational shifts including the night shift.
- Clear background and reference verification.

Preferred

- KYC or AML experience at a bank, NBFC, fintech or exchange.
- Familiarity with sanctions and adverse media screening tools.
- Exposure to video-based customer identification processes.
- Working knowledge of the PMLA framework and reporting obligations.

Attributes

- Willing to be the person who slows something down.
- Escalates rather than assumes, including when the answer is probably fine.
- Not persuadable by urgency, seniority or a client's frustration.
- Discretion. This role sees more about a client than anyone else in the Company.

Notes for HR and Management

This role must carry no throughput incentive. The Performance Standards deliberately exclude any measure linked to order volume, transaction value or clearance rate. The moment a KYC Associate is rewarded for files cleared or orders enabled, the check becomes a formality, and the first evidence of that appears in a regulatory inspection rather than in a scorecard. Weight the scorecard on accuracy and referral coverage.

Video KYC ownership needs resolving. The existing Relationship Manager description assigns video KYC execution to the Relationship Manager. This description assigns it to the KYC Associate under the Compliance function. Both cannot stand. Compliance is the correct owner, because the person conducting the verification should not also be the person holding the client relationship and the commercial outcome. The Relationship Manager description should be amended to remove it.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and conduct standards set out in it, including the obligation of confidentiality regarding client reviews and referrals.

Job Description: Head External Compliance

Compliance function · Liens, authorities and counsel

Designation	Head External Compliance
Department	Compliance
Reporting To	Compliance Head – sole reporting line The Chief Compliance Officer, where no Compliance Head is in post
Direct Reports	External Compliance Officers
Function Line	Head External Compliance → Compliance Head → Chief Compliance Officer
Grade Level	Senior management
Working Hours	8.5 hours, general shift, with field travel as required
Profile	Law graduate preferred
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Head External Compliance owns the Company's position with every external party that can restrict its operations: banks placing liens, law enforcement and cyber cells, regulators raising transaction queries, and retained counsel. **The role approves submissions made within an established position. Any new position, admission, undertaking or settlement goes to the Compliance Head before it is stated,** and to the Chief Compliance Officer or the Board where the matter requires.

Role Purpose

The Head External Compliance runs the external compliance function as a single caseload: allocating matters across the External Compliance Officers, holding the registers that show the Company's full external exposure, approving routine submissions, and turning recurring external problems into corrections at the point where they enter the business.

Key Accountabilities

1. Leadership of the External Compliance Officers

- Allocate cases across the External Compliance Officers by bank, authority, complexity and location, and rebalance when a caseload ages.
- Approve the brief for every field visit and appearance before an authority, and review the visit report the same day.
- Hold every officer to the standard that nothing is stated, admitted or committed beyond the approved brief.
- Develop the officers and maintain a named successor for each position.

2. Case and Register Governance

- Own the consolidated lien register, external correspondence register, legal matter register and recovery tracker across all officers.

- Review ageing weekly, and act on any case approaching a response deadline, hearing date or limitation date. A missed date is a reportable failure.
- Track total value under restriction, recovery achieved and the age of every open case, and report movement rather than only the balance.

3. Approval of External Submissions

- Approve the content of submissions and responses to banks and authorities that are made within an established position.
- Refer to the Compliance Head, before it is stated, any submission that takes a new position, makes an admission, gives an undertaking, or proposes a settlement.
- Ensure every communication to an external authority is retained with proof of dispatch.

4. Counsel and Advisors

- Coordinate retained counsel on active matters, and ensure officers brief counsel with complete factual material.
- Route any matter where privilege may become material to retained counsel from the outset.
- Refer the engagement or change of external counsel for approval through the Compliance Head and the Chief Compliance Officer to the Board.

5. Pattern Feedback

- Identify recurring sources of liens and freezes: counterparty types, channels, platforms and onboarding gaps.
- Report those patterns to the Head Internal Compliance and the Compliance Head so they are corrected at onboarding and in monitoring, not defended case by case.

6. Coordination and Reporting

- Obtain case material through the defined channels: bank-side facts from the Banking Officer, KYC files from the Head Internal Compliance, transaction records from Operations, and client records from Client Relations.
- Report to the Compliance Head on a fixed cycle: open liens by value and ageing, notices pending response, matters with counsel, recovery achieved, and patterns identified.
- Report any new lien above ___, any summons naming an officer or director, and any regulatory notice to the Compliance Head on the day it is received.

Authority and Limits

- **Approves:** case allocation; field briefs; submissions made within an established position.
- **Requires Compliance Head approval:** any new position, admission, undertaking or proposed settlement; any submission to a regulator.
- **Requires Board approval, through the Chief Compliance Officer:** engagement or change of external counsel; any settlement or payment to resolve a matter; any admission of liability.
- **Holds no authority** to commit the Company beyond an approved position, to release restricted funds, or to correspond with a bank on its relationship, which is held by the Banking Officer.

Key Performance Indicators

Measure	Standard
First documented response to a marking bank or authority	Within ___ hours

External notices answered within the stated timeline	100%
Missed hearing, filing or response dates	Zero
Liens released as a share of liens contested	Above ____%
Average ageing of open lien cases	Below ____ days
Value under restriction	Reducing quarter on quarter
Unauthorised statements or commitments by the team	Zero
Registers complete on audit sample	100%

Missed dates and unauthorised commitments act as gates. Either caps the grade for the period regardless of recovery performance. Targets marked ____ are set by the Compliance Head.

Qualifications and Experience

- LL.B. or equivalent law degree preferred; a commerce graduate with substantial lien and law-enforcement experience will be considered.
- Six years or more dealing with banks, law enforcement or regulators on account restrictions and notices, including at least two leading others.
- Precise drafting in English, and working Hindi for field and authority interaction.
- Composure and authority in adversarial settings.
- Enrolled or formerly enrolled advocate preferred. A practising advocate must cease practice on taking full-time employment.

Note for HR and Management

Approval is split by novelty, not by value. The officers draft, this role approves anything within an established position, and anything that sets a new position goes to the Compliance Head first. A position once stated to an authority is difficult to withdraw, and the first statement of it should therefore carry the most senior review, however small the amount involved.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and authority limits set out in it, including that no new position is stated before the Compliance Head has approved it.

Job Description: External Compliance Officer

Supersedes the designation 'Lien & Banking Officer'

Designation	External Compliance Officer
Formerly	Lien & Banking Officer (title superseded; scope revised)
Department	Compliance & Legal
Reporting To	Head External Compliance – sole reporting line
Function Line	External Compliance Officer → Head External Compliance → Compliance Head → Chief Compliance Officer
Functional Coordination	Banking Officer – bank relationships, account status, bank-side contacts and documentation Finance Manager – bank statements and financial data Operations Manager – transaction records and operational facts for a case Relationship Manager – client records and communication history on affected accounts Internal Compliance Officer – KYC files, risk categorisation and the internal compliance position Chartered Accountant – limited to matters arising from this role
Location	Blynk Virtual Technologies Pvt. Ltd., with field travel as required
Profile	Law graduate preferred

Position of the role. The External Compliance Officer is the company's standing interface with every external party that can restrict its ability to operate: banks, law enforcement and cyber cells, regulators, the Chartered Accountant and retained legal counsel. The role reports solely to the Head External Compliance. Functional coordination with other functions is for obtaining records, facts and documents required for a case; it does not create a reporting relationship in either direction. The role represents the company externally. It does not commit the company. Every position taken with an outside party is approved by the Head External Compliance before it is stated.

Objective

The External Compliance Officer exists to keep the company's banking channels operable and its external legal and regulatory position defensible. The role resolves liens, freezes and holds on company accounts by building a documented factual record, pursues recovery of restricted funds, and ensures that every notice, query or demand received from an outside authority is answered accurately and within time.

The role functions as the organisation's in-house legal interface. It prepares, coordinates and holds the company's external legal position, and instructs and supports retained counsel. It does not replace retained counsel and does not issue final legal opinions in place of it.

Key Responsibilities

1. Lien and Account Restriction Management

- Monitor and manage every lien, freeze, hold or debit restriction placed on any account of the company or its group entities.

- Establish the origin of each restriction on the day it is identified: the bank, the marking authority, the complaint or reference number, the amount, and the underlying transaction it relates to.
- Prepare and submit the company's response, with the transaction trail, KYC records, invoices and supporting evidence required to establish the bona fide character of the transaction.
- Pursue release through the bank's nodal officer, the concerned authority, and where required through retained counsel.
- Maintain a live lien register: account, amount marked, date, marking authority, reference, action taken, current status and ageing.
- Identify recurring patterns in lien exposure and report them to the Head External Compliance, so that the underlying onboarding or transaction practice can be corrected rather than repeatedly defended.

2. External Stakeholder Compliance

- Own the compliance interface with banks, payment partners, law enforcement agencies, regulators and any other external authority.
- Receive, log and acknowledge every external notice, summons, query or information request on the day it is received, and respond within the timeline stated in it.
- Ensure that no communication leaves the company to an external authority without the approval of the Head External Compliance, and that a retained copy with proof of dispatch is filed for every one.
- Maintain the register of external correspondence: authority, subject, date received, response due, date responded, outcome.
- Track every undertaking, assurance or commitment given to an external party, and confirm the company is meeting it.

3. Legal Interface and Coordination with Counsel

- Act as the company's standing point of contact for retained legal counsel and manage the working relationship with them.
- Prepare case briefs, chronologies, document sets and factual notes for counsel, so that counsel time is spent on advice rather than on assembling records.
- Review incoming notices, agreements and correspondence for legal exposure and flag the exposure to the Head External Compliance with a recommended course of action.
- Maintain the legal matter register and track every hearing date, response deadline and limitation date. A missed date is treated as a reportable failure.
- Escalate immediately any matter that creates litigation exposure, regulatory action, or personal liability of a director or officer.

4. Fund Recovery

- Pursue recovery of funds held in blocked, frozen, lien or delayed accounts to closure.
- Coordinate with banks, affected clients and internal teams to resolve stuck transactions on a documented basis.
- Report weekly on total value under restriction, recovery achieved, and ageing of each open case.

5. Banking Coordination

- Bank relationships, account administration and bank KYC documentation are held by the Banking Officer. This role draws on that relationship for lien, freeze and recovery matters, and does not run it.
- Obtain from the Banking Officer the account status, bank-side contacts and documentation required for a case.

- Report any change in the Company's banking standing observed in the course of a case to the Head External Compliance and the Banking Officer the same day.

6. Internal Coordination for Case Material

The Officer draws facts and records from these functions to build a case. The request is made to the function; the position taken on the case remains with this role and the Head External Compliance.

- **Finance Manager:** bank statements, transaction summaries, account documentation and financial data required for a submission.
- **Operations Manager:** the transaction trail, execution records and operational facts underlying a marked or disputed transaction.
- **Relationship Manager:** client records, communication history and correspondence on the affected account.
- **Internal Compliance Officer:** the KYC file, customer risk categorisation, screening results and the internal compliance position already recorded on the client.
- Where a function is unable to supply a record required to meet an external deadline, report it to the Head External Compliance the same day rather than submitting an incomplete response.

7. Coordination with the Chartered Accountant

This coordination is limited to matters arising from this role. It is not general finance support.

- Provide the Chartered Accountant with bank statements, transaction summaries, correspondence and documents relating to lien cases, frozen or restricted accounts, recovery matters and banking correspondence.
- Explain the factual and legal position on any restricted account or disputed amount that the CA is required to reflect or disclose.
- Obtain and route the CA's requirements on those matters, and close them within the CA's stated timeline.
- **Outside the scope of this role:** routine bookkeeping, accounting entries, GST and TDS filing, payroll, audit schedules and general financial documentation. These remain with Accounts and Finance and are not to be routed through this role.

8. Field Representation

- Attend banks, police stations, cyber cells, regulatory offices and courts as required for account resolution, lien removal, document submission or compliance verification.
- Carry proper written authorisation for every visit made on the company's behalf.
- Represent the company professionally before banking and regulatory authorities.
- Make no statement, admission or commitment beyond the brief approved by the Head External Compliance. Where a question falls outside the brief, record it and revert rather than answer.
- File a visit report on the same day, recording who was met, what was submitted, what was said and what was committed by either side.

9. Banking Instruments and Cash Handling

- Handle deposits, withdrawals or instrument submission only where physically required to complete a banking or regulatory task falling within this role.
- Every such movement requires prior written approval and a second approver. The acknowledgement, slip or receipt is filed the same day.
- Routine cash and treasury operations remain with Accounts and Operations and are not part of this role.

10. Recordkeeping and Reporting

- Maintain the lien register, external correspondence register, legal matter register, recovery tracker and field visit log, each current and audit-ready at all times.
- Submit a weekly report to the Head External Compliance covering open liens with ageing and value, external notices pending response, matters with counsel, and recovery status. A copy goes to the Finance Manager for the banking and recovery position.
- Report any new lien, freeze, notice or summons to the Head External Compliance on the day it is received, without waiting for the weekly cycle.

Authority and Limits

The External Compliance Officer represents the company. The role does not commit the company.

- **May do independently:** correspond with banks and authorities on matters already approved; attend and represent as briefed; request records from any function for a live matter.
- **Requires Head External Compliance approval:** the content of any submission or response to an external authority; any position stated on the company's behalf; any undertaking given to a bank or authority.
- **Requires Director approval:** engagement or change of external counsel; any settlement, compromise or payment to resolve a matter; any admission of liability.
- **Escalate to the Head External Compliance immediately:** any new lien or freeze; any summons, notice or law enforcement contact; any request for a personal statement from an officer or employee; anything touching the personal liability of a director.
- **Raise with the Banking Officer:** account status, banking documentation and bank-side contacts. **Raise with the Finance Manager:** any requirement for financial data or statements.

Performance Standards

Measure	Standard
First documented response to a marking bank or authority	Within ____ hours of the restriction being identified
External notices answered within the stated timeline	100%
Liens released as a share of liens contested	Above ____%
Average ageing of open lien cases	Below ____ days
Value under restriction	Reducing quarter on quarter
Register completeness on audit sample	100%
Missed hearing, filing or response dates	Zero
Unauthorised statements or commitments to external parties	Zero

Targets marked ____ are to be set in the departmental KPI scorecard and reviewed each quarter.

Eligibility and Skills

Essential

- LL.B. or equivalent law degree preferred. A commerce or other graduate with demonstrated hands-on experience of bank liens, account freezes and law-enforcement correspondence will be considered.
- Three years or more of direct dealing with banks, law enforcement or regulatory authorities.
- Ability to read a notice and identify precisely what is being asked, under what authority, and by when.
- Strong drafting in English, and working Hindi for field and authority interaction.
- Willingness to travel at short notice, including outstation.
- Conduct and presentation suitable for representing the company before banking and regulatory authorities.
- Clear background verification.

Preferred

- Enrolled or formerly enrolled advocate.
- Direct experience of the cyber-crime complaint and account-marking process, including bank nodal officer channels.
- Exposure to the PMLA framework and to banking regulatory practice.
- Fintech, payments, or virtual digital asset sector background.

Attributes

- Composure in front of an authority, including under pressure and in adversarial settings.
- Documents everything, contemporaneously.
- Understands the limit of their own authority and does not exceed it to appear helpful.
- Discretion. This role sees the company's most sensitive exposure.

Notes for HR and Management

Advocates in full-time employment. Under the Bar Council of India Rules, an advocate on the rolls may not hold full-time salaried employment while continuing to practise. A candidate who is a practising advocate will need to intimate the Bar Council and cease practice on joining. A law graduate who is not enrolled, or who has already suspended practice, is unaffected. This should be clarified with the candidate before the offer is released.

This role does not replace retained counsel. Communications with a full-time employee are generally not treated as privileged in the way communications with retained external counsel are. Any matter where privilege may become material should be routed to retained counsel from the outset, with this role instructing and supporting rather than substituting.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and conduct standards set out in it.

Employee Name	_____	Designation	_____

Job Description: Client Relationship Head

Client Relations function · Department head

Designation	Client Relationship Head
Department	Client Relations
Reporting To	General Manager – sole reporting line
Direct Reports	3 Relationship Managers, one per shift, with 2 Relationship Executives and their Relationship Associates beneath each
Grade Level	Senior management, department head
Working Hours	8.5 hours, with presence across all three shift timings as required
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Client Relationship Head owns the Company's client base: how it is segmented, serviced, retained and grown across all three shifts. The role carries the commercial objective for the client portfolio and therefore **holds no authority over compliance decisions and no ability to overturn a client refusal or hold**. Where the Head disagrees with a compliance outcome, the route is to the General Manager, never to the officer who made it.

Role Purpose

The Client Relationship Head builds and holds the Company's client franchise. The role designs the segmentation and service model, sets the standards the client experiences at any hour of the day, owns retention and growth of the portfolio, and leads a three-shift client-facing function through its Relationship Managers.

The role is expected to build. The segmentation framework, the service standards, the grievance governance and the client MIS are designed by this role, not inherited by it.

Scope and Scale

Dimension	Scale
Team	3 Relationship Managers, 6 Relationship Executives and ____ Relationship Associates
Coverage	24x7 client coverage across three shifts
Portfolio	____ active clients across all segments
Commercial	Retention, repeat volume and portfolio value for the Company's client base

Key Accountabilities

1. Client Strategy and Segmentation

- Design and maintain the client segmentation framework: how clients are classified, what service standard each segment receives, and which segments the Company actively pursues.
- Define the service model for each segment: contact cadence, response standards, review frequency and the level at which the relationship is held.
- Review segmentation each quarter against actual client behaviour and value, and reallocate where the classification no longer fits.
- Propose client acquisition and development strategy to the General Manager with a commercial case and the risk position it creates.

2. Retention and Portfolio Growth

- Own retention across the whole client base, and repeat order volume and value from it.
- Track portfolio health by segment and shift, and act on decline early rather than reporting it late.
- Own the client loss analysis. Report the causes honestly, including where the cause sits inside the Company, and drive the fix with the function that owns it.
- Set and cascade retention and repeat-volume targets to each Relationship Manager with a stated basis.

3. Client Experience Standards

- Define and publish the service standards the client experiences: response times, communication standards, escalation routes and what may and may not be committed at each level.
- Monitor delivery against those standards across all three shifts, and correct variation between shifts. A client's experience must not depend on the hour they make contact.
- Own the client-facing content of communications, including what is said when a client is held or refused by Compliance.
- Reconcile the client-facing view with the operational view supplied by the Operations Head, so that the two pictures agree before either reaches the General Manager.

4. Grievance Governance

- Own the grievance framework: classification, timelines, ownership and closure standards.
- Act as the final internal authority on client grievances within the function, and escalate to the General Manager anything involving legal exposure, regulatory contact or a Company employee.
- Review grievance causes each month and drive corrective action into the function that caused them.
- Ensure no grievance is closed without the client being told the outcome.

5. Function Leadership

- Lead three Relationship Managers and their teams across a continuous shift operation.
- Set the KPI framework for the function, ensure every measure is drawn from a system record, and supply verified data to HR for the appraisal and incentive cycle.
- Plan capacity and rostering with the Relationship Managers and HR so that every shift is staffed to its minimum viable strength.
- Own retention within the team, and ensure the night shift is not treated as a posting of last resort.
- Build the bench: maintain a named successor for every Relationship Manager position.

6. Client MIS and Reporting

- Own the client MIS: portfolio composition, activity, retention, repeat volume, grievance trends and service level performance by segment and shift.
- Deliver the reporting pack to the General Manager on a fixed schedule and in a fixed format, whether or not the numbers are favourable.
- Maintain the definition behind every metric so that a measure means the same thing in every period.

7. Compliance Posture of the Function

- Ensure every Relationship Manager, Relationship Executive and Associate passes compliance observations to Compliance unaltered and without delay, and that this is measured rather than assumed.
- Ensure no member of the function seeks to persuade, hurry or work around a compliance hold, refusal or referral.
- Ensure client-facing staff disclose nothing to a client about the reason for a compliance decision.
- Ensure the function's training and certification obligations are met in full and refreshed on schedule.

Key Interfaces

Function	Purpose of the interface
General Manager	Reporting line: strategy, targets, approvals, escalation
Operations Head	Rates and availability, execution performance, client experience causes
Compliance Head	Client holds and refusals, function compliance posture, training
Head of Liquidity & Settlements	Payment and payout service levels affecting clients
Finance Manager	Client-level value, receivables and commercial reporting
HR Manager	Rostering, capacity, appraisal, training and retention

Authority and Limits

- **Approves:** segmentation and reallocation within the framework; service standards for the function; commercial concessions within the matrix approved by the General Manager; work allocation and rosters within approved headcount.
- **Requires General Manager approval:** the pricing or concession matrix itself; headcount changes; any new client segment or acquisition channel; any written commitment to a client outside standard terms.
- **Holds no authority over** compliance decisions, KYC clearance, customer risk categorisation, order release or payment release. A disagreement with a compliance outcome is raised with the General Manager, not with the officer who made the decision.
- **Escalate to the General Manager:** loss of a material client; any threatened legal action, platform escalation or regulatory contact; any pattern of compliance refusals materially affecting the client base; any instance of a compliance observation being withheld within the function.

Key Performance Indicators

Measure	Standard
Client retention across the base	Above ____%
Repeat order volume and value	____% of target
Portfolio growth by target segment	____% of plan
Service standard adherence, consistent across shifts	Above ____%, variance between shifts below ____%
Grievances resolved within timeline	Above ____%
Grievance recurrence on the same cause	Below ____%
Client MIS delivered on schedule	100%
Compliance observations passed on unaltered	100%
Voluntary attrition within the function	Below ____%

The compliance measure operates as a gate. Any confirmed instance of an observation being withheld, delayed or diluted within the function caps the grade for the period regardless of commercial performance. Targets marked ____ are set in the departmental KPI scorecard.

Qualifications and Experience

Essential

- Bachelor's degree; a Master's degree in management, marketing or a related field preferred.
- Seven years or more in client relationship management, key account management or client servicing, including at least three leading a team through subordinate managers.
- Demonstrated ownership of a client portfolio with retention and growth accountability.
- Experience designing a segmentation or service model rather than administering one.
- Experience leading a continuous shift-based client-facing function.
- Excellent written and spoken English and Hindi.

Preferred

- Fintech, payments, broking, exchange or financial services background.
- Exposure to AML and KYC obligations as they constrain a client-facing function.
- Experience building client MIS and reporting frameworks.

Competencies

Core

- Integrity: does not trade a control for a client.
- Ownership: reports the number that is true, on schedule.
- Judgement in balancing commercial value against risk exposure.

Functional

- Segmentation and service model design.
- Commercial and pricing judgement within a governed matrix.
- Grievance governance and root-cause driven correction.

- MIS design and data literacy.

Leadership

- Leading through managers rather than around them.
- Building structure that does not depend on personal availability.
- Developing successors and holding a bench.
- Accepting a compliance refusal without relitigating it through the people who issued it.

Development Path

The Client Relationship Head position develops toward General Manager. Progression is assessed on portfolio outcomes, the strength of the management bench built beneath the role, and a clean record on the compliance interface.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities, escalation obligations and authority limits set out in it, including the limits on compliance decisions.

Job Description: Relationship Manager

Client Relations function · One position per shift

Designation	Relationship Manager
Also referred to as	Client Relationship Manager
Department	Client Relations
Reporting To	Client Relationship Head – sole reporting line
Direct Reports	2 Relationship Executives on the shift, and the Relationship Associates beneath them
Grade Level	Middle management
Working Hours	8.5 hours, aligned to the assigned shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Relationship Manager owns the client relationship on the shift and leads the Relationship Associates who service it. The role carries a retention and growth objective. **For that reason the role holds no authority over compliance decisions**, and may not delay, dilute or decline to pass on a compliance observation raised by an Associate. Where a client is held or refused by Compliance, the Relationship Manager manages the client conversation; the Relationship Manager does not reopen the decision.

Role Purpose

The Relationship Manager is accountable for the quality, continuity and commercial value of the Company's client relationships during the assigned shift. The role converts a completed first order into a retained client, originates and shepherds repeat business, owns client grievances through to resolution, and supervises the Relationship Associates who carry the day-to-day contact.

Scope and Scale

Dimension	Scale
Client portfolio	___ active clients on the assigned shift
Team	2 Relationship Executives and ___ Relationship Associates, purchase side and sales side
Coverage	One of three shifts providing 24x7 client coverage
Commercial	Repeat order volume and retention for the assigned portfolio

Key Accountabilities

1. Client Relationship Ownership

- Own the assigned client portfolio for the shift: know the clients, their transaction patterns, their preferences and their history with the Company.
- Apply the segmentation framework set by the Client Relationship Head, and service each client to the standard defined for their segment.
- Maintain relationship continuity across shifts, so that a client dealing with the Company at any hour receives a consistent position and does not repeat themselves.
- Conduct structured client reviews on the defined cadence for higher-value segments, and record what was discussed and committed.

2. Repeat Order Origination

- Originate repeat business from the existing portfolio: identify clients due to transact, initiate contact and convert.
- Obtain current rates and quantity availability from Operations through the defined channel before quoting anything to a client.
- Route every repeat order through KYC verification before it is passed to Operations for processing. No repeat order bypasses verification on the ground that the client is known.
- Hand the order to Operations cleanly, with the client-side information required to process it.
- Quote only within the rate band and terms confirmed by Operations. Do not commit a rate, a timeline or an exception independently.

3. Team Leadership on Shift

- Allocate clients and workload across the two Relationship Executives and their desks, by capacity and capability.
- Supervise, through the Relationship Executives, the quality of client interaction: response times, accuracy of information given, and adherence to the rule that no Associate commits terms.
- Coach the Relationship Executives, and through them the Associates, on specific errors rather than general standards.
- Hold the shift handover: open grievances, clients awaiting response, orders in progress, and anything referred and awaiting a decision.
- Ensure every Associate completes assigned training and holds current certification.

4. Grievance Ownership

- Own every grievance escalated by an Associate, and every grievance raised directly to the Relationship Manager.
- Investigate with the function that holds the facts, resolve within the defined timeline, and confirm resolution with the client.
- Escalate to the Client Relationship Head any grievance unresolved within the timeline, any grievance involving a Company employee, and any grievance likely to result in a platform complaint or a regulatory contact.
- Maintain the grievance register for the shift, with cause analysis rather than only outcome.

5. Retention and Growth

- Monitor portfolio activity and act on decline before the client stops transacting, not after.

- Identify the reason for every client loss and report it honestly, including where the cause sits inside the Company.
- Identify growth opportunity within the existing portfolio and propose it to the Client Relationship Head with a commercial rationale.
- Report on retention, activity and portfolio value on the defined reporting cycle.

6. Compliance Interface

- Carry to Compliance, without alteration or delay, every compliance-relevant observation reported by a Relationship Executive or a Relationship Associate.
- **Do not assess, filter, weigh or resolve a compliance observation.** The commercial value of the client is never a factor in whether an observation is passed on.
- Do not seek to persuade, hurry or work around a Compliance hold, refusal or referral, and do not ask an Associate to do so.
- Where a client is held or refused, manage the client communication within the position agreed with Compliance, disclosing nothing about the reason for the decision.
- Complete all assigned AML and KYC training and ensure the shift team does the same.

Key Interfaces

Function	Purpose of the interface
Client Relationship Head	Reporting line: targets, segmentation, escalation, approvals
Operations (Operations Executive / Operations Manager)	Rates, quantity availability, order status, execution issues
KYC Associate and Internal Compliance Officer	Client verification status; receiving holds and decisions
Payment Operations	Payment and payout status affecting a client conversation
External Compliance Officer	Client records and history where an account is under external query
HR	Rostering, training, appraisal and team matters

Authority and Limits

- **Approves:** client allocation and workload across Associates on the shift; routine service gestures within the published matrix; the content of routine client communication.
- **Requires Client Relationship Head approval:** any commercial concession or exception; any rate or term outside the published band; any client segment reassignment; any written commitment to a client.
- **Holds no authority over:** KYC clearance, customer risk categorisation, compliance referrals or decisions, payment release, or order release. These sit with Compliance, Payment Operations and Operations respectively.
- **Escalate to the Client Relationship Head:** grievances beyond timeline; any threat of platform complaint, legal action or regulatory contact; loss of a material client; any request from another function to withhold a compliance observation.

Key Performance Indicators

Measure	Standard
Client retention across the assigned portfolio	Above ____%
Repeat order volume from the portfolio	____% of target
Grievances resolved within timeline	Above ____%
Grievance recurrence on the same cause	Below ____%
Client response time on the shift	Within ____ minutes
Compliance observations passed on unaltered	100%
Unauthorised commitments to clients	Zero
Team certification and training currency	100%

Passing on compliance observations operates as a gate. Any confirmed instance of an observation being withheld, delayed or diluted caps the grade for the period regardless of commercial performance. Targets marked ____ are set in the departmental KPI scorecard.

Qualifications and Experience

Essential

- Bachelor's degree in any discipline. A postgraduate qualification in management is an advantage.
- Four years or more in client relationship management, key account management or client servicing, including at least one year supervising a team.
- Demonstrated ownership of a client portfolio with a retention or growth objective.
- Fluent spoken and written Hindi and English.
- Willingness to work rotational shifts, including the night shift.
- Clear background and reference verification.

Preferred

- Fintech, payments, broking, exchange or financial services background.
- Exposure to KYC and AML obligations from a client-facing standpoint.
- Experience managing clients through a compliance refusal or a service failure.
- An additional regional language.

Competencies

Core

- Integrity: passes on what must be passed on, including when it costs a client.
- Accountability: owns the outcome of the shift rather than the effort put into it.
- Client orientation balanced against the Company's risk position.

Functional

- Relationship management and consultative client conversation.
- Commercial judgement within a defined band.
- Grievance investigation and root-cause analysis.

- Data literacy sufficient to read portfolio activity and spot decline.

Leadership

- Coaching and developing Associates on specifics.
- Composure under client pressure, and the ability to hold a position without escalating a conversation.
- Delegating without losing sight of quality.

Development Path

The Relationship Manager position develops toward Client Relationship Head. Progression is assessed on portfolio outcomes, the development of Associates into Relationship Manager readiness, and a clean record on the compliance interface. A named successor is expected to be identified and developed within the shift team.

Notes for HR and Management

Video KYC has been removed from this role. The superseded Relationship Manager description assigned video KYC execution to this position. It now sits with the KYC Associate under Compliance. A person who holds the client relationship and a retention target should not also be the person verifying that client's identity.

The 8.5-hour manager day resolves the handover gap. The three shifts run back to back with no overlap, while every operating description requires a written handover. If the Relationship Manager's additional half hour is rostered at the end of the shift, it covers changeover without anyone working unpaid time. The same applies to the Operations and Payment Operations supervisory layers.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities, escalation obligations and authority limits set out in it, and in particular the obligation to pass on compliance observations unaltered.

Job Description: Relationship Executive

Supersedes the designation 'Team Leader, Client Relations' · Two positions per Relationship Manager

Designation	Relationship Executive
Formerly	Team Leader – Client Relations (title superseded)
Department	Client Relations
Reporting To	Relationship Manager (shift) – sole reporting line
Direct Reports	Relationship Associates on the assigned desk, purchase side and sales side
Function Line	Relationship Executive → Relationship Manager → Client Relationship Head
Grade Level	Executive (supervisory tier)
Working Hours	8.5 hours, aligned to the assigned shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Relationship Executive supervises the Relationship Associates on the desk and is the first point of escalation for everything they raise. **Compliance observations reported by an Associate are carried upward unaltered**, whatever the commercial value of the client. The Relationship Executive may not commit a rate, a timeline or an exception, and may not resolve or dismiss a compliance concern.

Role Purpose

The Relationship Executive runs the client desk during the shift: allocating clients across the Associates, holding the quality of every client interaction, taking escalations off the Associates at the moment they arise, and handing the desk over documented and complete.

Key Responsibilities

1. Desk Supervision

- Allocate clients and workload across Associates by capacity and capability, balancing purchase-side and sales-side coverage for the shift.
- Monitor the quality of client interaction: response times within the shift standard, accuracy of information given, and adherence to the rule that no Associate commits terms.
- Monitor client record quality in the ERP: updated the same day a change is reported, complete and audit-ready.
- Ensure no Associate handles client accounts without current certification.

2. First Response and Escalation

- Take every escalation raised by an Associate and act on it or pass it to the Relationship Manager. Do not return an escalation to the Associate to resolve.
- Act as first responder on client dissatisfaction, disputed orders, delayed payouts and service failures on the shift.

- **Carry compliance observations to the Relationship Manager unaltered and without delay**, for onward routing to Compliance. Do not weigh, filter or resolve a compliance observation, and never let the value of the client bear on whether it is passed on.
- Escalate to the Relationship Manager without delay: any threat of platform complaint, legal action or regulatory contact; any grievance beyond timeline; any client pressure on an Associate to bypass a step.

3. Grievance Handling

- Ensure every grievance is logged at the point of receipt, including those raised verbally, and acknowledged to the client.
- Resolve routine grievances within the defined timeline and confirm resolution with the client.
- Escalate anything unresolved, ageing, or involving a Company employee to the Relationship Manager.
- Maintain the desk's grievance record with cause, not only outcome.

4. Repeat Order Support

- Support Associates on repeat orders: obtaining current rates and quantity availability from Operations through the defined channel before anything is quoted to a client.
- Ensure every repeat order is routed through KYC verification before it goes to Operations for processing. A known client is not an exception.
- Quote and permit quoting only within the rate band and terms confirmed by Operations.
- Track repeat orders in progress and flag anything stuck at a stage beyond the defined time.

5. Coaching and Handover

- Coach Associates on the specific errors they make, at the time they make them.
- Support any Associate who has escalated or held something under pressure from a client.
- Complete a written handover to the incoming Relationship Executive: open grievances, clients awaiting response, orders in progress and anything referred and awaiting a decision.
- Report desk performance to the Relationship Manager: interactions, grievances, escalations, repeat orders and open items.

Authority and Limits

- **May do independently:** allocate clients and workload; resolve routine grievances within the published matrix; approve routine client communication on published terms.
- **Requires Relationship Manager approval:** any commercial concession or exception; any rate or term outside the confirmed band; any written commitment to a client.
- **Holds no authority over** KYC clearance, compliance decisions, order release or payment release, and may not instruct a KYC Associate, KYC Executive, Operations Associate or Payment Operations Associate.
- **No authority** to withhold, delay or dilute a compliance observation, or to instruct an Associate not to raise one.

Key Performance Indicators

Measure	Standard
Compliance observations carried upward unaltered	100%
Client response time on the desk	Within ____ minutes
Grievances logged on the day of receipt	100%
Grievances resolved within timeline	Above ____ %
Client record completeness on audit sample	100%
Repeat orders routed through KYC verification	100%
Unauthorised commitments to clients	Zero
Handover completeness	100%

Carrying compliance observations upward acts as a gate. Any confirmed instance of an observation being withheld, delayed or diluted caps the grade for the period regardless of client outcomes.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- Two Relationship Executives work under each shift Relationship Manager. The additional half hour in the Relationship Executive's day is rostered to cover handover.

Qualifications and Skills

Essential

- Graduate in any discipline.
- Two years or more in client servicing, relationship management or customer support, including at least six months supervising or acting as senior on a desk.
- Fluent spoken and written Hindi and English.
- Composure with a dissatisfied or pressuring client.
- Willingness to work rotational shifts including the night shift.
- Clear background verification.

Attributes

- Takes an escalation off an Associate rather than sending it back.
- Passes a compliance observation upward without weighing the client's value.
- Says they will check and revert rather than committing on the spot.
- Coaches on the specific mistake, not on attitude.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and authority limits set out in it, and in particular the obligation to carry compliance observations upward unaltered.

Employee Name	_____	Designation	_____
Signature	_____	Date	_____

Job Description: Relationship Associate

Purchase Side | Sales Side · Three-shift rotational

Designation	Relationship Associate (RA)
Department	Client Relations & Compliance
Reporting To	Relationship Executive (shift) – sole reporting line
Function Line	Relationship Executive → Relationship Manager → Client Relationship Head
Positions	Relationship Associate (Purchase Side) and Relationship Associate (Sales Side)
Shift	Rotational across three shifts, 8 hours per shift, providing 24x7 desk coverage
Location	Blynk Virtual Technologies Pvt. Ltd.

Reporting Line. The Relationship Associate reports solely to the Relationship Executive. All work allocation, instructions, queries, escalations and reporting pass through the Relationship Executive. The Associate does not report to, and does not take direct instruction from, any other manager or department. Where a matter concerns Operations or Compliance, the Associate raises it with the Relationship Executive, who carries it to the relevant function.

Objective

The Relationship Associate is the Company's first and most frequent point of contact with the client. The role exists to hold the client relationship, compile and maintain accurate client records, receive and route client grievances, and act as the working link between the Operations desk and the Compliance function.

The Relationship Associate does not execute trades and does not clear compliance decisions. The responsibility of the role is to ensure that the information each of those functions requires reaches the Relationship Executive accurately, completely and without delay, so that it can be acted upon by the correct function.

Key Responsibilities

1. Client Engagement and Communication

- Serve as the day-to-day point of contact for assigned clients across calls, chat and approved messaging channels.
- Respond to client queries within the defined response time for the assigned shift.
- Communicate professionally and in line with Company policy at all times. Do not commit rates, timelines or exceptions that have not been confirmed by the Relationship Executive.
- Maintain relationship continuity across shifts through documented handover, so that a client is not required to repeat information already provided.

2. Client Data Compilation and Record Maintenance

- Collect, check for completeness and record client profile data, contact details, registered bank and wallet details, and transaction preferences in the ERP.

- Update any change in bank account, contact details or business profile on the same day it is reported by the client.
- Keep every assigned client file complete and audit-ready at all times.
- Capture all client information within the ERP. Client details must not be held in personal notes, personal devices or informal channels.

3. Grievance Handling

- Receive, log and acknowledge every client grievance at the point of receipt, including grievances raised verbally.
- Classify each grievance by type and severity and route it to the responsible function within the defined timeline.
- Follow the grievance through to closure and confirm the resolution with the client.
- Escalate any grievance that is unresolved or ageing beyond the defined limit to the Relationship Executive.
- Maintain the grievance register in a form suitable for internal review and audit.

4. Liaison Between Operations and Compliance

- Provide the Relationship Executive with the client-side information required for order execution: confirmations, payment details, timing and client instructions. The Relationship Executive carries this to the Operations desk.
- Report to the Relationship Executive every compliance-relevant observation arising from the client interaction: name mismatches, third-party involvement, reluctance to provide documentation, inconsistent stated purpose, or any listed red flag. The Relationship Executive carries the matter to the Compliance function.
- Confirm that a client's compliance status is complete before the client is progressed for transaction.
- Report compliance observations exactly as observed. The Relationship Associate must not assess, filter, resolve or dismiss a compliance concern, and must not attempt to settle it directly with Operations or Compliance.

5. Order Support and Coordination

- Track assigned client orders from initiation to completion and update the client at each defined stage.
- Follow up with the client for confirmations, documents or details that are holding an order.
- Request real-time execution support through the Relationship Executive. The Associate does not task Operations Associates directly.
- Flag delayed, stuck or disputed orders immediately rather than at the end of the shift.

6. Compliance Support

- Confirm KYC and documentation status before a client is progressed for any transaction.
- Assist the Compliance function by obtaining documents, clarifications and declarations from the client.
- Support video KYC scheduling, client preparation and follow-up in coordination with the Relationship Executive.
- Complete all assigned KYC and AML training and maintain certification currency. An uncertified Associate may not handle client accounts.

7. Confidentiality and Conduct

- Maintain strict confidentiality of client identity, documents, transaction history and internal pricing.
- Do not store, transfer or transmit client data on personal devices, personal accounts or any unauthorised channel.

- Disclose immediately any personal, family or financial relationship with a client or prospective client.
- Do not accept any consideration, gift or benefit from a client in any form.

8. Reporting and Shift Handover

- Submit a shift report covering client interactions, grievances logged, escalations raised and orders pending.
- Complete a written handover to the incoming Relationship Associate, with all open items acknowledged by the receiving Associate.
- Maintain documentation to a standard that supports internal review, statutory audit and regulatory inspection.

Role Split: Purchase Side and Sales Side

The Relationship Associate function is staffed in two legs. Both legs share the responsibilities set out above. The responsibilities below are specific to each leg and reflect the different risk profile of each transaction direction.

Convention used in this document: **Purchase Side** covers clients purchasing digital assets from the Company, where funds flow inward. **Sales Side** covers clients selling digital assets to the Company, where payouts flow outward.

Relationship Associate – Purchase Side

- Guide the client through the purchase flow: quote confirmation, payment instruction, funds transfer and delivery confirmation.
- Confirm that the client is paying from their own verified and registered account. Escalate any third-party payment, name mismatch or split payment to the Relationship Executive before the order is progressed, and do not proceed until instructed.
- Obtain source-of-funds information where the client's risk category requires it.
- Watch for purchase-side red flags: a sudden change in transaction size, funding from a newly added account, unexplained urgency, or reluctance to state the purpose of the transaction.
- Communicate a delivery timeline to the client only after receipt and verification of funds has been confirmed.

Relationship Associate – Sales Side

- Guide the client through the sale flow: quote confirmation, asset transfer and payout.
- Verify that the beneficiary bank account is registered to the client and matches KYC records. Do not accept or forward a payout instruction to a third-party account under any circumstance.
- Explain the applicable tax deduction at source under Section 393 of the Income-tax Act, 2025 (formerly Section 194S), and confirm that the client's PAN is on record before payout is processed.
- Watch for sales-side red flags: newly added beneficiary accounts, requests to split a payout across accounts, payout instructions in another name, or inbound assets from an unexplained source.
- Obtain payout status and timing from the Relationship Executive. Do not commit a payout time that has not been confirmed through the Relationship Executive.

Escalation and Authority

The Relationship Associate holds no independent approval authority. No transaction, exception, waiver or release may be approved by this role.

Every escalation is raised with the Relationship Executive. The Associate reports the matter; the Relationship Executive decides where it goes and carries it there. The Associate does not approach

Operations or Compliance directly.

- **Raise immediately, within the same interaction:** any third-party payment or payout instruction, name mismatch, listed red flag, client pressure to bypass a required step, or any suspicion however formed.
- **Raise within the shift:** order delays, payment or payout failures, rate queries and platform issues.
- **Raise as they arise:** grievances unresolved within the defined timeline, client dissatisfaction, and workload or capacity constraints.

Uncertainty is itself a ground for escalation. A Relationship Associate is never expected to resolve a doubt alone, and raising a concern that later proves unfounded is not treated as an error.

Single statutory exception

Where the Associate forms a suspicion relating to money laundering or terrorist financing and is unable to raise it with the Relationship Executive, or believes the matter has been obstructed, the Associate may report it directly to the Chief Compliance Officer as Principal Officer. No person may prevent, delay or penalise such a report. This is an obligation under the Company's AML and KYC Policy. It is not a route for routine escalation and does not create a second reporting line.

Performance Standards

Measure	Standard
First response to client within shift	Within ____ minutes
Grievances logged on the day of receipt	100%
Client record completeness on audit sample	100%
Compliance observations escalated	Measured for coverage. Under-reporting is the failure mode; over-reporting is not penalised.
Shift handover completeness	100%
Client retention across assigned portfolio	Above ____%
Training and certification currency	100%

Targets marked ____ are to be set in the departmental KPI scorecard and reviewed each quarter.

Shift Structure

Shift	Timing	Duration	Coverage
Morning	09:00 to 17:00	8 hours	Purchase and Sales Side
Evening	17:00 to 01:00	8 hours	Purchase and Sales Side
Night	01:00 to 09:00	8 hours	Purchase and Sales Side

- Each desk is led by the Relationship Executive on duty, under the shift Relationship Manager. Shifts rotate as published in the monthly roster.
- Handover is completed at the change of shift and is part of the shift, not additional to it. An Associate may not leave the desk until the incoming Associate has acknowledged the open items in writing.
- Weekly off is scheduled by roster and may fall on any day of the week.

Eligibility and Skills

Essential

- Graduate in any discipline.
- One year or more in client servicing, relationship management, customer support or back-office operations. Strong fresh graduates may be considered for the Purchase Side.
- Fluent spoken and written Hindi and English.
- Working computer literacy: ERP or CRM systems, spreadsheets and messaging platforms.
- Willingness to work rotational shifts, including night shifts and weekends.
- Clear background and reference verification.

Preferred

- Experience in fintech, payments, banking, broking or exchange operations.
- Prior exposure to KYC or AML processes.
- An additional regional language.

Attributes

- Composure with a dissatisfied or pressuring client.
- Accuracy in recording detail, and the discipline to record it at the time it is received.
- Willingness to escalate rather than improvise.
- Personal integrity. This role sits between the client and the Company's funds, and is trusted accordingly.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and conduct standards set out in it.

Employee Name	_____	Designation	_____
Signature	_____	Date	_____
Approved by (Relationship Executive)	_____	Date	_____
Recorded by (HR)	_____	Date	_____

Ref: BVT/HR/JD/2026/026

Date: 03 September 2026

Job Description: Marketing Head

Marketing function · Function head

Designation	Marketing Head
Department	Marketing
Reporting To	General Manager – sole reporting line
Direct Reports	Marketing team (___ positions)
Grade Level	Senior management, function head
Working Hours	8.5 hours, general shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Marketing Head owns how the Company presents itself publicly. **Every external communication carrying a claim about the Company's services, pricing, regulatory standing or performance requires compliance clearance before publication.** Marketing in a virtual digital asset business is regulated territory: a claim that cannot be substantiated is not a marketing problem, it is a regulatory one.

Role Purpose

The Marketing Head builds and holds the Company's brand and market presence, generates qualified demand for its services, and ensures that everything published in the Company's name is accurate, substantiated and cleared. The role is separate from Client Relations: Client Relations owns clients the Company already has; Marketing owns how the Company is seen by those it does not.

Key Accountabilities

1. Brand and Positioning

- Own the Company's positioning, brand standards and visual identity, and ensure consistent application across every channel and document.
- Maintain the messaging framework: what the Company says it does, for whom, and on what evidence.
- Own the Company's presence on professional and social channels, the website and any published material.
- Ensure brand assets used by other functions, including letterheads, decks and client-facing documents, follow the standard.

2. Content and Campaigns

- Plan and deliver the content calendar across channels, aligned to the business priorities set by the General Manager.
- Commission, edit and publish content, and maintain the approval record for each item published.
- Plan and run campaigns with a stated objective, budget and measurement method agreed before spend is committed.
- Manage agencies, designers, contractors and platform spend within approved budget.

3. Demand Generation

- Generate qualified enquiries and hand them to Client Relations with the context required to act on them.
- Qualify against both commercial and compliance criteria. An enquiry that cannot pass onboarding is not a lead, and volume of enquiries is not a measure of success.
- Track the pipeline from enquiry through to first transaction, and report conversion honestly including where marketing-sourced enquiries fail at KYC.
- Maintain the enquiry record so that source attribution is verifiable rather than asserted.

4. Regulatory Discipline in Communication

- Obtain compliance clearance before publishing any claim about the Company's services, pricing, regulatory standing, registrations or performance.
- **Publish no forecast, guarantee or representation about returns, profit, price movement or investment outcome, in any channel, in any form.**
- Publish no client name, logo, testimonial, transaction detail or case study without that client's written consent and compliance clearance.
- Ensure no marketing material states or implies a regulatory approval, licence or registration the Company does not hold.
- Maintain a record of every published item with its approval, its date and its substantiation, so that any claim can be evidenced afterwards.

5. Employer Brand and Recruitment Support

- Support Human Resources on employer branding and the presentation of vacancies.
- Ensure job advertisements follow the approved external version of the role description and state nothing about compensation or terms that has not been approved.
- Maintain the Company's presentation as an employer consistently with how it presents to clients.

6. Reporting and Team

- Report to the General Manager on a fixed schedule: reach, engagement, enquiries, qualified enquiries, conversion and spend against budget.
- Measure what converts rather than what is visible. Reach without qualified enquiry is not a result.
- Lead, develop and plan capacity for the marketing team, and manage external suppliers to brief and budget.

Authority and Limits

- **Approves:** content, creative and campaign plans within the approved messaging framework and budget; supplier engagement within budget; brand standards.
- **Requires compliance clearance:** any claim about services, pricing, regulatory standing or performance; any use of a client name or case; any material referring to the Company's registrations.
- **Requires General Manager approval:** the marketing budget; any campaign outside the approved plan; any public statement on behalf of the Company; any response to a public complaint or media enquiry.
- **Holds no authority** to quote a rate, commit a service level, respond to a regulatory query, or speak for the Company on a compliance matter.

Key Performance Indicators

Measure	Standard
---------	----------

Qualified enquiries delivered to Client Relations	___ per quarter
Enquiry to first transaction conversion	Above ___%
Marketing-sourced enquiries failing at KYC	Below ___%
Published items with compliance clearance on record	100%
Unsubstantiated or uncleared claims published	Zero
Spend against approved budget	Within ___%
Brand standard adherence on audit of published material	Above ___%

Compliance clearance acts as a gate. Any uncleared or unsubstantiated published claim caps the grade for the period regardless of pipeline performance.

Qualifications and Experience

Essential

- Bachelor's degree; a marketing or management postgraduate qualification preferred.
- Five years or more in marketing, including at least two leading a function or a substantial part of one.
- Demonstrated ownership of demand generation measured on conversion rather than on reach.
- Strong written English; the ability to edit and to refuse to publish.
- Experience working within an approval or clearance process.

Preferred

- Financial services, fintech, payments or virtual digital asset sector marketing experience.
- Familiarity with the constraints on financial promotion and advertising standards.
- B2B and professional channel marketing experience.
- Design, analytics and marketing automation literacy.

Competencies

- Will not publish a claim the Company cannot evidence, however well it would perform.
- Measures on conversion, and reports a weak number on schedule.
- Works inside a clearance process without treating it as an obstacle.
- Separates the Company's voice from a personal one.

Notes for HR and Management

This role was previously combined with Client Relations in the single position 'Relationship / Marketing Head'. The two are now separate. Client Relations owns existing clients, retention and grievance; Marketing owns positioning, content and demand generation. Combined, the function is measured on two objectives that compete for the same attention, and the client-facing one always wins because it is urgent.

The compliance clearance requirement is not a formality. In a virtual digital asset business, a published claim about returns, regulatory standing or performance can create exposure that no disclaimer removes, and published material is durable evidence. The requirement to hold the approval record and the substantiation for every published item exists so that a claim made two years ago can still be evidenced today.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the policies of the Company in force from time to time. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and authority limits set out in it, including the requirement for compliance clearance before publication.

Job Description: Head of Liquidity & Settlements

Supersedes the designation 'Manager, Payment Operations' · Function head

Designation	Head of Liquidity & Settlements
Formerly	Manager – Payment Operations (title superseded; scope extended to liquidity)
Department	Liquidity and Settlements
Reporting To	General Manager – sole reporting line
Direct Reports	Settlement Operations Manager, and through that role the Payment Operations Executives (one per shift) and Payment Operations Associates
Grade Level	Senior management, function head
Working Hours	8.5 hours, with availability across all three shift timings
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Head of Liquidity & Settlements owns the money side of the business: the fiat liquidity that funds the desk and the settlement of every rupee that comes in or goes out. The function reports to the General Manager and not to Operations or Finance, deliberately: **the function that verifies funding must not sit under the function that releases assets, and the function that pays must not sit under the function that reconciles.** Liquidity here means money only. Digital asset inventory and its movement remain with Operations, so the function that moves money never also moves the asset.

Role Purpose

The Head of Liquidity & Settlements is accountable for having the right money in the right account at the right time, and for the accuracy, timeliness and integrity of every inward verification and outward payment across all shifts. The role owns the payment controls, the banking channel capacity and the evidence that every settlement was correct, and leads the function through the Settlement Operations Manager.

Key Accountabilities

1. Payment Control Ownership

- Own and enforce maker-checker across every outward payment: prepared by one person, released by another, both names recorded against the transaction.
- Ensure no Associate verifies an inward receipt for an order on which they executed the outward leg.
- Set and review the release threshold above which the Payment Operations Executive must be the checker, against loss and error experience rather than convenience.
- Ensure the function verifies beneficiary details against the platform record through the ERP and against the client's KYC record, and never solely against details passed on by another function.
- Ensure inward receipt is confirmed against the bank record only, never against a screenshot, a reference supplied by a counterparty, or a forwarded message.

2. Payment Execution Across Shifts

- Ensure payouts and confirmations are completed within the service level on every shift, including the night shift.
- Confirm that payout instructions on client sales state the net amount after tax deduction at source, and that no Associate computes or adjusts a deduction.
- Monitor pending, failed and duplicate payments and ensure each is resolved and recorded the same shift.
- Ensure funding confirmations reach Operations through the recorded channel, so that no order is released on a verbal confirmation.

3. Liquidity Management

- Own intraday fiat liquidity across every Company bank account and channel: the balance available to fund buy-side orders, the capacity to make sell-side payouts, and the headroom within each channel's limits.
- Forecast the desk's funding need by shift and position balances ahead of it, so that a buy-side advertisement is never constrained by an unfunded account and a payout never waits for funds.
- Move funds between Company accounts only on a recorded instruction, prepared by one person and released by another, and never to an account outside the approved list.
- Fund the rupee leg of inventory purchases placed by Operations on the Company's own exchange account. The trade decision and the digital asset leg remain with Operations.
- Work within the liquidity allocation and limits set by the Finance Manager and the Chief Financial Officer. Where the desk needs more than its allocation, the request goes to Finance; it is not met by drawing on balances committed elsewhere.
- Report the liquidity position at each shift close to the General Manager and the Finance Manager: balances by account, capacity by channel, and any shortfall expected in the next shift.

4. Banking Channels and Capacity

- Manage the approved payment channels: availability, cut-off timings, per-transaction and daily limits, and channel-level failure behaviour.
- Plan channel and limit capacity against expected volume with the Finance Manager, and escalate a shortfall before it constrains the desk.
- Maintain the contingency position: which approved alternate channel is used when a primary fails, and who authorises the switch.
- Ensure no Company payment is ever routed through a personal account or an unapproved channel, and treat any instance as a conduct matter.

5. Reconciliation Interface

- Ensure the function closes each day's payment position and hands a complete record to Finance.
- Resolve differences raised by the Accounts team on payment records within the stated timeline.
- **Do not perform the accounting reconciliation.** Reconciliation sits with Finance so that it remains independent of the function that moved the money.

6. Error and Fraud Prevention

- Investigate every payment error to root cause and close it with a documented corrective action.
- Track error and loss by shift, by Associate and by cause, and act on a trend before it becomes a loss.
- Escalate immediately to the General Manager and the Compliance Head any suspected internal fraud, without prior notice to anyone in the function's reporting line.

- Ensure any request to change a beneficiary, split a payment, or pay to a third party is escalated rather than actioned, at every level of the function.

7. Function Leadership and Reporting

- Lead the Settlement Operations Manager and, through that role, the Payment Operations Executives and Associates. Plan rostering with HR so every shift carries maker and checker capacity.
- Set the KPI framework for the function, ensuring accuracy gates the grade and no measure rewards speed of release.
- Own certification: no Associate handles live payments without it.
- Deliver the payment MIS to the General Manager on a fixed schedule: volume, value, service level, error and loss, channel availability, limit utilisation and the liquidity position by account.
- Own retention and succession, and maintain a named successor for the Settlement Operations Manager and each Payment Operations Executive position.

Authority and Limits

- **Approves:** payout release above the Associate, Executive and Settlement Operations Manager thresholds; movement of funds between Company accounts within the allocation set by Finance; channel switching; rosters and work allocation; corrective actions within the function.
- **Requires General Manager approval:** a new banking channel or payment partner; a change to the release threshold structure; headcount; any write-off of a payment loss above ____.
- **Requires Finance Manager or Chief Financial Officer approval:** any change to the liquidity allocation committed to the desk; use of any account not on the approved list; any movement of funds outside the Company's own accounts other than a payment against an approved instruction.
- **Holds no authority** to release an order, to move digital assets, to clear KYC, to post an accounting entry, or to direct Operations or Compliance.
- **Escalates to the General Manager:** any loss above ____; any suspected internal fraud, simultaneously to the Compliance Head; any channel failure affecting settlement; any instruction from any person to bypass maker-checker.

Key Performance Indicators

Measure	Standard
Payment accuracy: beneficiary, amount, reference	100%
Duplicate or wrong-beneficiary payments	Zero
Maker-checker compliance across the function	100%
Inward receipts verified against bank record only	100%
Payouts within service level, all shifts	Above ____ %
Payment losses as a share of value processed	Below ____ %
Daily payment position closed and handed to Finance	100% of working days
Payments routed through unapproved channels	Zero
Buy-side capacity constrained by an unfunded account	Below ____ occurrences per month
Payouts delayed for lack of funds	Zero
Inter-account fund movements with maker and checker	100%

Payment accuracy and maker-checker compliance act as gates. Either failing caps the grade for the period regardless of volume or service level. No measure rewards speed of release.

Qualifications and Experience

Essential

- Bachelor's degree; a commerce, finance or management qualification preferred.
- Six years or more in payment operations, banking operations or settlements, including at least three leading a team.
- Demonstrated ownership of a maker-checker payment control environment.
- Working command of UPI, IMPS, NEFT and RTGS, including cut-offs, limits and failure behaviour.
- Experience running a continuous shift-based function.
- Clear background verification.

Preferred

- Payment gateway, exchange, NBFC or bank settlements background.
- Experience managing banking relationships on limits and channel capacity.
- Exposure to AML red flags in payment flows.

Competencies

- Will hold a control when a waiting counterparty and an impatient colleague both want it waived.
- Investigates to cause rather than to blame.
- Builds a function that runs correctly on the night shift without the Manager present.
- High personal integrity. This role has the broadest access to Company funds of any position below the Board.

Notes for HR and Management

Liquidity means money only. Digital asset inventory, its sourcing and its movement between platforms and wallets remain with Operations. Where Operations buys inventory on the Company's own exchange account, this function funds the rupee leg and Operations executes the asset leg. The function that moves money never also moves the asset: the same separation as verification and release, applied to the Company's own positions.

Treasury stays with Finance. The Finance Manager and the Chief Financial Officer decide how much liquidity is committed to the desk and hold the statutory funding priorities. This role positions that money across accounts and channels day to day, within the allocation it is given.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and control obligations set out in it, including the maker-checker discipline and the limits on reconciliation.

Job Description: Settlement Operations Manager

Liquidity and Settlements · Payment desks across all shifts

Designation	Settlement Operations Manager
Department	Liquidity and Settlements
Reporting To	Head of Liquidity & Settlements – sole reporting line
Direct Reports	Payment Operations Executives (one per shift), and the Payment Operations Associates beneath them
Function Line	Settlement Operations Manager → Head of Liquidity & Settlements → General Manager
Grade Level	Management
Working Hours	8.5 hours, with presence across all shift timings
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Settlement Operations Manager runs the payment desks day to day across every shift: payouts executed correctly, inward receipts verified against the bank record, maker and checker held on every release above threshold, and each day's settlement closed and handed to Accounts. **The role is the checker of last resort on the desk.** It holds no authority to release an order, clear KYC or post an accounting entry, and it moves no digital asset.

Role Purpose

The Settlement Operations Manager makes sure every settlement is right, on time and provable, on every shift including the night. The role leads the Payment Operations Executives, holds the payment controls in daily practice, and closes the day's position so that Accounts reconciles a complete record.

Key Responsibilities

1. Settlement Execution Across Shifts

- Ensure payouts and funding confirmations are completed within the service level on every shift, including the night shift.
- Confirm that every payout against a client sale states the net amount after tax deduction at source, and that no one on the desk computes or adjusts a deduction.
- Resolve every pending, failed and duplicate payment within the shift in which it arises, and record the outcome.
- Ensure funding confirmations reach Operations through the recorded channel only. A verbal confirmation is never given.

2. Maker, Checker and Release Control

- Hold maker and checker on every outward payment: prepared by one person, released by another, both names recorded.

- Act as checker on releases above the Executive's threshold, confirming beneficiary, amount, channel and reference against the instruction.
- Where a Payment Operations Executive prepared a payment, release it here. Where this role prepared it, the release goes to the Head of Liquidity & Settlements.
- Check daily, by sample, that no Associate verified an inward receipt for an order on which they executed the payout.

3. Beneficiary and Inward Verification

- Ensure every beneficiary is verified against the platform record through the ERP and against the client's KYC record before an instruction is issued.
- Ensure every inward receipt is verified against the bank record only, never against a screenshot, a reference supplied by the counterparty or a forwarded message.
- Ensure partial credits, third-party credits and name mismatches are held and escalated, never confirmed as received.

4. Daily Settlement Close

- Close each day's payment position: executed payments reconciled to the instruction list, confirmations captured, exceptions recorded.
- Hand the complete daily record to Accounts, and resolve any difference Accounts raises within the stated timeline.
- Do not perform the accounting reconciliation. It sits with Accounts so that it stays independent of the desk that moved the money.

5. Channels, Limits and Liquidity Execution

- Monitor channel availability, limit consumption and cut-offs through each shift, and sequence payments around them.
- Ask the Head of Liquidity & Settlements for liquidity positioning ahead of an expected shortfall, not at the point of failure.
- Execute movements between Company accounts only on a recorded instruction, with maker and checker, and never to an account outside the approved list.
- Never permit a Company payment through a personal account, a personal handle or an unapproved channel, at any level of urgency.

6. Disputes, Failures and Errors

- Pursue chargebacks, failed transfers and bank disputes to closure, and record recovery.
- Investigate every payment error to root cause and close it with a documented corrective action.
- Escalate any suspected internal fraud to the Head of Liquidity & Settlements and the Compliance Head simultaneously, without prior notice to anyone else in the reporting line.

7. Team Leadership

- Lead the Payment Operations Executives and, through them, the Associates on every shift.
- Plan rostering with HR so each shift carries maker and checker capacity, including the night shift.
- Ensure no one handles live payments without current certification, and that credentials are never shared.
- Support anyone who held a payment or refused a request under pressure. A desk that is criticised for holding payments stops holding them.

8. Reporting

- Report to the Head of Liquidity & Settlements at each shift close and daily: volume, value, service level, errors, pending items, channel availability and funding shortfalls.

Authority and Limits

- **Approves:** release as checker up to ____; switching to an approved alternate channel; work allocation across shifts; corrective actions on the desk.
- **Requires Head of Liquidity & Settlements approval:** release above this role's threshold; any payment this role prepared; any inter-account movement above ____; any write-off of a payment loss.
- **Holds no authority** to release an order, clear KYC, post an accounting entry, move a digital asset, or amend the beneficiary, amount or channel on an approved instruction.
- **Holds no authority** to waive maker and checker for volume, urgency or staffing, and no authority to instruct anyone else to.

Key Performance Indicators

Measure	Standard
Payment accuracy: beneficiary, amount, reference	100%
Duplicate or wrong-beneficiary payments	Zero
Maker and checker compliance across all shifts	100%
Inward receipts verified against the bank record only	100%
Payouts within service level, all shifts	Above ____%
Daily settlement closed and handed to Accounts	100% of working days
Payouts delayed for lack of funds	Zero
Payments through unapproved channels	Zero

Payment accuracy and maker and checker compliance act as gates. Either failing caps the grade for the period regardless of volume or service level. No measure rewards speed of release.

Qualifications and Experience

- Bachelor's degree; commerce or finance preferred.
- Five years or more in payment operations, banking operations or settlements, including at least two leading a desk.
- Working command of UPI, IMPS, NEFT and RTGS, including cut-offs, limits and failure behaviour.
- Experience running a maker and checker payment environment on a continuous shift pattern.
- Clear background and reference verification. This is mandatory and is not waived.

Notes for HR and Management

Why this layer exists. The Head of Liquidity & Settlements now carries liquidity as well as settlement, and cannot also be the day-to-day checker on the desk. This role puts the checker of last resort inside the operation rather than above it, so that a release above threshold never waits for, or bypasses, the function head.

One position across shifts, for now. The role is written as a single manager over the shift Executives. As volume grows it can divide to one per shift, as Operations and Client Relations already do. If it does, each holder carries checker authority for their own shift only.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and authority limits set out in it, and in particular my obligation as checker and the prohibition on waiving maker and checker for any reason.

Employee Name	_____	Designation	_____
Signature	_____	Date	_____

Recorded by (HR)	_____	Date	_____

Ref: BVT/HR/JD/2026/023

Date: 03 September 2026

Job Description: Payment Operations Executive

Supersedes the designations 'Payment Executive' and 'Team Leader, Payment Operations' · One position per shift

Designation	Payment Operations Executive
Formerly	Payment Executive; earlier Team Leader – Payment Operations (titles superseded)
Department	Liquidity and Settlements
Reporting To	Settlement Operations Manager – sole reporting line
Direct Reports	Payment Operations Associates on the assigned shift
Function Line	Payment Operations Executive → Settlement Operations Manager → Head of Liquidity & Settlements
Grade Level	Executive (supervisory tier)
Working Hours	8.5 hours, aligned to the assigned shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Payment Operations Executive is the checker on the payment desk and the single route by which an approved payment instruction reaches a Payment Operations Associate. **No payment is prepared or released on this shift except on an instruction issued through this role, and no release above the approved threshold happens without this role or a second Associate as checker.** A request to pay reaching an Associate from any other person, at any level, is escalated rather than actioned.

Role Purpose

The Payment Operations Executive runs the payment desk during the shift: issuing approved payment instructions, acting as checker on releases, confirming that funding confirmations reach Operations through the recorded channel, holding channel and limit capacity through the shift, and closing the shift reconciled before handover.

Key Responsibilities

1. Payment Instruction Control

- Issue payment instructions to Associates only against an approved source: the order record for a client payout, or an authorisation from the Settlement Operations Manager for any other payment.
- Before issuing a payout instruction, verify the beneficiary name, account number, IFSC or UPI handle against the platform record through the ERP and against the client's KYC record. Do not rely on details passed on by another function alone.
- Confirm that a payout instruction against a client sale states the net amount after tax deduction at source, and that no Associate is asked to compute or adjust the deduction.
- **Escalate, do not action:** any request to pay reaching the desk from a person other than through the approved source, however senior; any request to change a beneficiary at short notice; any request to split

a payment or pay a third party.

2. Checker Discipline

- Act as checker on every release above the approved threshold: independently confirm the beneficiary, amount, channel and reference against the instruction before release.
- Ensure the Associate who prepared a payment never releases it, and that both names are recorded against the transaction.
- Where the shift is staffed with a single Associate and no second Associate is available, act as checker personally. The payment waits; it is not released single-handed.
- **Do not act as both preparer and checker on the same payment.** Where the Payment Operations Executive has prepared, the release goes to the Settlement Operations Manager.
- Refuse any release where the instruction, the beneficiary or the amount is inconsistent, and escalate rather than release under pressure.

3. Inward Verification Oversight

- Ensure every inward receipt is verified against the bank record only. A screenshot, a reference supplied by a counterparty, or a forwarded bank message is never verification.
- Ensure funding confirmations reach Operations through the recorded channel. **No funding confirmation is given verbally**, because Operations may only release against a recorded one.
- Ensure no Associate verifies an inward receipt for an order on which they executed the outward leg.
- Confirm partial credits, third-party credits and name mismatches are held and escalated, never confirmed as received.

4. Channel, Limits and Contingency

- Monitor channel availability, limit consumption and cut-off timings through the shift, and plan the sequence of payments around them rather than discovering a limit at the point of failure.
- Authorise a switch to an approved alternate channel where a primary fails, and record the switch with the reason.
- **Never permit a Company payment through a personal account, a personal handle or any channel not on the approved list**, at any level of urgency. Treat any instance as a conduct matter and report it the same shift.
- Log every downtime with channel, start time, impact and resolution, and report a limit shortfall to the Settlement Operations Manager before it constrains the desk.

5. Shift Reconciliation and Handover

- Reconcile the shift's executed payments against the instruction list before the shift closes. The shift does not close with an unexplained difference.
- Ensure every UTR, reference and confirmation is captured against its instruction at the time of execution, not at the end of the shift.
- Complete a written handover to the incoming Payment Operations Executive: payments pending, failed, awaiting confirmation, channel status, limits consumed and open escalations, acknowledged in writing by the incoming Payment Operations Executive.
- Report shift performance to the Settlement Operations Manager: volume, value, service level, errors, channel availability and open items.

6. Escalation and Error Handling

- Escalate immediately to the Settlement Operations Manager: any duplicate payment, wrong beneficiary, wrong amount, or failed payment where funds have left the account.
- Escalate any suspected internal fraud to the Settlement Operations Manager and the Compliance Head simultaneously, without prior notice to anyone else in the reporting line.
- Treat an error reported at once by an Associate as a recoverable operational event, and concealment or delay as a conduct matter. Say so to the team, repeatedly.
- Escalate any instruction from any person to bypass maker-checker, whatever the reason given.

7. Team Quality and Coaching

- Allocate work across Associates by capacity and certification, ensuring maker and checker capacity is preserved at all times on the shift.
- Coach Associates on the specific errors they make, at the time they make them.
- Support any Associate who has held a payment or refused a request under pressure. An Associate criticised for holding a payment will stop holding them.
- Ensure no Associate handles live payments without current certification, and that credentials are never shared, transferred or operated by another person.

Authority and Limits

- **May do independently:** issue payment instructions against an approved source; act as checker up to ____; allocate work; authorise a switch to an approved alternate channel; hold a payment pending verification.
- **Requires Settlement Operations Manager approval:** release above the checker threshold; any payment where the Payment Operations Executive prepared the instruction; any deviation from procedure; any write-off of a payment loss.
- **No authority** to amend a beneficiary, amount, narration or channel on an approved instruction; to release an order; to clear a KYC file; or to post an accounting entry.
- **No authority** to waive maker-checker for volume, urgency or staffing, and no authority to instruct an Associate to do so.

Key Performance Indicators

Measure	Standard
Maker-checker compliance on the shift	100%
Releases above threshold checked independently	100%
Payment accuracy: beneficiary, amount, reference	100%
Duplicate or wrong-beneficiary payments on the shift	Zero
Funding confirmations issued through the recorded channel	100%
Inward receipts verified against bank record only	100%
Shift reconciled before handover	100%
Payments through unapproved channels	Zero
Handover completeness and acknowledgement	100%

Maker-checker compliance acts as a gate. Any release above threshold made without an independent check caps the grade for the period regardless of shift volume or service level. No measure in this role rewards speed of release. Targets marked ____ are set by the Settlement Operations Manager.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- One Payment Operations Executive covers each shift under the Settlement Operations Manager.
- The additional half hour in the Payment Operations Executive's day is rostered to cover handover to the incoming Payment Operations Executive.
- Rosters must preserve maker and checker capacity on every shift, including the night shift.

Qualifications and Skills

Essential

- Graduate in any discipline.
- Two years or more in payment operations, banking operations, settlements or accounts payable, including at least six months supervising or acting as senior on a desk.
- Working command of UPI, IMPS, NEFT and RTGS, including cut-off timings, limits and failure behaviour.
- Strong numerical accuracy sustained across a full shift, including nights.
- Clear written English and Hindi, sufficient to write a handover and an incident note.
- Willingness to work rotational shifts including the night shift.
- Clear background and reference verification. This is mandatory for this role and is not waived.

Preferred

- Payment gateway, exchange, NBFC or bank back-office settlements background.
- Bank reconciliation experience.
- Exposure to AML red flags in payment flows.

Attributes

- Checks the record even when the Associate is trusted and a counterparty is waiting.
- Says no to a senior person asking for a payment outside the approved route, and reports it.
- Holds maker-checker at the hour when nobody senior is present.
- Takes an escalation off an Associate rather than sending it back.
- Personal integrity. This role authorises the movement of Company funds on every shift.

Notes for HR and Management

This role and the Operations Executive hold opposite sides of the same control. Payment Operations verifies funds against the bank record and issues the funding confirmation; Operations releases the asset against that recorded confirmation. Neither may do both. The requirement here that a funding confirmation is never given verbally is what makes the Operations release rule enforceable, because a verbal confirmation leaves nothing for the Operations Executive to check and nothing for Quality Control to review afterwards.

Rostering must preserve checker capacity. Several controls in this description hold only if a second person is present. Where a shift is planned with a single Associate, the Payment Operations Executive becomes the checker by default and cannot simultaneously prepare. Build the roster so that this is the exception rather than the standing arrangement on the night shift.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and authority limits set out in it, and in particular my obligation as checker and the prohibition on waiving maker-checker for any reason.

Employee Name	_____	Designation	_____
Signature	_____	Date	_____

Job Description: Payment Operations Associate

Supersedes the designations 'Payment Associate' and 'UPI / IMPS Payment Handler'

Designation	Payment Operations Associate
Formerly	Payment Associate; earlier UPI / IMPS Payment Handler (titles superseded)
Department	Liquidity and Settlements
Reporting To	Payment Operations Executive (shift) – sole reporting line
Function Line	Payment Operations Executive → Settlement Operations Manager → Head of Liquidity & Settlements
Function Head	Head of Liquidity & Settlements
Shift	Rotational across three shifts, 8 hours per shift
Location	Blynk Virtual Technologies Pvt. Ltd.

Position of the role. The Payment Operations Associate sits at the point where the Company's funds actually leave and where client funds are actually confirmed received. The Associate reports solely to the Payment Operations Executive for the shift, and executes only on an approved payment instruction received through that Payment Operations Executive. **The Associate who prepares a payment does not release it, and does not verify it.** Accuracy is the control in this role. Speed matters only within accuracy.

Objective

The Payment Operations Associate executes outward payments and verifies inward receipts for the shift, accurately, within time, and on a documented record. The role exists so that money leaves the Company only against an approved instruction to a verified beneficiary, and so that no order is treated as funded until the funds are actually confirmed in the Company's account.

The Payment Operations Associate does not authorise payments, does not decide amounts, and does not amend an instruction. The role executes and verifies. Every judgement call belongs to the Payment Operations Executive.

Key Responsibilities

1. Outward Payment Execution

- Execute UPI, IMPS, NEFT and RTGS payouts only against an approved payment instruction received through the Payment Operations Executive.
- Before executing, check the beneficiary name, account number, IFSC or UPI handle, and amount against the approved instruction, and against the beneficiary registered in the client's KYC record.
- Where the payout is against a client sale of digital assets, confirm the instruction states the net amount after tax deduction at source under Section 393 of the Income-tax Act, 2025 (formerly Section 194S). Do not compute or adjust the deduction independently.
- Do not execute any instruction received verbally, by personal message, or from any person other than the Payment Operations Executive, however senior.

- Capture the UTR or reference number and the transaction confirmation at the time of execution, and attach it to the instruction record before moving to the next payment.

2. Inward Payment Verification

- Verify receipt of client funds against the bank statement or the account itself. A screenshot, a payment reference shared by the client, or a claim of transfer is not verification.
- Confirm three things on every credit: the amount matches, the remitter matches the client's registered account, and the reference is correct.
- Do not confirm receipt on a partial credit, a third-party credit, a name mismatch, or a credit that cannot be tied to a specific order. Escalate instead.
- Communicate confirmation only through the recorded channel. An order is funded when the record says so, not when the Associate says so verbally.

3. Maker and Checker

- The Associate who prepares a payout does not release it. Release requires a second Associate or the Payment Operations Executive.
- No Associate verifies the inward receipt for an order on which they executed the outward leg.
- The names of both the preparer and the releaser are recorded against every transaction.
- Where staffing on a shift makes a second person unavailable, the payment waits for the Payment Operations Executive. It is not released single-handed. A delayed payment is recoverable; a wrong one frequently is not.

4. Channel Availability and Downtime

- Maintain working familiarity with every approved payment channel, banking app and portal in use.
- Where a channel is down, limits are exhausted, or a transaction fails, report it to the Payment Operations Executive and switch only to an approved alternate channel.
- Never route a Company payment through a personal account, a personal UPI handle, or any channel not on the approved list, under any circumstance or level of urgency.
- Log every downtime with the channel, start time, impact and resolution.

5. Records and Shift Reconciliation

- Maintain the payment log for the shift: timestamp, channel, beneficiary, amount, purpose, UTR, preparer and releaser.
- Reconcile all executed payments against the instruction list before the shift closes. The shift does not close with an unexplained difference.
- Submit the shift payment summary to the Payment Operations Executive: executed, pending, failed, awaiting confirmation, and limits consumed by channel.

6. Escalation and Red Flags

All escalation is to the Payment Operations Executive for the shift.

- Escalate before executing: any beneficiary or remitter name mismatch; any third-party payment or payout instruction; any request to split a payment across accounts; any change of beneficiary requested at short notice; any pressure to release before verification is complete.
- Escalate the moment it is identified: any duplicate payment, wrong beneficiary, wrong amount, or failed payment where funds have left the account.
- A payment error reported immediately by the Associate is treated as a recoverable operational event. An error concealed, delayed or discovered by someone else is treated as a conduct matter.

7. Credentials, Confidentiality and Conduct

- Payment credentials, devices, tokens and access are issued to the Associate personally. They are not to be shared, transferred, or operated by any other person.
- Do not hand over a credential, OTP, PIN or device to anyone, including a supervisor or a member of senior management. Where someone else needs a payment made, they raise it with the Payment Operations Executive.
- Do not hold client bank details, payment screenshots or transaction records on a personal device or personal account.
- Do not accept any consideration, gift or benefit from a client, counterparty or beneficiary.
- Disclose immediately any personal, family or financial relationship with a beneficiary.

8. Shift Handover

- Complete a written handover to the incoming Associate covering payments pending, failed, awaiting confirmation, channel status and limits consumed.
- Do not leave the desk until the incoming Associate has acknowledged the open items in writing.

Authority and Limits

The Payment Operations Associate executes. The Associate does not authorise.

- **No payment is made without an approved instruction** routed through the Payment Operations Executive. There is no exception for urgency, seniority of the requester, or a waiting client.
- **Zero authority to amend** the beneficiary, amount, narration or channel stated on an approved instruction. A change requires a fresh instruction.
- **Payout limit:** up to ____ per transaction may be released by a second Associate as checker. Above that, release requires the Payment Operations Executive.
- **No authority to confirm an order as funded** on anything other than the bank record.

Performance Standards

Measure	Standard
Payment accuracy: beneficiary, amount, reference	100%
Duplicate or wrong-beneficiary payments	Zero
Execution within time of approved instruction	Within ____ minutes
UTR or confirmation captured at time of execution	100%
Maker-checker compliance	100%
Inward receipts verified against bank record only	100%
Shift reconciliation closed before handover	100%
Errors self-reported before detection by others	Measured for coverage. Concealment is a conduct matter, not a performance one.

Targets marked ____ are to be set in the departmental KPI scorecard and reviewed each quarter.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- Each shift is led by a Payment Operations Executive. The Associate reports to the Payment Operations Executive on duty for that shift.
- Shifts rotate as published in the monthly roster. Weekly off is scheduled by roster and may fall on any day.
- Handover is completed at the change of shift and is part of the shift, not additional to it.

Eligibility and Skills

Essential

- Graduate in any discipline.
- One year or more in payment processing, banking operations, accounts payable or cash handling. Strong fresh graduates with demonstrated numerical accuracy may be considered.
- Working knowledge of UPI, IMPS, NEFT and RTGS, including cut-off timings and failure behaviour.
- Comfortable operating mobile banking applications and net banking portals accurately at speed.
- Numerical accuracy under time pressure, sustained across a full shift including nights.
- Willingness to work rotational shifts including the night shift.
- Clear background and reference verification. This is mandatory and not waived for any candidate in this role.

Preferred

- Payment gateway, exchange, NBFC or bank back-office payments background.
- Bank reconciliation experience.
- Exposure to AML red flags in payment flows.

Attributes

- Checks before acting, every time, including on the hundredth payment of the shift.
- Reports own errors immediately and without prompting.
- Does not improvise under pressure from a waiting client, counterparty or colleague.
- Personal integrity. This role has direct operational access to Company funds.

Notes for HR and Management

Maker-checker is the reason this role exists in a team rather than as an individual. The superseded description made the same person responsible for executing a payment and for verifying it. That removes the only control that reliably catches a wrong beneficiary before the money is gone. This description separates the two. If a shift is staffed with a single Associate, the Payment Operations Executive is the checker; the role is not run unchecked.

Credential handling is deliberately absolute. The instruction never to hand over a credential or OTP, including to a supervisor, is what protects the Associate as much as the Company. Without it, an Associate has no defensible ground to refuse, and every misuse becomes traceable to their credential and therefore to

them.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and conduct standards set out in it.

Job Description: Chief Financial Officer

Finance function · Executive

Designation	Chief Financial Officer (CFO)
Department	Finance
Reporting To	General Manager (administrative) Direct access to the Board on tax positions, audit matters and the reported financials
Direct Reports	Finance Manager and Accounts Manager, and the teams beneath them
Grade Level	Executive
Working Hours	8.5 hours
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Chief Financial Officer owns the Company's financial position, its tax posture and its relationship with auditors, bankers and the Board; the Finance Manager runs strategic finance and the Accounts Manager runs the books. **The role does not execute payments and does not hold payment credentials.** Where the Chief Financial Officer is a bank signatory, that authority is exercised jointly and never over a payment the role itself prepared.

Role Purpose

The Chief Financial Officer is accountable for the integrity of every number the Company reports, the defensibility of every tax position it adopts, and the sufficiency of its capital and liquidity to meet its obligations. The role is the Board's principal financial adviser.

Division of Responsibility Within Finance

Chief Financial Officer	Finance Manager	Accounts Manager
Approves tax positions and structuring; owns tax counsel	Researches, prepares and documents positions; files returns	Maintains the books and working papers positions rest on
Owns capital structure, funding and Board reporting	Owns budgeting, forecasting and management reporting	Owns the close, trial balance and entity accounts
Owns the auditor relationship; signs off the statements	Prepares tax, valuation and treasury schedules	Prepares the audit file, schedules and reconciliations
Approves valuations presented externally	Prepares valuation workings	Maintains inventory records and the asset register
Approves accounting policy and any change to it	Flags where policy no longer fits the business	Applies policy consistently in the books

Key Accountabilities

Private and Confidential

BVT/HR/JD/2026/025 | Page 1 of 4

1. Financial Integrity and Reporting

- Own the accuracy and completeness of the financial statements across all group entities, and the accounting policy on which they rest.
- Present the financial position to the Board on a fixed schedule, with the assumptions and the uncertainties stated as clearly as the results.
- Ensure every externally reported number reconciles to the books and can be supported on inspection.
- Approve any entry, provision, write-off or reclassification that materially affects reported income.

2. Taxation and Structuring Authority

- Approve the group's tax positions across income tax, tax deducted at source and goods and services tax, including the treatment of virtual digital asset transactions.
- **Approve no position that is not supported by documented reasoning and, where the law is unsettled, by written professional advice obtained before adoption.**
- Own the relationship with tax counsel and the Chartered Accountant, and instruct them on a complete factual brief.
- Own the conduct of any assessment, appeal or departmental proceeding, and report it to the Board at the point it arises.

3. Capital, Liquidity and Banking

- Own capital structure, funding requirements and the Company's liquidity position across entities.
- Own banking relationships at the executive level: facilities, limits, covenants and standing.
- Ensure funds are available to meet statutory obligations on their due dates before they are committed elsewhere.
- Assess the financial implications of any proposed business change before it is committed, and present the downside case.

4. Audit, Controls and Governance

- Own the relationship with statutory and tax auditors and sign off the audit file.
- Escalate to the Board any proposed audit qualification or adverse observation at the point it arises, never at signing.
- Own the internal financial control framework and ensure segregation between recording, reconciling and paying is maintained at all times.
- Ensure the finance function is resourced to close on time without compressing control.

Authority and Limits

- **Approves:** tax positions and structuring supported by documented reasoning; accounting policy; valuations presented externally; write-offs and provisions up to ____; the audit file.
- **Requires Board approval:** capital structure changes; any tax position that remains unsettled after advice; restructuring of entities; any write-off above ____; engagement of tax counsel; any new banking facility.
- **Holds no authority** to execute a payment, hold a payment credential, release an order, or direct the compliance function.
- **Escalates to the Board directly:** any proposed audit qualification; any tax notice, assessment or proceeding; any instruction to record a transaction other than as it occurred; any liquidity shortfall against a statutory due date.

Key Performance Indicators

Measure	Standard
Statutory filings and deposits on or before due date	100%. Zero late fees or interest
Board financial reporting on schedule and reconciled to the books	100%
Material tax positions with documented support on file	100%
Audit qualifications and repeat observations	Zero
Liquidity sufficient for statutory obligations at due date	100%
Segregation between recording, reconciling and paying	Maintained 100% of the time

Statutory timeliness and segregation act as gates. A late filing, or any period in which segregation was not maintained, caps the grade regardless of every other measure.

Qualifications and Experience

Essential

- Chartered Accountant, or CMA, or MBA Finance with equivalent demonstrated capability.
- Ten years or more in finance, including at least four as head of a finance function.
- Command of Indian direct and indirect taxation, including assessment and appellate experience.
- Demonstrated experience owning an auditor relationship and signing off financial statements.
- Board-level presentation capability: explains uncertainty without obscuring it.

Preferred

- Virtual digital asset, fintech, payments or exchange sector experience.
- Fundraising or valuation experience.
- Experience taking an organisation through its first statutory audit or its first assessment.

Notes for HR and Management

Key managerial personnel designation. Where a form, filing or agreement requires the signature of a Chief Financial Officer, that designation is a Board appointment recorded in the Company's filings. A job description does not create it. Confirm the appointment is recorded before this role signs in that capacity.

Finance is split beneath this role. Approval of tax positions, accounting policy, external valuations and the audit sign-off sit here. Beneath it, the Finance Manager holds strategic finance and the Accounts Manager holds the books, the close and reconciliation, alongside each other. The split keeps analysis and record in different hands. The three descriptions should be read together so that nothing falls between them.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the policies of the Company in force from time to time. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and authority limits set out in it, including the limits on payment execution.

Employee Name	_____	Designation	_____

Job Description: Finance Manager

Finance function · Strategic finance, taxation and treasury

Designation	Finance Manager
Department	Finance
Reporting To	Chief Financial Officer – sole reporting line
Direct Reports	Banking Officer, and the finance team (___ positions)
Grade Level	Senior management
Working Hours	8.5 hours, general shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Finance Manager runs strategic finance under the Chief Financial Officer: financial modelling, budgeting and forecasting, tax preparation and research, valuation workings, treasury planning and management reporting. The books, the close and reconciliation sit with the Accounts Manager, who reports alongside this role to the Chief Financial Officer. **The role does not execute payments and does not hold payment credentials.** Tax positions, accounting policy and external valuations are prepared here and approved by the Chief Financial Officer.

Role Purpose

The Finance Manager is responsible for the planning and analysis that turns the Company's books into decisions: the financial model, the budget and forecast, the tax position and its supporting file, valuation workings, cash and liquidity planning, and the management reporting pack. The role works from the books maintained by the Accounts function and is accountable for the accuracy of every number it presents.

The role is expected to build. The financial model, the budgeting process, the tax position file and the management reporting framework are designed by this role and approved by the Chief Financial Officer.

Scope and Scale

Dimension	Scale
Entities	All group entities, with entity-wise books and inter-entity transactions
Team	Finance team (___ positions)
Business	Virtual digital asset and P2P services, with continuous three-shift operations
External	Chartered Accountant, statutory and tax auditors, tax counsel and bankers

Key Accountabilities

1. Financial Strategy, Planning and Modelling

- Build and maintain the Company's financial model: revenue and margin by line, cost base, working capital, cash conversion and unit economics.

- Own the annual budget and the rolling forecast, agree them with the Chief Financial Officer, and track actuals against them with variance explained by cause rather than by category.
- Model scenarios for pricing, volume, capital deployment, new lines of business and platform mix, and present the downside case as clearly as the base case.
- Advise the Chief Financial Officer on the financial implications of any proposed change before it is committed.

2. Taxation and Tax Structuring

- Prepare and maintain the group's tax position across income tax, tax deducted at source, and goods and services tax, including the treatment applied to virtual digital asset transactions, for approval by the Chief Financial Officer.
- Research and propose the structuring of the group's entities and transactions for tax efficiency, for the Chief Financial Officer's approval, and keep the reasoning documented in a form that can be produced under assessment.
- **Ensure every structure has genuine commercial substance and documented support.** Where a position is not settled in law, obtain written professional advice before it is adopted, and record the advice with the position. A position that cannot be explained on paper is not adopted.
- Ensure the group's inter-entity arrangements are supported by agreements, pricing rationale and actual performance, not only by book entries.
- Own the accuracy and timeliness of every tax deposit and return, working from the books and reconciliations maintained by the Accounts Manager, including deduction on virtual digital asset transfers under Section 393 of the Income-tax Act, 2025 (formerly Section 194S of the Income-tax Act, 1961).

3. Valuation

- Prepare valuation workings for the Company's digital asset inventory on the method approved by the Chief Financial Officer, and test its consistent application with the Accounts Manager.
- Prepare and maintain business valuation work required for fundraising, restructuring, statutory purposes or Board decision-making, and identify where an independent valuer is required rather than an internal estimate.
- Review the depreciation policy and impairment assessment with the Accounts Manager, who maintains the fixed asset register.
- Ensure any valuation presented externally states its basis, its date and its limitations, and is approved by the Chief Financial Officer before release.

4. Interface with the Accounts Function

- Use the books, close and reconciliations maintained by the Accounts Manager as the basis of all reporting, tax computation and valuation work.
- Raise any difference between management figures and the books with the Accounts Manager, and resolve it before the figure is reported.
- **Hold no responsibility for posting entries or performing reconciliations.** Those sit with the Accounts function, so that the analysis and the record are held by different people.

5. Treasury and Cash Flow

- Own cash flow forecasting and liquidity planning across entities and bank accounts, and set the liquidity allocation committed to the desk. Day-to-day positioning of that allocation is held by the Head of Liquidity & Settlements.

- Plan banking channel and limit capacity with the Head of Liquidity & Settlements, so that funding does not constrain the desk and idle balances are not left unmanaged.
- Oversee the Banking Officer's management of banking relationships, facilities, charges and limits, and report any change in the Company's banking standing to the Chief Financial Officer.
- Ensure funds are available to meet statutory obligations on their due dates before they are committed elsewhere.

6. Audit, Chartered Accountant and Advisor Coordination

- Support the Chief Financial Officer's relationship with the Chartered Accountant, statutory and tax auditors, and tax counsel, and coordinate them on tax matters.
- Contribute the tax, valuation and treasury schedules to the audit file prepared by the Accounts Manager, ahead of the audit rather than during it, and resolve queries on those areas within the auditor's timeline.
- Escalate to the Chief Financial Officer any proposed audit qualification, adverse observation or disagreement on treatment, at the point it arises rather than at signing.
- Instruct external advisors with a complete factual brief, and record the advice received against the position it supports.
- Close every internal control observation on evidence, with a dated corrective action.

7. Tax Research and Position Maintenance

- Maintain current knowledge of the tax and regulatory framework affecting the business, including virtual digital asset taxation, goods and services tax treatment of intermediation, and the transition from the Income-tax Act, 1961 to the Income-tax Act, 2025.
- Map superseded statutory references to their current equivalents across the Company's templates, letters, contracts, systems and policies, so that no document cites a repealed provision.
- Assess the effect of any amendment, circular, ruling or judicial decision on the Company's adopted positions, and report the effect to the Chief Financial Officer with a recommendation.
- Maintain a written record of each material tax position: what it is, why it was adopted, what supports it, and what would change it.

8. Team Leadership

- Lead the finance team: allocation, quality, development and succession.
- Ensure the segregation between recording, reconciling and paying is maintained within the team at all times, including when the team is short-staffed.
- Set the KPI framework for the function, with filing timeliness and accuracy acting as gates rather than as targets.
- Develop the finance team toward analysis rather than only reporting, and maintain a named successor for this role.

9. Reporting

- Deliver the financial reporting pack to the Chief Financial Officer on a fixed schedule and in a fixed format: profit and loss against budget, balance sheet, cash flow, entity-wise position, tax status and key ratios.
- Ensure every management report reconciles to the books. A report that does not tie to the books is not a management report.
- Report a bad number on schedule rather than late with an explanation, and mark provisional figures as provisional.

Key Interfaces

Function	Purpose of the interface
Chief Financial Officer	Reporting line: budget, tax positions, valuation, approvals, escalation
Accounts Manager	Books, close, reconciliations, statutory working papers and the audit file
Head of Liquidity & Settlements	Daily payment position, channel and limit capacity
Compliance Head and External Compliance Officer	Accounts under lien or external query; regulatory financial data
Operations Head	Asset position, inventory valuation and margin reconciliation
HR Manager	Payroll funding, statutory deposits and headcount cost
Chartered Accountant and auditors	Filings, audit, assessments and professional advice

Authority and Limits

- **Approves:** the financial model and its assumptions for presentation; reporting formats; work allocation within the finance team; working papers supporting a tax position, before submission for approval.
- **Requires Chief Financial Officer approval:** the budget and forecast; any tax position or structuring proposal; any valuation presented externally; any change in accounting policy or valuation method; engagement of an external advisor; any change to a banking facility.
- **Requires Board approval, through the Chief Financial Officer:** any tax position that remains unsettled after advice; any restructuring of entities or inter-entity arrangements.
- **Holds no authority** to execute a payment, hold a payment credential, post an accounting entry, release an order, or direct the compliance function.
- **Escalates to the Chief Financial Officer immediately:** any proposed audit qualification; any notice, assessment or proceeding from a tax authority; any instruction to record a transaction other than as it occurred; any matter affecting the reported financials.

Key Performance Indicators

Measure	Standard
Statutory filings and deposits on or before due date	100%. Zero late fees or interest
Management reporting reconciled to the books	100%
Budget variance explained by cause within reporting cycle	100% of material variances
Audit observations, and repeat observations	___ or fewer; repeats zero
Material tax positions with documented support on file	100%
Segregation between recording, reconciling and paying	Maintained 100% of the time

Statutory timeliness and segregation act as gates. A late filing, or any period in which the segregation between recording, reconciling and paying was not maintained, caps the grade regardless of performance on every other measure. Targets marked ___ are set by the Board.

Qualifications and Experience

Essential

- Chartered Accountant, or CMA, or a Master's degree in finance with equivalent demonstrated capability.
- Six years or more in finance, including at least three leading a finance function or a substantial part of one.
- Practical command of Indian direct and indirect taxation: income tax, tax deducted at source, and goods and services tax, including return preparation, reconciliation and assessment handling.
- Demonstrated experience of tax structuring supported by documented reasoning, not only of compliance filing.
- Financial modelling capability: builds the model rather than maintaining someone else's.
- Multi-entity accounting experience with inter-entity transactions.
- Advanced Excel and working command of Tally; ERP data literacy.

Preferred

- Virtual digital asset, fintech, payments or exchange sector experience.
- Exposure to the special tax treatment of virtual digital assets and to inventory valuation on a defined cost-flow method.
- Experience handling a tax assessment, appeal or departmental proceeding.
- Valuation experience for fundraising or statutory purposes.
- Experience preparing an organisation for its first external audit.

Competencies

Core

- Integrity: will not record what cannot be supported, whoever is asking.
- Reports the number that is true, on schedule, including when it is unwelcome.
- Distinguishes a defensible position from a convenient one, and says which is which.

Functional

- Tax technical depth and the research discipline to keep it current.
- Financial modelling and scenario analysis.
- Valuation methodology and its limits.
- Internal financial control design.

Leadership

- Builds a finance team that analyses rather than only records.
- Holds segregation of duties when the team is short-handed.
- Instructs external advisors well: a complete brief, a specific question, a recorded answer.
- Presents to a Board clearly, including the parts that are uncertain.

Notes for HR and Management

The finance function is split under the Chief Financial Officer. This role holds strategic finance: modelling, budgeting, tax preparation and research, valuation workings, treasury and reporting. The Accounts Manager holds the books, the close and reconciliation. The two report alongside each other to the Chief Financial Officer. The split keeps the analysis and the record in different hands, so a management figure is always tested against books this role did not keep.

Tax structuring is written with a documentation condition attached, deliberately. The requirement that every structure carry genuine commercial substance and written professional advice where the position is unsettled is what separates structuring from exposure. In a virtual digital asset business, where several positions remain contested, the file supporting a position matters as much as the position itself, and it has to be built at the time rather than reconstructed during an assessment.

Segregation is written as a gate rather than a principle. Neither the Finance Manager nor the Accounts team executes payments or holds payment credentials, and the Accounts team alone holds recording and reconciliation. The pressure to relax this arrives when the finance team is short-staffed and a payment is urgent. Written as a gate, relaxing it costs the grade, which is the only form in which this control reliably survives.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the policies of the Company in force from time to time. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities, escalation obligations and authority limits set out in it, including the limits on payment execution and the documentation conditions attaching to tax positions.

Job Description: Banking Officer

Finance and Accounts · General shift

Designation	Banking Officer
Department	Finance
Reporting To	Finance Manager – sole reporting line
Functional Coordination	Head of Liquidity & Settlements – channels and limits Accounts Manager – statements, charges and reconciliation External Compliance Officer – accounts under lien or external query
Working Hours	8 hours, general shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Banking Officer manages the Company's banking relationships and the administration of its accounts across every group entity. **The role prepares; it does not authorise, and it does not pay.** Account openings, mandate and signatory changes, and net-banking administration are prepared here and authorised by the Company's authorised signatories. The Banking Officer holds no payment creation or approval right, because whoever administers net-banking users and limits can otherwise bypass every payment control.

Role Purpose

The Banking Officer keeps the Company's accounts open, documented, correctly mandated and usable, and holds the working relationship with each banking partner, so that funding and payout channels never fail for an administrative reason.

Key Responsibilities

1. Banking Relationships

- Maintain working relationships with branch, relationship and nodal officers at every banking partner, and know whom to reach before a problem rather than after it.
- Represent the Company to its banks on routine and administrative matters, within the brief approved by the Finance Manager.
- Track each bank's service levels, charges and responsiveness, and report where a relationship is deteriorating.

2. Account Administration

- Prepare account opening, modification, closure, mandate and signatory change requests, with the Board resolutions, authorisations and certified copies each requires.
- Submit a request only once it has been authorised by the required signatories and, where applicable, by Board resolution.
- Maintain the register of every account across group entities: bank, account, purpose, mandate, signatories, limits, channels and status.

- Keep constitutional and KYC documents current with every bank, and act on any bank request for re-verification before its deadline.

3. Net-Banking, Channels and Instruments

- Prepare net-banking user, role and limit changes for authorisation by two authorised signatories. Never apply a change on one authorisation.
- **Hold no payment creation or approval right on any account.** Administration rights and payment rights are never combined in this role.
- Coordinate channel availability and limits with the Head of Liquidity & Settlements, and escalate a limit or channel constraint before it affects the desk.
- Arrange merchant, POS and payment-instrument facilities where approved, and record their activation and control settings.

4. Charges, Statements and Reconciliation Support

- Obtain statements and confirmations from banks where they are not available through the channel, and supply them to the Accounts Manager.
- Review bank charges against agreed terms and raise any incorrect charge with the bank.
- Support the Accounts team on any reconciling item that requires a bank-side answer.

5. Support for External Compliance

- Supply the External Compliance Officer with account status, bank-side contacts and documentation for any account under lien, freeze or external query.
- **Do not conduct the lien or freeze matter.** The External Compliance Officer holds the case and the position taken with the bank or authority.
- Report to the Finance Manager and the External Compliance Officer on the same day any restriction, debit freeze or unusual bank communication observed.

6. Records and Conduct

- Maintain the register of mandates, resolutions, signatory lists and bank correspondence, current and audit-ready.
- Hold no bank credential, token or device belonging to another person, and share none issued to this role.
- Handle deposits or instrument submissions only where a banking task requires it, on prior written approval, with the receipt filed the same day.
- Do not accept any consideration or benefit from a bank official or banking partner.

Authority and Limits

- **May do independently:** correspond with banks on routine administrative matters; prepare requests and documentation; obtain statements and confirmations.
- **Requires authorisation by authorised signatories:** any account opening, closure, mandate or signatory change; any net-banking user, role or limit change, by two signatories.
- **Requires Finance Manager approval:** any new banking partner, facility or charge structure; any communication taking a position with a bank beyond routine administration.
- **Holds no authority** to create, approve or release a payment, to act as a signatory, or to conduct a lien or freeze matter.

Key Performance Indicators

Measure	Standard
Account register complete and current across all entities	100%
Bank KYC and constitutional documents current	100%, no lapse
Net-banking administrative changes with two authorisations	100%
Instances of administration and payment rights combined	Zero
Restrictions or unusual bank communications reported same day	100%
Account requests completed within bank turnaround	Above ____%
Incorrect bank charges identified and raised	100% of those found

Dual authorisation of net-banking administration acts as a gate. Any change applied on a single authorisation caps the grade regardless of every other measure.

Qualifications and Skills

- Graduate; a commerce or finance background preferred.
- Three years or more in banking operations, corporate banking relationships or treasury administration.
- Working knowledge of corporate account documentation, mandates and net-banking administration.
- Clear written English and Hindi, and the composure to work with bank officials at every level.
- Clear background verification.

Notes for HR and Management

Net-banking administration is the quietest route around every payment control. A person who can create a user, change a role or raise a limit can build their own path around maker and checker. That is why administration is prepared here, authorised by two signatories, and never combined with any payment right in the same person.

Bank relationships have moved to this role from the External Compliance Officer. The External Compliance Officer keeps liens, freezes, law enforcement and regulatory matters, and draws on this role for bank-side facts and contacts. One function now owns the relationship; one owns the case.

This description defines the scope of the role and does not constitute the whole of the terms of appointment or employment. It is to be read with the Articles of Association, the relevant Board resolution or appointment letter, the Code of Conduct and the AML and KYC Policy of the Company.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and authority limits set out in it, including that I hold no payment right and apply no change on a single authorisation.

Job Description: Accounts Manager

Accounts, Taxation and Banking · Function lead

Designation	Accounts Manager
Department	Accounts, Taxation and Banking
Reporting To	Chief Financial Officer – sole reporting line
Direct Reports	Accounts Executives, and the Accounts Associates beneath them
Grade Level	Management
Working Hours	8.5 hours, general shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Accounts Manager owns the books: that every transaction is recorded correctly, every account reconciles, and every statutory return is prepared on complete data and filed on time. **The role does not execute payments and holds no payment credentials.** The team that records and reconciles is never the team that moved the money.

Role Purpose

The Accounts Manager runs the accounting function across the group's entities: the close calendar, the reconciliation regime, statutory preparation, the audit file and the accounts team. The role sits alongside the Finance Manager under the Chief Financial Officer: this role keeps the books, the Finance Manager analyses them. It is accountable for the accuracy of every number it delivers.

Key Responsibilities

1. Books and Close

- Own the books across all group entities, with entity-wise separation preserved and inter-entity transactions identified on both sides.
- Own the monthly close calendar and deliver entity-wise trial balance, profit and loss account and balance sheet within the agreed number of working days.
- Review and approve entries prepared by the team before they are posted, and reject anything not supported by an approved document.
- Ensure no posted entry is altered or deleted. A correction is a recorded reversal and repost with the reason stated.

2. Reconciliation Governance

- Own the reconciliation regime: bank accounts, wallet balances, platform settlements, internal transfers and vendor and customer ledgers, each on a defined frequency.
- Review the ageing of unreconciled items each week and escalate anything above the threshold or beyond the age limit to the Chief Financial Officer the same day.

- Ensure reconciliation is performed against the bank and platform record itself, never against an internal summary of it.
- Investigate and close any difference between the books and the operational or platform record rather than carrying it.

3. Statutory Preparation

- Own preparation of GST returns and reconciliation of GSTR-2B against the books, clearing differences before filing.
- Own preparation of tax deducted at source computations, deposits and returns, including deduction on virtual digital asset transfers under Section 393 of the Income-tax Act, 2025 (formerly Section 194S of the Income-tax Act, 1961).
- Ensure every statutory payment is recorded with its challan and acknowledgement filed against the period.
- Deliver complete working papers to the Finance Manager and the Chartered Accountant within the timeline for each filing. No filing is made on incomplete data.

4. Digital Asset Accounting

- Own the digital asset inventory on the valuation and cost-flow method adopted by the Company, applied consistently, and reconciled to platform and wallet balances.
- Ensure cost of acquisition is recorded against each disposal so that margin on every transaction is computable and supportable.
- Flag any treatment question to the Chief Financial Officer rather than resolving it within the team.

5. Audit and Controls

- Prepare the audit file and schedules ahead of the audit rather than during it, and resolve auditor queries within their timeline.
- Close every audit and internal control observation with a dated corrective action, and ensure it does not recur.
- **Maintain segregation within the team at all times:** the person who records is not the person who reconciles the same account, and nobody in the function executes payments.
- Supply the External Compliance Officer with statements and records for accounts under lien or external query, and book the accounting effect. Do not conduct the matter.

6. Team Leadership

- Lead the Accounts Executives and, through them, the Accounts Associates: allocation, quality, development and certification.
- Review a sample of the team's work each cycle and correct errors at the cause rather than at the entry.
- Maintain a named successor for each Accounts Executive position.
- Report to the Chief Financial Officer on close status, reconciliation ageing, statutory position and open items on the defined cycle.

Authority and Limits

- **Approves:** routine entries within the adopted accounting framework; the close calendar and reconciliation schedule; team work allocation; corrective actions within the function.
- **Requires Chief Financial Officer approval:** any write-off or provision; any reclassification affecting reported income; any entry not supported by an approved document; any change in accounting treatment or valuation method.

- **Holds no authority** to execute a payment, hold a payment credential, act as a bank signatory, adopt a tax position, or correspond with a bank or authority on a lien or notice.
- **Escalates the same day:** any unreconciled item above ____ or aged beyond ____ days; any unexplained difference to the operational record; any notice from a tax or regulatory authority; any instruction to post an entry without support.

Key Performance Indicators

Measure	Standard
Books closed within working days of period end	Within ____ days, ____% of months
Reconciliations completed on schedule	____% of scheduled reconciliations
Unreconciled items aged beyond limit	Zero above ____ days
GSTR-2B to books reconciliation gap	Below ____%
Statutory working papers delivered by due date	100%
Entries posted without approved support	Zero
Repeat audit observations	Zero
Segregation between recording and reconciling maintained	100% of the time

Statutory timeliness and segregation act as gates. A late statutory preparation that causes a missed filing, or any period in which segregation was not maintained, caps the grade regardless of every other measure.

Qualifications and Experience

Essential

- B.Com or equivalent; CA Inter, CMA Inter or M.Com preferred.
- Five years or more in accounting, including at least two leading a team.
- Practical command of GST return preparation and reconciliation, and of TDS computation, deposit and filing.
- Multi-entity accounting experience with inter-entity transactions.
- Advanced Excel and strong Tally ownership; ERP data literacy.
- Experience supporting a statutory or tax audit end to end.

Preferred

- Virtual digital asset, fintech, exchange or NBFC sector experience.
- Exposure to inventory valuation on a defined cost-flow method.
- ERP to Tally integration or data reconciliation experience.

Attributes

- Will not approve what cannot be supported, whoever is asking.
- Raises a difference early rather than after attempting to make it disappear.
- Holds segregation when the team is short-handed.
- Closes on time without compressing the checks.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the accountabilities and authority limits set out in it, including the limits on payment execution and on altering posted entries.

Job Description: Accounts Executive

Accounts, Taxation and Banking · Supersedes the designation 'Accountant'

Designation	Accounts Executive
Formerly	Accountant (title superseded)
Department	Accounts, Taxation and Banking
Reporting To	Accounts Manager – sole reporting line
Direct Reports	Accounts Associates
Grade Level	Executive (supervisory tier)
Working Hours	8 hours, general shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Accounts Executive records and reconciles, and checks the work of the Accounts Associates before it goes further. **The role does not execute payments, does not hold payment credentials and is not a bank signatory.** Reconciliation is a control only where the person performing it is not the person who moved the money.

Role Purpose

The Accounts Executive maintains the Company's books across its entities so that the financial position is accurate, current and provable at any point. The role records transactions at the time they occur, reconciles the accounts assigned to it, prepares statutory working papers, and supervises the Accounts Associates.

Key Responsibilities

1. Books of Account

- Maintain day-to-day accounting entries in Tally and in the ERP across assigned entities, with entity-wise separation preserved.
- Manage ledgers, vouchers, journals and supporting documents so that every entry traces to its source document without reconstruction.
- Post every entry within the period to which it relates. Do not carry an entry forward to smooth a period.
- Never post an entry without an approved supporting document. Never alter or delete a posted entry: reverse it and repost with the reason recorded.
- Check entries prepared by Accounts Associates before posting, and return anything unsupported.

2. Reconciliation

- Reconcile assigned bank accounts, wallet balances, platform settlements, internal transfers and vendor and customer ledgers on the defined frequency.
- Investigate and clear mismatches, unmatched credits, failed transfers, reversals and short settlements. Do not carry an unexplained difference forward.

- Maintain an ageing view of every unreconciled item and report it to the Accounts Manager, rather than only the closing balance.
- Reconcile against the bank and platform record itself, never against an internal summary of it.

3. Statutory and Digital Asset Support

- Prepare transaction and account summaries for GST returns and reconcile GSTR-2B against the books.
- Prepare tax deducted at source data, including deduction on virtual digital asset transfers, and reconcile deducted amounts to deposits and returns.
- Maintain the digital asset inventory on the method adopted by the Company and reconcile the recorded position to platform and wallet balances.
- Flag any treatment question to the Accounts Manager rather than resolving it independently.

4. Schedules, Audit and Records

- Prepare month-end schedules, the fixed asset register and depreciation workings.
- Keep records filed, indexed and formatted so that a sample can be produced during an audit without preparation.
- Prepare audit schedules and support statutory and tax audit with reconciliations and documentation.
- Supply the External Compliance Officer with statements and records for accounts under lien or external query. Do not correspond with the bank or authority.

5. Supervision and Conduct

- Allocate and check the work of the Accounts Associates, and coach them on the specific errors they make.
- Maintain strict confidentiality of all financial records and Company information.
- Do not adjust, suppress, reclassify or backdate an entry to produce a desired result, at the request of any person and at any level of seniority.
- Report immediately to the Accounts Manager any instruction to post without support, to alter a posted entry, or to record a transaction other than as it occurred.
- Do not hold Company financial records on a personal device or personal account.

Authority and Limits

- **May do independently:** post routine entries against approved supporting documents; perform assigned reconciliations; prepare schedules and working papers; check and return Associate work.
- **No authority** to execute a payment, hold a payment credential, or act as a bank signatory.
- **Requires Accounts Manager approval:** any write-off or provision; any reclassification affecting reported income; any entry not supported by an approved document; any change in treatment.
- **Escalate the same day:** any unreconciled item above ____ or aged beyond ____ days; any unexplained difference to the operational or platform record; any notice received from a tax or regulatory authority.

Key Performance Indicators

Measure	Standard
Assigned reconciliations completed on schedule	____% of working days
Unreconciled items aged beyond limit	Zero above ____ days
Entries posted within the period to which they relate	100%

Entries posted without approved support	Zero
Statutory working papers delivered by due date	100%
Associate work checked before posting	100%
Repeat audit observations on assigned areas	Zero

Entries posted without support act as a gate and cap the grade for the period regardless of every other measure.

Qualifications and Skills

Essential

- B.Com or equivalent commerce graduate.
- Two years or more in accounting with hands-on Tally ownership, including work across more than one entity.
- Practical command of GST return preparation and reconciliation, and of TDS computation and deposit.
- Advanced Excel: lookups, pivots and high-volume matching.
- Methodical by disposition. Closes what is open rather than carrying it forward.
- Discretion with financial information.

Preferred

- CA Inter, CMA Inter or M.Com.
- Exposure to virtual digital asset taxation and to inventory valuation on a defined cost-flow method.
- Experience supporting a statutory or tax audit.

Attributes

- Will not post what cannot be supported, regardless of who is asking.
- Raises a difference early rather than after attempting to make it disappear.
- Comfortable saying that a figure is provisional.
- Checks an Associate's work rather than assuming it.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and authority limits set out in it, including the limits on payment execution and on altering posted entries.

Job Description: Accounts Associate

Accounts, Taxation and Banking · General shift

Designation	Accounts Associate
Department	Accounts, Taxation and Banking
Reporting To	Accounts Executive – sole reporting line
Function Line	Accounts Executive → Accounts Manager → Chief Financial Officer
Grade Level	Associate (entry tier)
Working Hours	8 hours, general shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Accounts Associate prepares and records; the Accounts Executive checks. **The Associate posts nothing without an approved supporting document, executes no payment, and holds no payment credential.** Every entry the Associate prepares is checked before it becomes part of the books.

Role Purpose

The Accounts Associate does the recording work the books rest on: data entry, voucher preparation, document collection and filing, and the first pass on reconciliation. Accuracy at this level is what makes everything above it reliable.

Key Responsibilities

1. Data Entry and Voucher Preparation

- Enter purchase, sales, expense, journal and bank transactions in Tally and the ERP accurately and within the period to which they relate.
- Prepare vouchers with the supporting document attached, and submit them to the Accounts Executive for checking before posting.
- **Do not post an entry without an approved supporting document, and do not alter or delete a posted entry.** Where something is wrong, report it; the correction is made as a recorded reversal.
- Enter data as it appears on the source document. Do not adjust, round or interpret a figure to make it match.

2. Document Collection and Filing

- Collect invoices, bills, receipts, challans and acknowledgements, and chase missing documents to closure.
- Download and file bank statements for every account on the defined schedule.
- File records so that any document can be produced on request without searching.
- Report a missing or illegible document rather than posting the entry without it.

3. Reconciliation Support

- Perform the first-pass match of bank, wallet and platform records against the books, and list the items that do not match.
- Do not clear or write off a difference. Prepare the list and hand it to the Accounts Executive with the supporting extracts.
- Follow up on the items assigned back, and close each with the document that explains it.

4. Statutory and Audit Support

- Compile the transaction summaries and extracts required for GST and TDS preparation.
- Retrieve records for audit, assessment or internal review as directed.
- Maintain the record of statutory payments with challans and acknowledgements filed against the period.

5. Conduct and Confidentiality

- Maintain strict confidentiality of all financial records, transaction data and Company information.
- Do not hold Company financial records on a personal device or personal account.
- Report immediately to the Accounts Executive any instruction to post an entry without support, to alter a posted entry, or to record a transaction other than as it occurred, whoever gives it.
- Do not accept any consideration or benefit from a vendor, client or any person in connection with the role.

Authority and Limits

- **May do independently:** enter transactions against approved supporting documents; prepare vouchers; collect and file records; prepare first-pass reconciliation lists.
- **No authority** to post an unsupported entry, clear a reconciliation difference, write off any amount, execute a payment, hold a payment credential, or change a posted entry.
- **Escalate to the Accounts Executive:** any missing or questionable document; any difference found in a first-pass match; any instruction to record something other than as it occurred; any notice received from an authority.

Key Performance Indicators

Measure	Standard
Entry accuracy on checking by the Accounts Executive	Above ____%
Entries prepared within the period to which they relate	100%
Vouchers submitted with supporting document attached	100%
Bank statements downloaded and filed on schedule	100%
First-pass reconciliation lists delivered on schedule	Above ____%
Unsupported entries posted	Zero
Confidentiality breaches	Zero

No measure in this role rewards entry volume. Accuracy on checking is the measure that matters. Targets marked ____ are set in the departmental KPI scorecard.

Qualifications and Skills

Essential

- B.Com or equivalent commerce graduate. Strong fresh graduates may be considered.

- Working knowledge of Tally and of basic accounting principles.
- Accuracy and speed in data entry, sustained across a full day.
- Working proficiency in Excel.
- Methodical filing discipline.
- Discretion with financial information.

Attributes

- Enters what the document says, not what would make it balance.
- Reports a missing document rather than working around it.
- Asks when unsure rather than assuming.
- Personal integrity. This role handles the Company's financial records daily.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and limits set out in it, including that I post nothing without an approved supporting document.

Employee Name	_____	Designation	_____
Signature	_____	Date	_____

Job Description: HR Manager

Human Resources function · General shift

Designation	HR Manager
Department	Human Resources
Reporting To	General Manager – sole reporting line
Direct Reports	HR Executive, and the HR Associates beneath; Office Assistant and Security Guard
Working Hours	8.5 hours, general shift, with availability across shift timings as operational needs require
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal
Employment Type	Full-time

Position of the role. The HR Manager owns the people function end to end for a workforce operating across three shifts. The role is accountable for the fact that every employee is paid correctly and on time, that every statutory obligation is met without exception, and that every management decision on performance or discipline is documented well enough to withstand challenge. Payroll accuracy and statutory timeliness are not targets in this role. They are conditions of it.

About the Company

Blynk Virtual Technologies Private Limited operates in digital asset and P2P services, spanning trading operations, payment operations, KYC and compliance, client relationship management, finance and technology. The business runs continuously across three shifts and is subject to financial-sector compliance obligations. The HR function supports that workforce and is expected to build structure rather than administer an existing one.

Key Responsibilities

1. Recruitment and Talent Acquisition

- Own end-to-end recruitment against the approved headcount plan across Operations, Payment Operations, Compliance and KYC, Client Relations, Finance and Technology.
- Draft and maintain job descriptions, and keep them aligned to the reporting structure actually in force.
- Source, screen, interview and coordinate selection; release offers within the approved band.
- Run onboarding and induction, including compliance induction, for every joiner before they are placed on a live desk.
- Direct and review the work of the HR Executive and, through that role, the HR Associates on sourcing, screening and candidate coordination.

2. Payroll, Statutory Compliance and Records

- Own the monthly payroll cycle end to end: attendance capture, leave and LOP computation, statutory deductions, salary register, payslips and the bank disbursement file. Finance releases the payment; HR owns the accuracy of what is released.
- Ensure provident fund, ESIC, professional tax and TDS obligations are computed, deposited and filed accurately and on or before the due date.
- Confirm every employee's statutory registration status is correct and complete before their first payroll run.
- Maintain personnel files, HRMIS records and statutory registers under the MP Shops and Establishments Act and other applicable law, complete and audit-ready at all times.

3. Performance Management

- Own the Performance Management System and the appraisal cycle: goal setting with department heads, review scheduling, rating collation and calibration support.
- Compute the Performance Linked Incentive against the approved structure and maintain the audit trail for every grade awarded and every amount withheld.
- Administer Performance Improvement Plans and track them to a recorded outcome.
- Report on appraisal completion, rating distribution and PLI outcomes to the General Manager.
- This responsibility is not delegated to the HR Executive or the HR Associates.

4. Employee Relations, Grievance and Discipline

- Receive and resolve employee grievances, and maintain the grievance register with outcomes.
- Draft disciplinary correspondence, show-cause notices and warning letters to a standard the General Manager and the Director can sign without rewriting.
- Ensure that no disciplinary action is taken without a recorded basis, an opportunity to respond, and a documented decision.
- Provide an accessible point of contact for employees on all three shifts, not only those working general hours.

5. Policy, Documentation and Audit Support

- Draft, review and maintain HR policies, standard operating procedures and the employee handbook, and issue amendments with recorded effective dates.
- Prepare employment contracts, offer letters, appointment letters, confirmation letters, experience and relieving letters, and full and final settlements.
- Support internal audit, statutory audit and any inspection or notice from a labour or statutory authority.
- Maintain confidentiality of employee and Company information without exception.

6. Training and Development

- Identify training needs across functions and maintain the annual training calendar.
- Run induction, compliance, operational and leadership training, and maintain attendance and completion records.
- Ensure AML, KYC and data security awareness training reaches every employee and is refreshed on schedule. Training records are a compliance artefact, not an HR convenience.
- Track skill development and career progression, and maintain the succession bench for supervisory roles.

7. Workforce Planning Across Shifts

- Plan headcount against the three-shift roster so that each shift is staffed to its minimum viable strength, including on the night shift.
- Track attrition by function and shift, and report the drivers rather than only the rate.
- Coordinate with Operations, Compliance, Client Relations and Payment Operations on workforce requirements, replacement lead times and roster feasibility.

Authority and Limits

- Approves:** leave and attendance regularisation within policy; offer release within the approved band; recruitment vendor engagement within budget; the work allocation of the HR Executive and the HR Associates.
- Requires General Manager approval:** any offer outside band; any headcount beyond the approved plan; any policy amendment; any Performance Improvement Plan; any warning beyond a first written warning.
- Requires Director approval:** any termination; any salary revision; any settlement with a departing employee.
- Escalate on the day received:** any notice, inspection or communication from a labour or statutory authority; any grievance involving a manager or department head; any allegation of harassment or misconduct.

Performance Standards

Measure	Standard
Payroll accuracy	100%. Every error is a reportable incident
Statutory filings and remittances on or before due date	100%. Zero late fees or interest
Time to fill an approved position	Within ____ days
Offer to join conversion	Above ____%
Personnel file completeness on audit sample	100%
Appraisal cycle completion within window	100%
Voluntary attrition within probation	Below ____%
Compliance training coverage	100%, refreshed on schedule

Payroll accuracy and statutory timeliness operate as gates. A material payroll error or a late statutory filing caps the grade for that quarter regardless of performance on other measures. Targets marked ____ are set in the departmental KPI scorecard.

Eligibility and Skills

Essential

- Bachelor's degree in Human Resources, Business Administration, Management or a related field.
- Four years or more of HR experience, including at least two years of independent, hands-on ownership of Indian payroll and statutory compliance.
- Working command of provident fund, ESIC, professional tax, TDS and the Shops and Establishments framework.

- Demonstrated ability to draft policy and disciplinary documentation in clear, defensible English.
- Experience managing a shift-based or continuously operating workforce.
- Proficiency in MS Office and HRMS or payroll software.
- Absolute discretion with confidential information.

Preferred

- MBA or PGDM in Human Resources.
- Experience in a regulated financial services, fintech or crypto environment.
- Familiarity with KYC and AML obligations as they affect hiring, training and background verification.
- HRMS or biometric attendance system implementation experience.

Attributes

- Builds systems and policy from the ground up rather than only administering what exists.
- Holds a line on documentation when the business wants to move faster than the paperwork.
- Composure in a grievance or disciplinary conversation.
- High personal integrity. This role holds the personal and financial data of every employee.

Notes for HR and Management

Experience requirement. The superseded description asked for two years. For a role that independently owns payroll, statutory filings, the appraisal cycle and disciplinary documentation for a workforce of this size across three shifts, two years is light. Four is written here. Set it where the Management is comfortable, but a candidate who has never independently closed a payroll or filed a return should not be carrying this scope alone.

For the external posting version, delete the Authority and Limits section and the Performance Standards table, and add the compensation and joining lines. Those belong in the advertisement, not in the internal role charter.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the policies of the Company in force from time to time. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, escalation obligations and conduct standards set out in it.

Employee Name	_____	Designation	_____
Signature	_____	Date	_____

Job Description: HR Executive

Human Resources function · General shift

Designation	HR Executive
Department	Human Resources
Reporting To	HR Manager – sole reporting line
Direct Reports	HR Associates
Grade Level	Executive (supervisory tier)
Working Hours	8.5 hours, general shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The HR Executive runs HR delivery day to day and supervises the HR Associates. **Performance management, payroll computation, compensation decisions and disciplinary action remain with the HR Manager.** The Executive executes, checks and supervises; the Executive does not decide on pay, rating or discipline.

Role Purpose

The HR Executive delivers the recruitment pipeline, the employee lifecycle and the records that sit beneath them, to a standard that survives audit. The role supervises the HR Associates and is the working layer between them and the HR Manager.

Key Responsibilities

1. Recruitment Delivery

- Run the recruitment pipeline against the approved headcount plan: sourcing channels, screening standards, shortlist quality and interview scheduling.
- Review the Associates' shortlists before they reach the hiring manager, and return anything screened against the wrong criteria.
- Coordinate the interview panel and maintain the recruitment tracker as the single record of pipeline status.
- Prepare offer documentation for the HR Manager's approval and release. Do not communicate an offer figure or term that has not been approved.
- Track background and reference verification to completion before a joining date is confirmed.

2. Onboarding, Lifecycle and Exit

- Own onboarding delivery: joining documentation, personnel file opening, induction scheduling including compliance induction, asset and access coordination.
- Confirm no joiner is placed on a live desk before induction and certification are complete.
- Track confirmation dates, probation reviews and documentation milestones, and prompt the HR Manager ahead of each.

- Coordinate exit formalities: documentation, asset return and clearance. Final settlement computation and approval remain with the HR Manager.

3. Records, Attendance and Payroll Input

- Supervise the HR Associates on employee records and the HRMIS, and check completeness rather than assuming it.
- Compile and validate attendance, leave and shift data for the payroll cycle, and hand it to the HR Manager within the cut-off.
- **Do not compute payroll, deductions, loss of pay or statutory amounts.** The Executive prepares and validates the input; the HR Manager owns the computation.
- Maintain statutory registers and personnel files in an audit-ready state at all times.
- Prepare statutory data for the HR Manager's filing. The filing decision and its timing remain with the HR Manager.

4. Employee Query and Grievance Intake

- Handle employee queries escalated by the Associates that are answerable from written policy.
- Log every grievance at intake and route it to the HR Manager. Do not investigate, mediate or resolve a grievance.
- Refer to the HR Manager without discussion: any complaint about a manager or colleague, any query about salary, appraisal, rating or incentive, any resignation, and anything the written policy does not clearly cover.
- Maintain the query and grievance log so that recurring questions surface as policy gaps.

5. Supervision, Training and Reporting

- Allocate work across the HR Associates and check the quality of what they produce before it leaves the function.
- Coach Associates on specific errors, and ensure they refer rather than interpret where policy is unclear.
- Coordinate the training calendar and maintain attendance and completion records as a compliance artefact.
- Report to the HR Manager on pipeline, time to fill, joiners, exits, documentation gaps and attendance exceptions on the defined cycle.

6. Confidentiality and Access

- Maintain strict confidentiality of employee personal data and records.
- Access compensation and appraisal data only where a task assigned by the HR Manager requires it, and discuss it with no one else.
- Do not store employee data on a personal device or personal account.
- Disclose immediately any personal or family relationship with a candidate or employee, and take no part in that person's file.

Authority and Limits

- **May do independently:** run sourcing and screening; schedule interviews; allocate and check Associate work; issue routine documents on the HR Manager's approval; answer queries from written policy.
- **Requires HR Manager approval:** any offer, letter or document issued to an employee or candidate; any communication stating a term of employment; any release of employee information.

- **Holds no authority** over performance ratings, incentive computation, payroll computation, compensation, disciplinary action, grievance outcomes, or policy interpretation beyond written words.
- **Escalate to the HR Manager:** every grievance; every statutory notice or inspection; every documentation gap that cannot be closed; any offer or candidate falling outside the approved band.

Key Performance Indicators

Measure	Standard
Time to fill approved positions	Within ____ days
Offer to join conversion	Above ____ %
Payroll input delivered accurate and within cut-off	100%
Personnel file completeness on audit sample	100%
Induction and certification complete before live desk placement	100%
Grievances logged at intake and routed same day	100%
Training records complete and current	100%
Confidentiality breaches	Zero

Payroll input accuracy acts as a gate. Any error in the data handed to the HR Manager that reaches payroll caps the grade for the period. Targets marked ____ are set in the departmental KPI scorecard.

Qualifications and Skills

Essential

- Graduate in any discipline; a qualification in Human Resources or Business Administration is an advantage.
- Two years or more in HR, including recruitment delivery and employee records, with at least six months supervising or checking others' work.
- Working knowledge of attendance, leave and payroll input processes and of Indian statutory requirements at a practical level.
- Clear professional spoken and written Hindi and English.
- Working proficiency in Excel and an HRMS.
- Discretion with personal and confidential information.

Attributes

- Checks an Associate's work before it leaves the function.
- Refers rather than interprets where policy is unclear.
- Holds a documentation standard when a manager wants someone on the desk tomorrow.
- Discreet. This role sees personal data across the whole workforce.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and authority limits set out in it, including the limits on payroll, performance and disciplinary matters.

Employee Name	_____	Designation	_____

Job Description: HR Associate

Human Resources function · General shift

Designation	HR Associate
Department	Human Resources
Reporting To	HR Executive – sole reporting line
Function Line	HR Executive → HR Manager
Working Hours	8 hours, general shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal
Employment Type	Full-time

Position of the role. The HR Associate supports the HR Executive and the HR Manager on recruitment coordination, first-line employee queries and HR data management. The role is deliberately bounded. Performance management, payroll, compensation decisions and disciplinary matters are held by the HR Manager and are not delegated to this role. The Associate reports solely to the HR Executive and takes no HR instruction from any other manager or department.

Objective

The HR Associate keeps the recruitment pipeline moving and the employee record accurate, so that the HR Manager's time goes to decisions rather than to coordination. The role is the first point of contact for routine employee questions and the working hands behind hiring, onboarding and records.

Key Responsibilities

1. Talent Acquisition Support

- Post approved vacancies on job portals and sourcing channels, using the job description supplied by the HR Manager without amendment.
- Source and screen applications against the stated eligibility criteria and prepare a shortlist with reasons for the HR Executive.
- Maintain the recruitment tracker: role, source, candidate stage, interview date, outcome and reason for rejection.
- Coordinate interview scheduling across candidates and interviewers, and confirm attendance ahead of each slot.
- Follow up on documents, references and background verification inputs required before an offer is released.

2. Candidate Calling and Coordination

- Call candidates to screen for basic fit, availability, notice period, location and shift willingness.
- Communicate only the information contained in the approved job description and the HR Manager's brief.

- **Do not state or imply a salary figure, band, joining bonus, joining date or role term.** Where a candidate asks, record the question and revert after the HR Manager confirms.
- Follow up with candidates through the offer and joining stages and report any candidate at risk of dropping out.
- Maintain a call log with date, candidate, outcome and next action.

3. First-line Employee Query Handling

- Answer routine employee questions on leave balance, attendance marking, policy content, document requests and the status of a pending request.
- Answer only from the written policy. Where the policy does not clearly cover the question, refer it to the HR Executive rather than interpreting it.
- Log every query with the employee, subject, date and resolution, so that recurring questions surface as policy gaps.
- Issue routine documents on the HR Manager's approval: address proof, employment verification and similar standard letters.
- Refer to the HR Executive without discussion: any grievance, any complaint about a manager or colleague, any query about salary, appraisal, rating or incentive, and any resignation.

4. HR Data Management

- Maintain employee records and the HRMIS: personal details, contact information, documents, joining and confirmation dates, and department and shift allocation.
- Compile attendance and leave data for the HR Executive to validate as payroll input. The Associate compiles the data; the Associate does not compute payroll, deductions or LOP.
- Keep personnel files complete and correctly indexed, and flag missing documents to the HR Executive.
- Prepare routine HR reports and trackers on headcount, joiners, exits and pending documentation.
- Support audit and inspection preparation by retrieving records as directed.

5. Onboarding and Exit Support

- Prepare the joining kit, collect joining documentation and open the personnel file for each new employee.
- Coordinate induction scheduling, including compliance induction, and confirm completion before the employee is placed on a live desk.
- Coordinate asset issue, seat allocation and system access requests with the relevant function.
- Support exit formalities: documentation collection, asset return and clearance coordination. Final settlement computation and approval remain with the HR Manager.

6. Confidentiality and Access

- Maintain strict confidentiality of all employee personal data, documents and records seen in the course of the role.
- Do not access, view or discuss compensation data, appraisal ratings, incentive figures or disciplinary records. Where these appear in a file being handled, do not read further and inform the HR Manager.
- Do not disclose one employee's information to another employee, or to any manager, without the HR Manager's approval.
- Do not store employee data on a personal device, personal account or any unauthorised channel.
- Disclose immediately any personal or family relationship with a candidate or employee, and take no part in that person's file.

Outside the Scope of this Role

The following are held by the HR Manager and are not delegated to the HR Associate. An instruction to perform any of them is referred back to the HR Manager.

- Performance management in any form: goal setting, appraisals, ratings, calibration, Performance Linked Incentive computation, and Performance Improvement Plans.
- Payroll processing, statutory computation, deductions, filings and the disbursement file.
- Compensation: salary structures, bands, offer figures, revisions and negotiation.
- Disciplinary matters: warning letters, show-cause notices, investigations and terminations.
- Grievance handling and any complaint involving a manager or colleague.
- Drafting or amending HR policy, and issuing any interpretation of policy beyond its written words.
- Final and full settlement computation and approval.

Authority and Limits

- **May do independently:** post approved vacancies; screen and shortlist against stated criteria; schedule interviews; answer routine queries from written policy; maintain records and trackers.
- **Requires HR Manager approval:** issue of any letter or document to an employee or candidate; any communication stating a term of employment; any release of employee information.
- **No authority** to commit on compensation, joining date, role terms, leave beyond policy, or any exception.
- **Refer, do not resolve:** grievances, salary and appraisal queries, resignations, and anything the written policy does not clearly cover.

Performance Standards

Measure	Standard
Shortlist delivered within brief timeline	___% of requisitions
Interview scheduling completed without reschedule error	Above ___%
Candidate follow-up on offered candidates	100% until joining or decline
Employee record and HRMIS accuracy on audit sample	100%
Personnel file completeness on audit sample	100%
Queries logged and resolved or referred within ___ hours	___%
Unauthorised commitments to candidates or employees	Zero
Confidentiality breaches	Zero

Targets marked ___ are set in the departmental KPI scorecard and reviewed each quarter.

Eligibility and Skills

Essential

- Graduate in any discipline. A degree or diploma in Human Resources or Business Administration is an advantage.
- One year or more in HR coordination, recruitment support or administration. Strong fresh graduates may be considered.
- Clear, professional spoken Hindi and English. This role calls candidates and speaks to employees daily.
- Accuracy and discipline in record-keeping and data entry.
- Working proficiency in MS Office, particularly Excel.
- Discretion with personal and confidential information.

Preferred

- Experience recruiting for shift-based operations, BPO, fintech or financial services.
- Familiarity with job portals and applicant tracking tools.
- Exposure to HRMS or attendance systems.

Attributes

- Follows through and closes loops rather than forwarding them.
- Refers rather than improvises when a question falls outside written policy.
- Comfortable saying that they will check and revert.
- Personal integrity. This role sees employee personal data every day.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the policies of the Company in force from time to time. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description, including the responsibilities that are outside the scope of this role, and accept the confidentiality and referral obligations set out in it.

Job Description: Quality Control Manager

Quality Control function · Independent of all line functions

Designation	Quality Control Manager
Department	Quality Control
Reporting To	General Manager – sole reporting line
Direct Reports	Quality Control Associates
Grade Level	Middle to senior management
Working Hours	8.5 hours, general shift, reviewing work across all three shifts
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. Quality Control reviews completed work across Operations, Payment Operations, KYC and Client Relations against the Company's standard operating procedures. **The function reports outside every line it reviews.** Quality Control does not direct any function, does not approve transactions, and does not carry an operational target. Its findings go to the function head and to the General Manager. No function head may instruct this role to alter, soften or withdraw a finding.

Role Purpose

The Quality Control Manager designs and runs the Company's internal quality assurance programme: what is sampled, against what standard, how findings are scored, and how errors are evaluated, confirmed and corrected. The role owns the Error Evaluation Report process on which performance and incentive outcomes partly depend, and is therefore accountable for the fairness and evidential quality of every finding as much as for finding errors at all.

Key Accountabilities

1. Quality Framework Design

- Design the review methodology: what is sampled from each function, at what volume, on what basis, and at what frequency.
- Build and maintain the review checklists for each reviewed process, derived from the current standard operating procedure and updated within a week of any SOP change.
- Define the error taxonomy and severity scale, including which errors are critical and therefore gate a performance grade.
- Set sampling so that every shift, every team and every reviewed role is covered proportionately. A function reviewed only on the day shift is not reviewed.

2. Review Programme

- Run the review programme across Operations, Payment Operations, KYC and Client Relations.
- Review the controls that matter most, at full coverage rather than by sample: every order release against a recorded funding confirmation, and every payment against maker-checker compliance.

- Review ERP entries against the platform and bank record, and report any difference the same day rather than at the end of the review cycle.
- Review the quality of KYC files cleared under delegated authority, and video KYC sessions against the full checklist.
- Review counterparty and client communication for accuracy, unauthorised commitments and off-platform contact.

3. Error Evaluation Report Process

- Own the Error Evaluation Report process end to end: identification, evidence, classification, response, confirmation and closure.
- **Ensure the employee concerned is given the finding and an opportunity to respond before it is confirmed.** A finding is not confirmed on the reviewer's view alone.
- Confirm or withdraw each finding on the evidence, and record the reasoning either way.
- Issue confirmed findings to the function head, to HR for the performance record, and to the General Manager.
- Maintain a route for a reviewed employee to contest a confirmed finding, and record the outcome of every challenge.

4. Root Cause and Corrective Action

- Analyse findings for pattern rather than treating each as an isolated event, and distinguish an individual error from a process, system or training failure.
- Report the cause with the finding. A finding that names a person but not a cause is incomplete.
- Track every corrective action agreed with a function head to a closure date, and re-review to confirm the correction held.
- Report any corrective action that has failed twice directly to the General Manager.

5. Calibration and Team Leadership

- Calibrate the Quality Control Associates so that the same work receives the same score regardless of who reviews it, and measure that consistency.
- Review a sample of the Associates' own reviews each cycle, and correct scoring drift.
- Ensure no Associate reviews work they performed, supervised, or which was performed by a person they have a personal or family relationship with.
- Develop the Associates' understanding of the processes they review, so that findings are informed rather than mechanical.

6. Reporting

- Deliver the quality reporting pack to the General Manager on a fixed schedule: coverage achieved, findings by function, severity and cause, corrective action status, and trend.
- Report honestly on functions performing well as much as on those performing badly. A quality function measured on findings raised will find them.
- Supply confirmed error data to HR within the timeline for the appraisal and incentive cycle.
- Report to the General Manager any attempt by a function head to influence, delay or suppress a finding.

Authority and Limits

- **May do independently:** select samples; access records, systems, chat logs and recordings across every reviewed function; raise findings; require a written response.

- **Holds no authority** to direct a line function, approve or block a transaction, alter an entry, or impose a disciplinary consequence. Consequence sits with the function head and HR.
- **Cannot be instructed** by any function head to alter, soften, delay or withdraw a finding.
- **Escalate to the General Manager:** any refusal to provide records; any attempt to influence a finding; any critical control failure; any corrective action that has failed twice.

Key Performance Indicators

Measure	Standard
Sampling coverage achieved against plan, by function and shift	Above ____%
Full-coverage review of order releases and payment maker-checker	100%
Findings supported by evidence on independent check	100%
Findings withdrawn on challenge	Below ____%
Scoring consistency between Associates on calibrated samples	Above ____%
Corrective actions closed by agreed date	Above ____%
Repeat findings on a closed corrective action	Below ____
Reporting pack delivered on schedule	100%

No measure in this role rewards the number of findings raised. Evidential quality and the rate of findings withdrawn on challenge are the measures that matter. Targets marked ____ are set by the General Manager.

Qualifications and Experience

Essential

- Bachelor's degree in any discipline.
- Five years or more in quality assurance, internal audit, process compliance or operational risk, including at least two supervising reviewers.
- Demonstrated ability to design a sampling methodology and a scoring framework, not only to apply one.
- Strong evidence discipline and clear written English: a finding must be readable and defensible by someone who was not present.
- Advanced Excel; SQL or equivalent for sampling from system data is an advantage.

Preferred

- Payments, exchange, banking back-office or financial services quality assurance background.
- Exposure to AML and KYC controls sufficient to review them.
- Experience running a formal error or defect evaluation process linked to performance outcomes.

Competencies

Core

- Independence: reports what the evidence shows, including where it is inconvenient.
- Fairness: as careful about a finding that is wrong as about an error that is missed.

- Integrity under pressure from a function head or a reviewed employee.

Functional

- Sampling and methodology design.
- Root cause analysis.
- Process knowledge across trading, payment, KYC and client-facing operations.

Leadership

- Calibrating reviewers to a consistent standard.
- Delivering an unwelcome finding without the conversation becoming adversarial.
- Building credibility with the functions reviewed.

Notes for HR and Management

The reporting line is the whole design. This description places Quality Control under the General Manager rather than under any function it reviews. Placed under Operations it cannot credibly review Operations; placed under Compliance it cannot credibly review Compliance. If the intention is for Quality Control to sit under the Compliance Head, the function should be scoped to exclude review of the compliance function itself, and that exclusion recorded, so that the limitation is visible rather than assumed.

This function feeds a pay outcome. Confirmed errors gate performance grades and incentive eligibility. That makes the right to respond before confirmation, and the route to contest a confirmed finding, structural rather than courteous. Without them, a scoring dispute becomes a grievance about pay.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Date: 03 September 2026

Job Description: Quality Control Associate

Quality Control function · Independent of all line functions

Designation	Quality Control Associate
Department	Quality Control
Reporting To	Quality Control Manager – sole reporting line
Working Hours	8 hours, general shift, reviewing work from all three shifts
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Quality Control Associate reviews completed work against the Company's procedures and records what the evidence shows. **The Associate reports solely to the Quality Control Manager and takes no instruction from any reviewed function.** The Associate records findings; the Quality Control Manager confirms or withdraws them. The Associate has no authority to impose a consequence on any employee.

Role Purpose

The Quality Control Associate performs the reviews on which the Company's quality picture rests: sampling completed orders, payments, KYC files and client interactions, checking them against the applicable checklist, and recording each finding with the evidence that supports it.

Key Responsibilities

1. Sampling and Review

- Draw samples strictly per the methodology set by the Quality Control Manager. Do not select cases by intuition, by employee, or because an outcome is expected.
- Review sampled work against the current checklist for that process, and note where the checklist itself no longer matches the procedure.
- Review the full-coverage items without exception: every order release against its recorded funding confirmation, and every payment against maker-checker compliance.
- Check ERP entries against the platform and bank record, and report a difference the same day it is found.
- Review KYC files cleared under delegated authority, video KYC sessions against the checklist, and client and counterparty communication for unauthorised commitments or off-platform contact.

2. Recording Findings

- Record each finding with the evidence attached: the record, the timestamp, the screen or log entry, and the specific procedure step that was not met.
- State what happened, not what the Associate believes the person intended. A finding describes the record.
- Classify severity against the published error taxonomy, and do not adjust a classification to reach a preferred outcome.
- Record clean reviews as fully as findings. A review with nothing to report is a result, not a wasted review.

3. Error Evaluation Support

- Prepare the draft Error Evaluation Report for the Quality Control Manager, complete with evidence and classification.
- Put the finding to the employee concerned where directed, and record their response in full and unedited.
- **Do not confirm a finding, close one, or tell an employee that an error will affect their grade or incentive.** Confirmation sits with the Quality Control Manager and consequence sits with the function head and HR.
- Perform re-reviews after a corrective action and report whether the correction held.

4. Independence and Conflict

- Do not review work performed or supervised by a person with whom the Associate has a personal, family or financial relationship. Declare the relationship and hand the sample back.
- Do not review work the Associate performed or was involved in at any stage.
- Report to the Quality Control Manager immediately any attempt by any person, at any level, to influence, delay, soften or discourage a finding.
- Do not discuss a finding, a sample or a review outcome with anyone outside the Quality Control function and the process route.

5. Records and Reporting

- Maintain the quality review log: samples drawn, reviews completed, findings raised by function, severity and status.
- Deliver the review volume set for the cycle, and report a shortfall in coverage rather than compressing the depth of review to meet the count.
- Maintain review records in a form that supports internal review and external audit.

6. Confidentiality and Conduct

- Maintain strict confidentiality of everything seen in the course of review: client data, transaction records, employee performance and findings in progress.
- Do not store review material, client data or evidence on a personal device or personal account.
- Do not accept any consideration or benefit from any person in connection with a review.

Authority and Limits

- **May do independently:** draw samples per the methodology; access records, logs, chats and recordings across reviewed functions; raise a finding; request a written response where directed.
- **No authority** to confirm or close a finding, to determine a consequence, to direct a line function, or to instruct any employee.
- **No authority** to alter a classification, a sample or a record to change an outcome.
- **Escalate to the Quality Control Manager:** any refusal to provide records; any attempt to influence a finding; any conflict of interest; any critical control failure found during review.

Key Performance Indicators

Measure	Standard
Review volume completed against the cycle plan	Above ____%
Findings supported by attached evidence	100%

Findings withdrawn by the Manager on evidence	Below ____%
Scoring consistency on calibration samples	Above ____%
Findings recorded within ____ hours of review	Above ____%
Conflicts of interest declared before review	100%
Confidentiality breaches	Zero

No measure in this role rewards the number of findings raised. Targets marked ____ are set by the Quality Control Manager.

Qualifications and Skills

Essential

- Graduate in any discipline.
- One year or more in quality assurance, audit support, process review, or in an operations or compliance role with strong process knowledge.
- Precision: reads a record carefully and describes it accurately.
- Clear written English. A finding must be understandable by someone who was not present.
- Working proficiency in Excel and comfort navigating an ERP.
- Discretion. This role sees both client data and colleagues' mistakes.

Preferred

- Prior experience on a trading, payment, KYC or client-facing desk, sufficient to understand what is being reviewed.
- Exposure to a formal quality or audit sampling framework.

Attributes

- Comfortable raising a finding against a colleague, and equally comfortable recording that there was none.
- Describes the record rather than inferring intent.
- Not persuadable by seniority or by friendship.
- Declares a conflict without being asked.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the AML and KYC Policy of the Company. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities, independence and confidentiality obligations set out in it, including the limits on confirming findings and determining consequences.

Job Description: Office Assistant

Support Staff · General shift

Designation	Office Assistant
Also referred to as	Office Boy
Department	Support Staff
Reporting To	HR Manager – sole reporting line
Working Hours	8 hours, general shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Office Assistant keeps the workplace running and moves documents and materials on instruction. **The role handles confidential documents and must never open, read, photograph, copy or discuss anything it carries**, and has no access to client data, systems or work areas beyond what a task requires.

Key Responsibilities

1. Office Upkeep

- Keep meeting rooms and the pantry stocked, set up and presentable through the day. Cleaning and hygiene are held by the Office Help.
- Prepare and serve refreshments for staff, visitors and meetings.
- Set up and clear meeting rooms before and after use.
- Report any damage, leak, fault or safety hazard to the HR Manager the same day.

2. Supplies and Errands

- Maintain stock of pantry supplies, stationery and consumables, and report a shortage before it runs out rather than after.
- Carry out bank, post, courier and purchase errands as instructed, and return with the receipt or acknowledgement every time.
- Account for any cash issued for an errand on the same day, with bills. Cash is never retained overnight.
- Collect and distribute post and courier items, and record what was received and to whom it was given.

3. Document and Material Handling

- Carry documents, files and packages between desks, floors and external offices strictly as instructed.
- **Do not open, read, photograph, copy, remove or discuss any document handled in the course of the role.** A sealed envelope is delivered sealed.
- Hand a document only to the named person or to the person instructed, and obtain acknowledgement where required.
- Report immediately to the HR Manager if a document is damaged, misplaced, delivered to the wrong person, or if anyone asks to see something being carried.

4. Visitor and Meeting Support

- Receive visitors courteously, direct them to reception or security for recording, and escort them as instructed.
- Do not permit any visitor into a work area unaccompanied.
- Support meetings and events with room setup, refreshments and material distribution.

5. Conduct and Confidentiality

- Maintain confidentiality of everything seen or overheard in the office, including conversations, screens and documents. This obligation continues after leaving the Company.
- Do not use a personal phone to photograph any screen, document, whiteboard or work area.
- Do not accept money, gifts or instructions from any person outside the Company in connection with the role.
- Report any request from anyone to remove, copy or show a document to the HR Manager immediately.
- Maintain punctuality, personal presentation and courteous conduct with staff and visitors alike.

Authority and Limits

- **May do independently:** routine upkeep, refreshment service, stock replenishment within approved supplies, and instructed errands.
- **No authority** to open or read any document, to enter a restricted work area unaccompanied, to operate any Company system, or to admit a visitor into a work area.
- **No authority** to purchase beyond approved supplies or to commit Company money.
- **Escalate to the HR Manager:** any shortage, damage, safety hazard, missing document, or any request from any person to remove, copy or show something.

Performance Standards

Measure	Standard
Office and pantry maintained to standard	Daily, without prompting
Errands completed with receipt or acknowledgement	100%
Cash accounted for with bills on the same day	100%
Documents delivered to the named recipient	100%
Confidentiality breaches, including photographs	Zero
Punctuality and attendance	Above ____%

Eligibility

- Able to read and write Hindi; basic spoken English is an advantage.
- Physically able to move between floors and carry materials and packages.
- Familiar with the local area for bank, post and courier errands.
- Two-wheeler and valid driving licence preferred where errands require travel.
- Honest, punctual, presentable and discreet.
- Clear background and reference verification.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the policies of the Company in force from time to time. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and confidentiality obligations set out in it, including that I must never open, read, copy or photograph any document I handle.

Job Description: Office Help

Support Staff · Housekeeping

Designation	Office Help
Department	Support Staff
Reporting To	HR Manager – sole reporting line
Working Hours	8 hours, as rostered to keep the office clean across operating hours
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Office Help keeps the premises clean, hygienic and in good order. The role works around desks, screens and papers throughout the day. **It never reads, moves, photographs or discards any paper, screen or item on a desk**, and anything found out of place is handed to the HR Manager untouched beyond picking it up.

Key Responsibilities

1. Cleaning and Hygiene

- Clean the office floors, common areas, meeting rooms, pantry and washrooms to the daily schedule, and again whenever needed.
- Keep washrooms hygienic and stocked with soap, tissue and sanitiser at all times.
- Clean desks and workstations only where they are clear, without moving papers, devices or personal items.
- Clean the pantry, utensils and appliances after use, and keep drinking water facilities clean.

2. Waste and Supplies

- Collect and segregate waste daily, and dispose of it through the approved route.
- **Never discard paper from a desk or printer.** Paper for disposal is placed in the designated shred bin by staff, not by the Office Help.
- Maintain the stock of cleaning materials and report a shortage to the HR Manager before it runs out.

3. Upkeep and Reporting

- Report any damage, leak, electrical fault, pest problem or safety hazard to the HR Manager the same day.
- Keep fire exits, corridors and emergency equipment clear of cleaning materials and obstructions.
- Coordinate with the Office Assistant on pantry and meeting room readiness.

4. Conduct and Confidentiality

- Do not read, photograph or discuss anything on a screen, whiteboard, desk or printer.
- Hand any document, device, key card or item found out of place to the HR Manager, without reading it.
- Do not admit any person into a work area; direct visitors to the Security Guard or reception.
- Do not accept money, gifts or instructions from any person outside the Company in connection with the role.

- Maintain punctuality, a clean uniform and courteous conduct with staff and visitors alike.

Authority and Limits

- **May do independently:** routine cleaning and hygiene to schedule; waste collection; replenishing washroom supplies.
- **No authority** to move or discard items on desks, to read or handle documents beyond handing found items to the HR Manager, to enter restricted areas unaccompanied, or to admit visitors.
- **Escalate to the HR Manager:** every hazard, fault, shortage, or item found out of place.

Performance Standards

Measure	Standard
Cleaning schedule completed	Daily, without prompting
Washrooms hygienic and stocked	At every check
Hazards and faults reported the same day	100%
Items on desks moved or discarded	Zero
Confidentiality breaches, including photographs	Zero
Punctuality and attendance	Above ____%

Eligibility

- Able to read Hindi, sufficient to follow the cleaning schedule and safety labels.
- Physically fit for cleaning duties across the premises.
- Prior housekeeping experience preferred.
- Honest, punctual and discreet.
- Clear background verification.

This description defines the scope of the role and does not constitute the whole of the terms of appointment or employment. It is to be read with the Articles of Association, the relevant Board resolution or appointment letter, the Code of Conduct and the AML and KYC Policy of the Company.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and confidentiality obligations set out in it, including that I never move, read or discard anything on a desk.

Name	_____	Designation	_____
Signature	_____	Date	_____

Job Description: Security Guard

Support Staff · Shift based

Designation	Security Guard
Department	Support Staff
Reporting To	HR Manager – sole reporting line
Working Hours	8 hours, aligned to the assigned shift
Location	Blynk Virtual Technologies Pvt. Ltd., 1st Floor Balwant Arcade, MP Nagar Zone-2, Bhopal

Position of the role. The Security Guard controls who enters the premises and what leaves them. The Company operates continuously and holds client data and financial systems on site. **No visitor enters a work area unrecorded and unaccompanied, and no Company equipment leaves the premises without an authorised gate pass**, whatever the hour and whoever is carrying it.

Key Responsibilities

1. Access Control

- Control entry to the premises throughout the shift and allow entry only to staff, recorded visitors and authorised persons.
- Record every visitor in the visitor register: name, organisation, contact number, person visited, purpose, time in and time out.
- Confirm with the person being visited before admitting any visitor, and do not admit a visitor into a work area unaccompanied.
- Verify staff identity where a person is unfamiliar, including at night, and check with the HR Manager rather than assuming.
- Do not admit any person claiming authority without verification, however senior they say they are.

2. Asset and Material Movement

- Check every item being taken out of the premises: laptops, hardware, files, packages and boxes.
- **Permit no Company equipment, document or material to leave without an authorised gate pass.** An instruction to let something pass without one is refused and reported.
- Record every inward and outward movement of equipment and material with date, time, item, carrier and authorisation.
- Receive deliveries and couriers, record them, and hand them to the Office Assistant or the addressee.

3. Premises Security and Patrol

- Patrol the premises at defined intervals through the shift and record each round.
- Check that doors, windows, shutters and locks are secure at the start and end of each shift.
- Monitor surveillance equipment where provided and report any fault the same shift.
- Ensure fire exits and emergency routes stay clear and accessible at all times.
- Switch off lights, air conditioning and equipment as instructed at the close of the working day.

4. Incident Response and Reporting

- Respond immediately to any fire alarm, medical emergency, theft, trespass, dispute or suspicious activity, and raise the alarm without delay.
- Report every incident in writing the same shift, recording what happened, when, who was involved and what was done.
- Know the emergency contact list, the location of firefighting equipment and the evacuation route, and keep that knowledge current.
- Escalate immediately to the HR Manager any attempt to enter without authority, any refusal to be recorded, and any instruction to bypass a check.

5. Handover and Conduct

- Complete a written handover to the incoming Guard: visitors still on premises, open incidents, equipment out on gate pass and any fault reported.
- Do not leave the post unattended until relieved.
- Maintain confidentiality of everything seen or overheard on the premises. Do not photograph any screen, document or work area.
- Do not accept money, gifts or instructions from any person outside the Company in connection with the role.
- Remain in uniform, alert and courteous throughout the shift, including on the night shift.

Authority and Limits

- **May do independently:** refuse entry to an unrecorded or unverified person; refuse the removal of any item without a gate pass; raise an alarm; record an incident.
- **No authority** to waive the visitor register or the gate pass requirement for any person at any level.
- **No authority** to enter work areas beyond patrol, operate Company systems, or handle documents beyond receiving and recording deliveries.
- **Escalate to the HR Manager:** every incident; every refusal to be recorded; every instruction to bypass a check; every equipment movement that looks irregular.

Performance Standards

Measure	Standard
Visitors recorded in the register	100%
Equipment leaving the premises against a gate pass	100%
Patrol rounds completed and recorded	100% of scheduled rounds
Incidents reported in writing the same shift	100%
Post left unattended before relief	Zero
Handover completeness	100%
Punctuality and attendance	Above ____%

The visitor register and the gate pass check act as gates. Any confirmed instance of either being waived caps the grade for the period.

Shift Structure

Shift	Timing	Duration
Morning	09:00 to 17:00	8 hours
Evening	17:00 to 01:00	8 hours
Night	01:00 to 09:00	8 hours

- The premises are occupied across all three shifts. A Guard may not leave post until relieved by the incoming Guard.

Eligibility

- Able to read and write Hindi, sufficient to maintain the visitor register and write an incident report.
- Physically fit for patrol duty and for standing watch through a full shift.
- Prior security experience preferred; training in fire safety and emergency response is an advantage.
- Willingness to work rotational shifts including the night shift.
- Alert, firm and courteous: able to refuse entry to a senior person politely and hold the refusal.
- Clear background and police verification. This is mandatory for this role and is not waived.

Note for HR and Management

A Guard will be tested by seniority, not by intruders. The realistic failure is an employee or a visitor who is known, senior or in a hurry, asking to skip the register or take a laptop out without a pass. The description gives the Guard express authority to refuse and a duty to report, so that refusing is compliance rather than insubordination. Management must back that refusal the first time it happens, or the control will not survive.

This Job Description defines the scope of the role and does not constitute the whole of the terms of employment. It is to be read with the appointment letter, the Attendance Policy, the Code of Conduct and the policies of the Company in force from time to time. The Company reserves the right to revise this description with notice to the employee.

Acknowledgement

I have read and understood this Job Description and accept the responsibilities and authority set out in it, including my authority to refuse entry or removal of any item without proper authorisation.
